

Canadian exporters of equipment for oil and gas exploration and development — equipment that has proven efficient throughout Canada's harsh environment, both on land and offshore. Also profiled are companies offering services such as geophysical evaluation, contract drilling and seismic studies. (English, 1987)

PAINTING AND FINISHING

Painting and Finishing Equipment and Supplies for World Markets

This book identifies Canadian products and equipment that meet a wide variety of painting and finishing requirements. The products listed range from simple paint brushes, rollers and dispensers, to complex spray booths for applying paint and undercoatings to car bodies. (English, French, 1988)

PLASTICS AND RUBBER

Canadian Plastics Processing Machinery and Equipment for World Markets

This directory lists the major Canadian manufacturers of plastics- and rubber-processing machinery, equipment and moulds. All manufacturers are experienced in serving world markets and the directory includes a handy product index to help locate suppliers that meet particular requirements. (English, French, 1988)
