1895	1900
\$229,231	\$1,400,000
per month	per month

By way of comparison we give the mineral exports of the province for the six months ending December 31, 1895.

Gold \$603,901, silver \$535,905, lead \$181,922, copper \$53,662, Total \$1,375,390. What then took six months to produce is now accomplished in one-sixth of the time, and the pace is an accelerating one.

According to Professor Sidgwick individualism has a negative and positive pole. The negative consists in the protection of life and property, the positive in the enforcement of contract.
