43 2502 increase this year. MONTREAL, Nov. 26th — Public attention has, in fact, at last been turn d in the right direction ; and in instead of wasting their energies in political squabbles, public mon now see the nocessity of doing something for the real and perment advance-ment of the Province. It is foll that if we would compete. As we must do, with other countries, we should be at least equal with them in improve-ments, that if they have railroads and magnetic telegraphe to assit commerce, we want them also; and that if they have been able by combination to overcome matural obstacles, we, may, too, by amploying the same means, be just as successful as they have been. No ober, issue to watered desirable by the interested Thas been considered desirable by the interested parties that the character of the agent employed by them, should not be at this time announced; but it may be stated that it has been made known to those gentlemen who have had occasion to avail them-

gentlemen who have had occasion to avail mour-colves of it. I will add, in conclusion, a few remarks upon a shall wanting of this invention as regards the

they have been. Nor is this spirit confined to one locality. We find it manifesting itself in every quarter of the Brovince by associations seeking either to develope the natural wealth of the Colony, or to facilitate the transport of the products of other constrict and Theorem the products of other constrict and one will deny that he who benefits the world The will deay that he who benefits the world receive from it an equivalent. The only in c of what have related the equivalent between to the tend the transport of the products of other countries to the transport of the products of other countries to be obtained appropriated by the world, or leviced the transport of the tend there is no sign of despondency. For any explorate reasons, discoveries in high there been usually rewarded indirectly by the product appropriated for the primote. The section is that of philamhropy, have an effect of the tend, there is no sign of despondency. The section is that of philamhropy, have an effect of the primote of the tend there is no sign of despondency. The section is that of philamhropy, have an effect of the philamhropy have an effect of the philamhropy have and to the application of the set year. The section soften the set of an agont supplies the despondency. There are product to the set of the globe. Not can we bring ourselves readily to believe that she will coment to have degra whoch I endermost to have been more the other application of the set year. It is capable of abore; and can readily be the comen and the application of the set year.

All be restricted to responsible restrait fields is the waschawical art of whose processes we by con-it protected by patent regim. It is reference to this are, that the curred. We understrain, silvendy, in has ceded its use to the Mana-Wangith, and that his intentions with regard to the underst the numbe for pathicity of the pro-ps with the silvent to thome was are foremule for pathicity of the pro-ps with the offered to theme was are foremule for what now promines important discoverses of the spe. parameters importance.
