Do you know what pressure your Boilers can safely stand
Is your Steam Gauge registering the correct pressure
Are your Water Gauges free and in good working order
Is your Safety Valve working properly

DO not trust to luck; the unexpected generally happens. Avoid the calamity of an explosion. Protect life and property by taking out one of our Inspection and Insurance Policies.

## COVERING MINERAL WOOL

## Mineral Wool Pipe and Boiler Govering

If you want to save fuel USE dry steam at long distance MINERAL WOOL to prevent condensation SECTIONAL " cold water pipes from dripping COVERING freezing

HE best non-conductor is the cheapest covering. Mineral Wool heads the list as a fire-proof non-conductor. Hard pressed coverings are poor non-conductors, and are therefore the most expensive in the end.

A good pipe covering is one of your best investments. It is false economy to have uncovered pipes, as you are just paying the coal man what the covering man should have, and only ashes to shew for it. Give the matter your consideration, it means money to you.

We also carry full lines of Asbestos Goods, and Mineral Wool for fire-proofing, deadening of sound, insulation, etc., etc. Send for Pamphlet.
