

The Haunted Swing

Enshrouded in mystery, and with a sensation that one seldom experiences, the ride on the Haunted Swing is well worth the while. It is one of the forms of amusement that you never grow tired of, and to take one trip is to want another. The mysterious trip has to be taken to be appreciated. You may stand and watch the people going in and out, and if every person who has taken the ride does not wear a smile at the finish then they have little judgment of something good in the amusement line. The Haunted Swing, while new to Hamilton, was one of the big hits at the White City in Chicago last year and is being installed in all the big parks across the border this season. It is one of the harmless forms of amusement that women and children and old and young men can enjoy.

The word haunted in no way implies that there are ghosts around, but if you want to have a novel trip patronize the Haunted Swing.
