

Mr. McRobert —

There is plenty of elevation.

Mr. Archer —

Then the best method is a chute.

Mr. Lewkowicz,—

There is one thing that was overlooked. It was not only the cost of material that I was seeking information about, but also the cost of maintenance, the fact that the conveyor is only used during a part of the day does not, I think, increase the cost of maintenance. It was the average of the two that I was trying to get some information about.

I have put in a number of conveyors in a great many plants, and they have ordered more, but we have never been able to find out what they save on the cost of labor, and I have not gained any further information to-night.

Mr. Baldwin,—

I would like to move a very hearty vote of thanks to Mr. Archer for the very able paper which he has read to-night. Seconded by Mr. Fletcher, carried unanimously.

Secretary,—

I would like to say that Mr. Archer has been kind enough to come forward and offered to give us another paper on some other subject at a future meeting.

Mr. Baldwin,—

You will notice on the list of orders of business there is one order, which, to my mind has been left out, and that is "General Business." With your permission I would like to move under the head of "General Business," Mr. Chairman, that you appoint the Executive Committee to act in conjunction with the Entertainment and Reception Committee to arrange for a Smoking Concert to be held some time in October, and for this Committee to report at our next meeting.

Mr. Lewkowicz,—

I heartily second that motion. Carried.

Moved by Mr. Lewkowicz, seconded by Mr. Wickens, that the meeting be adjourned. Carried.
