BLUEBERRY TIME

Holiday Folk Should Pick Wild Berries by the Gallon and Make Jam to Save Butter.

It would be an impossibility under any circumstances to begin to cope with the wild fruit stores which are to be found in various parts of the Dominion, but great quantities of jam and preserves might be added to the country's larder were only been supplied to districts where wild berries are plentiful, to turn in now and make the most of their opportunities. It will cost them nothing except a little time and energy. This is one of the benefits of the wild fruit crop which belongs to whoever feels like claiming it.

The question of one of immediate interest. The wild fruit season is at its height and residents at summer resorts are asked by the Food Board to buy themselves right now in seeing what they can do about it. The prospects for small fruits in Canada this year are by no means rosy and prices are high. At the same time it is essential that jam and preserves of all kinds be made on an unprecedented scale, in order that they may be used as substitutes for butter during the winter months. The need for fats in Europe is steadily increasing. Yet there are no visible signs of supply save on this side of the Atlantic. Britain's shortage of butter as a result of the war is 209,146,784 pounds. Canada has only been supplying about 11-12 per cent of her requirements. The drain on the fat supplies will be all the heavier for the war, as there is a marked shortage of jam in the United Kingdom, the output of all the manufacturing having been commandeered for the war effort.

Instead of Butter. It is a certainty that Canadian women will be asked to use more jam and less butter during the coming winter and now is the time to make preparations for that period. The finest flavored jam in the world is that which is made from wild berries and which provides more delicious dessert on a hot day than a dish of blueberries freshly picked with-

in range of home. Untold quantities of wild fruit will go to waste despite all the effort that can be expended. This is a situation that cannot altogether be helped, but which certainly can be mitigated. The women of New Mexico undertook to market all the fruit crop in their state this year and only been supplying about 11-12 per cent of her requirements. The drain on the fat supplies will be all the heavier for the war, as there is a marked shortage of jam in the United Kingdom, the output of all the manufacturing having been commandeered for the war effort.

Military Police Get Into Trouble

Montreal Aug. 1—Three hundred military police, heavily armed, marched into St. Paul and St. Henry factory districts of Montreal this morning and proceeded to round up the available deserters under the military service act.

The day, of a small detachment of military police at the hands of upwards of one hundred frequenters of the district. A diminutive corporal had asked a burly civilian for his papers. The latter replied in French, demanding to be escorted in his own language. The corporal knew no French and was proceeding to place the civilian under arrest when the latter knocked him to the ground. This was the signal for a general uprising among the military men, and only the timely arrival of the civil police averted a serious riot.

Wade of this city, and John Wade of Waltham, Mass.; two sisters, Mrs. Rowland of St. Andrews and Mrs. John P. Coughlin of this city.

The death of Miss Agnes B. Wade of St. Andrews occurred on August 1 at the home of her sister, Mrs. John P. Coughlin, 105 St. James street, West St. John. She leaves three brothers, Dr. J. A. Wade, St. Andrews; Charles Wade of this city, and John Wade of Waltham, Mass.; two sisters, Mrs. Rowland of St. Andrews and Mrs. John P. Coughlin of this city.
