DISTILLERS AND THE CRUSADE
AGAINST CONSUMPTION.

Messrs. Hiram Walker & Sons, the
well-known distillers of Walkerville,
have again generously remembered
the need of the poor consumptives in
a very practical way, by forwarding
their annual contribution of \$100 to
the Muskoka Free Hospital for Con-
sumptives. It is not generally known
that no less than 121 consumptives are
at present in residence in that hospi-
tal and that 123 of these do not pay a
single cent towards their care. The
generous contribution of the Walker
firm, therefore, is a most valuable
aid to the "Canada's Greatest Charity," and
in view of the number of applicants
seeking admission at this time, the
help such friends as the more ap-
preciated.

March Weather
Rheumatic Weather

Victims Can Cure Themselves
With Dr. Williams' Pink Pills.

With the coming of March people who
are afflicted with rheumatism begin to
have unpleasant reminders of their
condition. The weather is changeable—
balm and springlike one day, raw, cold
and piercing the next. It is such sudden
changes of weather that set the pains
and tortures of rheumatism, lumbago
and sciatica going. But it must be
borne in mind that although weather
conditions start the pain, the trouble
is deeply rooted in the blood and can
only be cured through the blood. All the
lotions and liniments in the world can't
cure rheumatism. Rubbing may seem to
ease the pain while you are rubbing,
but there its value ends. Only through
the blood can you cure rheumatism.
That's why Dr. Williams' Pink Pills
have so many thousands of cures of
this trouble to their credit. The new
rich blood which they actually make
drives out the poisonous acid, and rheu-
matism is vanquished. Here is an ex-
ample. Mr. W. C. Douglas, Webbwood,
Ont., says: "I was attacked with in-
flammatory rheumatism, which spread
through my entire system. For two
months I was not able to go about,
and seemed to be hovering between
life and death. My joints were swollen
and my legs and arms twisted until
I expected that they would never re-
turn to their normal shape. The doctor
seemed to help me, but not to cure me.
I was told to rest one day and
worse the next. At this time a friend
strongly urged me to try Dr. Williams'
Pink Pills and I got a dozen boxes.
Soon after beginning the pills there
was a change for the better, and I con-
tinued using the pills until I was quite
well again. The swelling disappeared
from the joints. My limbs returned to
their normal shape and I feel as if
Dr. Williams' Pink Pills have saved
me from being a rheumatic cripple. I
hope my experience may prove a
helping to some other sufferer."

If you suffer from rheumatism, or
any other disease of the blood, begin
cure yourself to-day with Dr. Wil-
liams' Pink Pills. Sold by all medicine
dealers or by mail at 50 cents a box,
or six boxes for \$2.50, from Dr.
Williams' Medicine Co., Brockville, Ont.

THE WEATHER

OBSERVATORY, TORONTO, March 15.—(Island)—The depression from the south-west has since last night moved rapidly northward, accompanied by heavy snowfalls in Ontario and Quebec, and rain in the maritime provinces. Fine weather has continued in the west. Few Farm Hands

FROM ENGLAND

Arthur Hawkes Punctures Popular Fallacy That Visible Supply to Be Drawn From is Large.

Ottawa, March 15.—(Special.)—Judg-ment is a movement in England, is going to be a big shortage in farm labor this spring. Arthur Hawkes, special commissioner, who has been investigating immigration questions, who is in Ottawa to-day, does not hold out much hope of Canadian farmers getting much relief from England.

There is a mistaken idea, said Mr. Hawkes, "in regard to British farm laborers. It is the general impression that there is an unlimited supply in the old country to be secured if proper means are adopted. The agricultural population of England is comparatively limited. It is the industrial portion of the old land which is overcrowded."

Mr. Hawkes has completed his report and it will be presented to Hon. Robt. Rogers at once. In the meantime he is providing for the sending to England of a commission to secure an international prohibition of steam trawling on the Atlantic coast of Canada. The motion was moved by J. C. Tory, a government member, and seconded by J. W. Margeson, opposition.

The federal government will be memorialized to set in motion the powers of diplomacy thru the imperial government to bring about an international convention between the countries immediately concerned, (Great Britain and France) for the suppression of the said manner of trawling in the open seas.

A delegation leaves for Ottawa to interview the government on this matter.

WOULD STOP STEAM TRAWLERS

N. S. Legislature Urges International Prohibition on Atlantic Coast.

HALIFAX, March 15.—(Can. Press.)—The Nova Scotia Legislature this afternoon adopted a unanimous resolution memorializing the Dominion Government to take action to secure an international prohibition of steam trawling on the Atlantic coast of Canada. The motion was moved by J. C. Tory, a government member, and seconded by J. W. Margeson, opposition.

The federal government will be memorialized to set in motion the powers of diplomacy thru the imperial government to bring about an international convention between the countries immediately concerned, (Great Britain and France) for the suppression of the said manner of trawling in the open seas.

A delegation leaves for Ottawa to interview the government on this matter.

Public Ownership Favored

By Hamilton Labor Member

Allan Studholme Says People Should Own Railways, Telegraphs, Telephones and All Other Commodities—Spoke From 3 to 6 o'Clock Yesterday Afternoon and Again in the Evening.

Public ownership has a good friend in Allan Studholme, the labor member for East Hamilton, in the legislature. Just how the party stands on this question must be clear to all. Mr. Studholme at last night's session of the legislature, as he concluded his remarks on the budget.

"We own the waterways of the country," he declared, "and we should own the railways, telegraphs, telephones and all other public commodities."

"People are talking public ownership everywhere," he added, "and on that question the labor party is as solid as the rock of Gibraltar."

Referring to the scaffolding bill, which he has often talked of before, Mr. Studholme said all the credit for the introduction of this bill has been given to Col. Hendrie. Mr. Studholme said he had not got all the credit for it.

"Why we, in the labor councils, frame up important legislation," said he, "years before either of your parties have thought of it."

In concluding his remarks, Mr. Studholme referred to Sir James Whitney's pre-election visit to Hamilton, and the premier's statement to the effect that the member for East Hamilton never helped him in any way regarding legislation on behalf of labor.

Mr. Studholme, on the contrary, declared emphatically that he had advocated reforms on the platform and on the street corners for years. Moreover, he had voted for and worked for every bit of progressive legislation that the present government had put thru since it came into office, seven years ago.

Bread Manufacture.

To supersede the Baking Bread Act, which caused such a lot of discussion after it was introduced a session or two ago, J. A. Ellis, member for East Ontario, has introduced an amendment respecting the manufacture of bread, aiming at the abolition of the twelve-ounce loaf.

The present act provides that bread may be sold in weights of 12, 24 and 48 ounces loaves. Of these, the twelve-ounce loaf is by far the most sold throughout the province, and it is considered too small.

It is thought that the 16 ounce loaf would be much preferred by the public. The bill also provides that bread may be sold in weights of 12, 24 and 48 ounces loaves. Of these, the twelve-ounce loaf is by far the most sold throughout the province, and it is considered too small.

It is thought that the 16 ounce loaf would be much preferred by the public. The bill also provides that bread may be sold in weights of 12, 24 and 48 ounces loaves. Of these, the twelve-ounce loaf is by far the most sold throughout the province, and it is considered too small.
