SAWDUST AND FISH LIFE. Final Report by Professor A. P. Knight, Queen's University, Kingston, Ont.

SIX

The following concludes my report upon the effects of sawdust on fish life. The work was begun at the Dominion biological station, St. Andrews, in 1900, continued at the biological laboratory of Queen's University during the sum-mers of 1901 and 1902, and concluded during the summer of 1994 by a serier

during the summer of 1904, by a series of observations which were made in tidal waters at different points along
