

THE
Astronomical-Terrestrial Globe.

Recommended by the Highest Authorities in the
World of Science.

A Descriptive Pamphlet may be had on
Application.

This improved and scientific Instrument is being well received by educationists and persons of scientific taste. Draughtsmen and Land Surveyors alike would find it helpful in correctly charting the real form and position of any parallel of latitude from sunrise to sunset any day of the year.

Students and School Teachers alike are invited to look into this.

WILLIAMSON & CO., AGENTS, - TORONTO.
