QUARTERLY REPORT ENDING JUNE 30th, 1945, ON SHUBENACADIE AGENCY

XX

XX

XX

Since beginning this Report, our sawyer has arrived and is busy getting the mill in shape, with the expectation of starting to saw tomorrow. This should curtail our lumber shortage within a few days. Getting the mill in shape includes the installation of a new dog on the carriage, which will save re-sawing of 2 inch plank. Formerly it was necessary that the last piece of log to be sawn into a plank of 2 inch thickness and consequently we had a surplus of this lumber that required re-sawing before being of any use to us. However this piece of machinery will overcome this handicap.
