

VALLEY RAILWAY AND OTHER IMPORTANT MATTERS IN PROVINCIAL LEGISLATURE

Fredericton, March 15—The house met at 3 o'clock. Hon. Mr. McLeod submitted the annual report of the factory inspector, which he said would be printed for distribution within a few days.

Mr. Upland gave notice of inquiry as to appointments to auditor-general's department. Hon. Mr. McLeod presented a petition in favor of a bill to amend the act respecting the union of Baptist churches in New Brunswick.

THE CROWN OF WOMANHOOD

"Uncared-for-hair cannot be beautiful. There is no part of the human make-up so revealing as the hair. It cries out: Look at me, or I will disgrace you! Treat me with consideration and I will be a glory to you."

With the above words Lillian Russell, an unquestioned authority on feminine attractiveness, places no uncertain value on nice hair as a beauty asset. Unkept, uncared-for-hair not only cannot be attractive but is actually a disgrace.

But why have ill-kept, untidy hair? By devoting a few moments regularly to brushing and intelligent application of NEWBRO'S HERPICIDE, the hair may be made to yield wonderful returns in increased personal charm.

Dandruff, which is due to a germ or microbe, is the direct cause of more hair trouble than anything else. The hair becomes thin, harsh, uneven and falls out in quantities. It looks dead and lifeless; there is no lustre. The scalp itches.

HERPICIDE will destroy this dandruff germ that is causing all the trouble, cleans the scalp, gives the hair life, sun and luxuriance. The hair stops coming out, the itching ceases almost at once and withal there is a most gratifying sense of cleanliness.

To the woman who wishes to make the most of nature's gifts by having fluffy beautiful hair, NEWBRO'S HERPICIDE is a toilet necessity. It is exquisitely perfumed and is a delightful hair-dressing.

The large size bottle sold and guaranteed everywhere. Applications at the better Barber Shops and Hair-Dressing Parlors. Send for sample bottle.

ordinary places of business and would not prevent children from delivering messages or parcels. Mr. Hatheway said that the act had been promoted by some of the labor societies in St. John while others had endorsed it. He did not think that it would apply to the retail trade.

Hon. Mr. Maxwell thought that the hon. member from Restigouche had raised a serious objection as the bill provided that no child under fourteen years of age should even run errands during school hours. In many cases these boys assisted materially to support a family and he thought it an injustice to prevent any boy from earning wages. The object of the legislation was to prevent boys from working in factories on account of their being exposed to injury.

Mr. Copp said that under the factory act it was compulsory for children to go to school a certain number of days during the term. When they are not at school why should they not be allowed to work? He knew of a number of cases where boys had been under the act and he thought later gave them opportunity to complete their education.

Mr. Byrnes thought that children should receive an education until they had reached a certain age. The child's interests should be protected. Mr. Baxter suggested that section 3 of the original act giving the inspector discretionary powers should be preserved.

Hon. Mr. Fleming said that the bill, as proposed, did not give the inspector discretionary powers and as this was absolutely essential in the working out of the act provision should be made to have it inserted. Mr. Sweeney said that it would be better, in his opinion, to have the court decide whether circumstances would warrant that children under age should work.

Hon. Mr. Grimmer thought that every effort should be made to protect children. There might be many cases where children's work was needed, but there were also many cases where children were allowed to work under circumstances that were not justified. There were no places so absolutely dangerous to the more welfare and health of children as factories. So far as the discretionary powers of the inspector were concerned he had no objection to refuse to grant the application of children to work if it were absolutely necessary. He had seen children working at factories in his own town who he realized should be at school. He would do anything in his power to have the legislation which would serve to change these conditions. Under the circumstances he felt that the bill should be allowed to pass on consideration of the bill. The committee reported progress.

St. John Valley Road. The bill to amend act to aid the construction of the St. John Valley Railway was then taken up. Hon. Mr. Fleming, in reply to Mr. Beaudry, said that the exact sites for bridges had not yet been determined but that bridges would be constructed at the most advantageous points and the act which would be introduced to provide for the construction of bridges would have to be sufficiently elastic to allow for the selection of the best sites.

Mr. Wood said that he was sorry that the bill to amend the act to aid the construction of the St. John Valley Railway was not yet introduced. He had seen children working at factories in his own town who he realized should be at school. He would do anything in his power to have the legislation which would serve to change these conditions. Under the circumstances he felt that the bill should be allowed to pass on consideration of the bill. The committee reported progress.

Mr. Burgess said that the premier at Grand Falls had told the hon. member that the Grand Falls would not go into the town of Grand Falls but that the Valley railway would go right into the town. Now, the hon. premier tells the house that he doesn't know whether the road will be able to go into Grand Falls or not on account of some engineering difficulties.

and was the policy that his honorable friends had strenuously opposed. Hon. Mr. McLeod's first proposition to build an electric road and on general principles absolutely no safeguard to the province's interests were included in that policy. Finally the uselessness of the electric road project and the forcible opposition to it throughout the country forced the government to abandon that policy and to come back to the policy of the honorable member on the side of the house.

Mr. Tweeddale said that the question was one of such moment that it should be considered above politics and purely from a business standpoint. He was pleased that at last his honorable friend had come down to the adoption of the policy of the opposition. Hon. Mr. McLeod stated that it must occur as rather strange to the honorable members that if the proposition to construct the railway was absolutely the proposition of the opposition that there should be such strenuous opposition put forward by an opposition member.

Mr. Upland said that the section of the bill which provided for the construction of the road from St. John to Grand Falls was exactly the policy inaugurated by the opposition and he would like to know what caused a change of mind to come over the government and make them adopt the opposition policy. Committee decided to report progress. Hon. Mr. Fleming moved that the time for acceptance of private bills be extended to Saturday, March 23. At 6:15 p. m. the house adjourned until Monday afternoon at 3 o'clock.

IN FEAR OF CONSUMPTION. To be entirely cured of a cold which threatened to become consumption naturally makes one think well of the treatment which helped to effect the cure. In a letter just received from Mrs. Edson Brock, Drentham, Que., the writer says: "I wish to tell you that I have used Dr. Chase's medicine with great success. I took a very bad cold and could not get rid of the cough. I felt so bad that I really thought I was going into consumption. I got well by using Dr. Chase's Syrup of Linseed and Turpentine. Dr. Chase's Kidney-Liver Pills also did me a lot of good. You may publish this if you wish, for many people already know what great good Dr. Chase's medicine have done me."
