He says that the temperature is very low, and that the wind is very strong. He says that the men who reached the North Pole were very brave and hardy, and that they were very much surprised to find the country so flat and open.

catarrh

The cause exists in the blood, it is what causes inflammation of the mucous membrane.

It is therefore impossible to cure the disease by local applications.

It is positively dangerous to neglect it, because it always affects the stomach and deranges the general health, and is likely to develop into consumption.

Hood's Sarsaparilla Promises to cure and keep the disease from returning. It is better to put off treatment than to never begin.

Many have been radically and permanently cured by Hood's Sarsaparilla. It cleanses the blood and restores the mucous membrane to its normal state. It is a powerful purgative and acts upon the bowels. It is a blood-purifier and acts upon the skin. It is a general tonic and acts upon the whole system. It is a powerful medicine and acts upon the blood.
