

**Regulation 5***Provisions for Approval by Design Type*

1. Where the containers are to be manufactured by design type series, application made to an Administration for approval by design type shall be accompanied by drawings, a design specification of the type of container to be approved, and such other data as may be required by the Administration.
2. The applicant shall state the identification symbols which will be assigned by the manufacturer to the type of container to which the application for approval relates.
3. The application shall also be accompanied by an assurance from the manufacturer that he shall:
  - (a) produce to the Administration such containers of the design type concerned as the Administration may wish to examine;
  - (b) advise the Administration of any change in the design or specification and await its approval before affixing the Safety Approval Plate to the container;
  - (c) affix the Safety Approval Plate to each container in the design type series and to no others;
  - (d) keep a record of containers manufactured to the approved design type. This record shall at least contain the manufacturer's identification numbers, dates of delivery and names and addresses of customers to whom the containers are delivered.
4. Approval may be granted by the Administration to containers manufactured as modifications of an approved design type if the Administration is satisfied that the modifications do not affect the validity of tests conducted in the course of design type approval.
5. The Administration shall not confer on a manufacturer authority to affix Safety Approval Plates on the basis of design type approval unless satisfied that the manufacturer has instituted internal production-control features to ensure that the containers produced will conform to the approved prototype.

**Regulation 6***Examination during Production*

In order to ensure that containers of the same design type series are manufactured to the approved design, the Administration shall examine or test as many units as it considers necessary, at any stage during production of the design type series concerned.
