

THE BORE IN FUNDY'S BAY.

Our country has great length, from Halifax to Dawson City. It has great mountains, great lakes, great rivers, great mines, great forests. Among its great things is its tide, that of the Bay of Fundy being one of the highest tides in the world, rising sometimes sixty feet or more. When it is so high as that, its beginning sometimes rushes up the great mud flats in a wall of water several feet high. This wave or wall of water is called a bore. The

all over it, East and West, a tide which if it had its own way would overrun our land and kill out its true life and prosperity.

In that tide is wave after wave, each helping to swell the volume of the great tide of evil. There is the wave of Sabbath breaking, the wave of impure and bad books, the wave of strong drink, the wave of profane swearing, the wave of falsehood, the wave of infidelity, the wave of worldliness, etc. These waves, and others that might be mentioned, combine to make up a tide of evil, which if left to itself, unchecked, would sweep out over

picture shows what our young people in parts of Nova Scotia, and New Brunswick, often see, the "bore" and the intruding tide.

If this tide had its own way it would spread out over large tracts of neighboring level land and destroy all life and growth where it came. But men have built dykes or walls along the sides of the creeks and bays to keep back the tide, and have in this way reclaimed thousands of acres of fertile soil which yield rich harvests.

There is another tide pouring into our country,

our land and kill out all that is best in it.

But men and women and children too are building dykes to keep back this tide of evil, family training, Bible reading, Sabbath Schools, Young People's Societies, Church Services, temperance organizations, good literature, Home Missions of various kinds, and other things.

In this work young people can help. It is their special work, for they are to reap the fruits, the benefits of living in a country from which these evils are kept out.
