

dropsy, diabetes, dyspepsia and many other diseases, producing a very salutary effect. I believe them to be of infinite value.

WM. DOYLE, J. P.

Petite Nation, Sept. 23, 1848.

I declare that I have terribly suffered a long time of the rheumatism, and that since I drank some Plantagenet Water I am better.

LOUIS PLAMONDON.

Montreal, Sept., 1848.

EXTRAORDINARY CURE.

I certify that since I had the cholera, I was infirm in my limbs and hearing. I was so until I made use of the Plantagenet Waters. I had spent above £300 before I heard of those waters, for medical aid. I was taken to one of my friends near the Springs, and lived with him six weeks, during which time I washed myself with, and regularly drank of this water. When I left the springs I was perfectly cured—heard well, and am still in good health.

P. S. T. CONKEY.

Brook, Sept., 1848.

CHOLERA CURED BY THE PLANTAGENET WATERS.

I, the undersigned, wishing to give testimony in favour of the Plantagenet Waters, beg to state, that in the year 1832, I was with a number of men lumbering near those valuable and efficient springs, and that I was taken with the then prevailing disease, [cholera,] with a number of my men, who were also taken ill of the same disease. We used it, and we were perfectly cured, whilst those who were against it, died almost instantly of the prevailing disease. Moreover, we took down several barrels with us to Quebec in case of a relapse.

I remain, Sir, yours, &c.,

J. S. CAMERON.

St. Lawrence, Jan. 9, 1849.

Montreal, March 24, 1849.

I, the undersigned, hereby certify that the above certificate of Mr. J. S. Cameron, relative to the Plantagenet Mineral Waters, as being an efficient cure in cases of cholera and other sickness, is strictly true, having witnessed its use in similar cases; and moreover, in the year 1832, the fact above stated having occurred to my knowledge, I take therefore the liberty of recommending the same.

A. DORVAL, M.D., City Councillor, Quebec.
