THE GOVENOR GENERAL.—His Lordship has since his visit to Upper Canada, travelled through many of the Townships in the Niagara District, visiting the villages on the Welland Canal. Addresses have been presented to him by many of the Townships. The Town Council of the City of Hamilton, as well as that of Dunder Dundas, have invited his Excellency to visit their respec-tive localities. As soon as it was known in Hamilton, that the Corporation had done so, a numerously signed requi-sition to the Mayor was presented, desiring him to convene a meeting of the inhabitants to take into consideration the step taken by the Council. The meeting was attended by a large number of the friends of the present Council headed by Mr. Notman, which fact prevented the Hamiltonians from giving their own opinion on the subject, no resolutions were passed nor would the meeting listen to any of the speakers. It is reported that His Excellency will not visit the Gore District.

FASHIONABLE WEDDING .- In the usual place will be found the usual announcement of the marriage of Mr. Davenport, of the Commissariat Department, to the eldest daughter of Sir Allan McNab. We do not often, here, in Canada notice these affairs, but the high standing of Sir Allan McNab in the society of this Province, and some circumstances connected with the family of the bridegroom, induces us to make a somewhat extended record of the event. The family of Davenport are, to a certain extent, connected with the history of America, from the fact that the gentleman who was yesterday married to Miss McNab is the son of the late Sir Salusbury Davenport, Rear Admiral, C. B., and K. C. H., who, when Captain Humphries, was in command of H. M.'s ship Leopard, and fought with and took the United States frigate Ches apeake, and was thus one of the causes of the second American War. Sir S. MR. HINCKS'S LETTER.—We had intended to make a tolerably close analysis of this wily production but find that it would carry us far beyond our limits. W shall, however, point out some important passages in it. Under the pretence of doing justice to his adopted country, and proving to the English people that the Canadians disown the idea of Annexation, Mr. Hincks brings in a great many political questions, and displays that mendacious spirit which never leaves him, and that talent for misrepresentation for which he is so distinguished. presentation for which he is so distinguished.

The apparently main point in his letter is, that the Canadians are, as a people, altogether hostile to Annexation—this we believe to be thoroughly true, and therefore shall not waste any time in considering it; but Mr. Hincks Resolved,—That it is the opinion of this meeting, that the onduct of the present administration has already sown and as at home and abroad, and has tended to alienate affective for the present administration for the present administration has already sown and as at home and abroad, and has tended to alienate affective for the present administration has already sown and provided the interests of the angles of the present administration has already sown and provided to the present administration has already sown and provided to the present administration has already sown and provided to the present administration has already sown and provided to the present administration has already sown and provided to the present administration has already sown and provided to the present administration has already sown and provided to all the present administration has already sown and provided to all the present administration has already sown and provided to all the present administration has already sown and provided to all the present administration has already sown and provided to all the present administration has already sown and provided to all the present administration has already sown and provided the present administration has alre people, they are jealous of energies they are a conquered people, they are jealous of energies they cannot compete with, and of a progress which is beyond their comprehension, and they feel, but cannot digest their obvious inferiority. As we have repeatedly expressed it, they would be independent of Britian, though they detest the idea of belonging to the United States—hence the British loyalists have to contend with French disloyalty. Another piece of trash and misrepresentation of our honourable Inspector General, is his reference to the "Church" newspaper as the official organ of the Bishop, and representing the sentiments of the old Family-Compact party. We have known something of the "Church" since its first institutution. It is the official organ of the Bishop, as far as official notices go—but his Lordship has no more to do with its polities than we with Galignan's Messenger or the New Orleans Picayune. If it speak the sentiments of the old Family Compact, it is because its politics are based upon the apostolic command "Fear God, Honor the King, 'and are necessarily conservative. We have, however, an idea from certain associations that these would have very little weight with Mr. Hincks, and look too like the Family Compact Politics to have favor in his eyes. As to the "Toronto Patriot, another very influential Conservative Journal"—we know we have influence based on sound and honest principles,—such as are very distasteful to such as Mr. Hincks, and that influence we trust we shall continue to devote to the case of righteousness, truth and loyalty—using every exertion to unmask and neutralize the hypocrisy and mischief of the selfcalled liberals .- Patriot.

PLACER INTELLIGENCE. Very rich deposits have been found on the North Fork of the American river. At a place known as Smith's Bar, digging has been attended with great good fortune. There is a story of a Baltimorean, who but recently arrived in this is a story of a battimorean, who but recently arrived in this country, having taken in one week, upward of \$6,000 in gold from one spot, and this unaided and with common mining implements. The report is generally accredited in the north. The daily average per man, from the best authenticated accounts in our possession, can be safely set at about one ounce. There are many who do far better this this while there are others who exceeds procure this than this, while there are others who scarcely procure this

and great numbers are at work. On the Yuba river, about fifty miles from its mouth, new washings have been recently discovered, where it is represented the miners are highly successful. On Feather river also, discoveries are reported to have been made.

Although the excessively warm weather has set in, it is

not accompanied by the amount of sickness apprehended. But very few cases are believed to exist in the Sacramento valley. It may be that the scourge of fever will be spared its chizens this season, as the winter inundations were not so severe as those of the preceding year. The heat is intense notwithstanding. At Sacramanto city the mercury ranges about mid-day, at the sweltering height of a hundred and fifteen degrees in the shade!

Provisions are plenty in the mines, and our informant states, without doubt correctly, that goods may be obtained in Sacramento eity at San Francisco prices. Business in the former place is brisk and improvement rapidly going on. Town property, which three months ago was sold for four hundred, now readily commands from ten to fifteen thousand delices.

WHAT IS TO BE DONE THEN?

When the first symptoms are felt, and before the disease takes a serious turn, the first thing to be done is to remove the morbid matter from the system, remove "the fuel to which the infection ignites," then purify the blood, strengthen and fortify the system. This, reader, is precisely the principle on which Dr. Halsey's Forest Pills and Wine act. Five or six of these mild and excellent pills taken at the commencement of the discase.
