

### BARLEY ON SOD.

Variety	Date Sown	Date Cut	Days Maturing	Yield per Acre
Preston	April 10	August 21	133	39 Bush .. Lbs.
Stanley	April 10	August 21	135	33 Bush 30 Lbs.

### BARLEY ON CORN AND ROOT LAND OF 1907.

Variety	Date Sown	Date Cut	Days Maturing	Yield per Acre
Preston	April 11	August 28	139	30 Bush. 17 Lbs.
Stanley	April 11	August 28	139	27 Bush. 19 Lbs.

Maturity is shown from above results to be materially hastened:—

1. By increasing the quantities of seed used.

Note: Such increase in quantity of seed sown is not attended by decreased yields up to a certain point.

2. Where it is desired to grow wheat on soil that usually produces a crop of wheat tardy in ripening, maturity may be hastened by so planning the rotation as to seed the wheat on sod which has been plowed and worked down the previous July or August.
