

Diphtheria Antitoxin.

**A Strictly Reliable Serum, prepared after the
Method of Behring and Roux.**

Inasmuch as the Antitoxic Serum produced in our Bacteriological Department will not be available until April or May, we have perfected arrangements for a supply of **DIPHThERIA ANTITOXIN** prepared under the supervision of **Ira Van Gieson, M.D.**, and **Nelson L. Deming, M.D.**, the well known bacteriological experts of New York City, and issued under their certificates of quality and strength.

This Antitoxin conforms to the conditions of the ordinance of the Board of Health of New York City, is absolutely sterile, and will be supplied in vials of 10 cc. each.

Three grades of strength will be furnished:

1. A weaker serum which will contain 600 antitoxin units for immunizing purposes, and for the treatment of mild cases. Issued under **blue label**.

2. A stronger serum of 1,000 antitoxin units for curative purposes—of sufficient strength for the great majority of cases. Issued under **yellow label**.

3. A still stronger serum of 1,500 antitoxin units for exceptionally severe cases. Of this strongest grade our supply for the present will be limited. Issued under **green label**.

Orders may be sent to our Detroit address; our New York City office at 90 Maiden Lane; our branch at 1008 Broadway, Kansas City, Mo.; or our laboratory at Walkerville, Ont.

Prices furnished on application.
