

CLINICAL MEDICINE.

J. BRADFORD McCONNELL, M.D., LECTURER.

CLINICAL SURGERY.

FRANK R. ENGLAND, M.D., LECTURER.

Daily clinics will be given in the above subjects and one or more lectures weekly at the Western Hospital. Ample opportunity will be afforded here for the reporting of cases, surgical dressing, and practice in Clinical Chemistry and Microscopy; but owing to lack of the required number of beds at present in the Western Hospital, in addition to the above, students of this University are required to attend the Clinical Courses, Autopsies and other Hospital work at the Montreal General, Royal Victoria, or Hotel Dieu Hospitals, where our students receive the same attention, and are accorded the same privileges as those from other teaching bodies, but the pass examinations will be conducted by the above Lecturers at the Western Hospital.

Books Recommended — Vierordt's Medical Diagnosis, Wethered's Medical Microscopy, Purdy's Practical Urinalysis and Urinary Diagnosis.

Heath's Guide to Surgical Diagnosis and the text books recommended in the Course on Surgery.

CLINICAL GYNAECOLOGY.

PROFESSOR LAPHORN SMITH.

At the Montreal Dispensary, every Monday and Thursday, at 3 p.m.

During the summer, students of the third and fourth years will be taught bi-manual examination and minor gynæcological operations, as well as other methods of treatment; two students being taken in turn each day. Every Saturday, at 10 a.m., from April to October, major operations will be performed in their presence at the Western Hospital, and clinical lectures given on the cases.
