Long List of Copper Mines **Now Consolidated** at Phoenix

Area Involved Comprsies Over 200 Acres and Includes Valuable Mineral Territory-Details of Deal

(Special to The Daily News) Phoenix, Aug. 24.-A short time since announcement was made that a consolidation of several important mining cluding the War Eagle group, the new corporation to be called the Phoenix Amaigamated Copper Mines, Ltd. In-formation has now been received here that the consolidation has been carried into effect and takes in the War Eagle, Red Rock, Lulu, Bald Eagle, Dandy Fraction, Missing Link No. 2, Pinhook and World's Fair Fraction, contiguous claims, that immediately adjoin the Granby Consolidated group on the south. The area of the properties is 210.30 acres, and comprises mineral territory that is favorably thought of by many who are familiar with the

The Phoenix Amlagamated Copper Mines, Ltd., has been incorporated under the laws of British Columbia, with a capital of \$5,000,000, having 500,000 shares of \$10 par value each. Of this number 200,000 shares have been placed in the treasury of the company, the excutive office of which is at Sherbrooke, Que., and the mine office at Phoenix.

The first board of directors of the

new company is as follows: N. P. Buck, C. H. Fletcher and C. A. French, of Sherbrooke, Quebee; George Vandyke, Boston; H. P. Buck, New York; W. J. C. Wakefild, Spokane, Wash.; George R. Naden, Greenwood; Charles Riordan, St. Naden, Greenwood; Charles Actionals, Catherines, Ont.; R. Bence Jones, Lisseian, Clonakilty, Ireland. The officers are F. P. Buck, president; C. H. Fletcher, vice-president; A. F. Fraser, secretary.

The work done so far is largely on the

War Eagle, one of the original locations war magie, one of the original locations of this camp, which mine has a good machinery plant and mine buildings, used when the property was being operated several years ago. It has a working shaft 100 feet deep, with considerable drifting at this level. The location of the War Eagle is said to cover the Old Ironsides and Knob Hill veins, and what is supposed to be the Victoria vein, Granby properties. The outcrops on the surface are large, and in appearance identical with the Granby outcrops. The values are low like others in this camp, yielding from one-half to three per cent copper, and from \$1 to \$4 in gold per ton. In the workings of the property, in the raise from the 100 foot east crosscut, some of the best values were encountered, assays giving \$21 in copper and \$1 in gold per ton. Less work has been done on the Red Rock, Lulu and Bald Eagle than on the War Eagle,

ing a continuance of the large veins of the War Eagle, common to this camp. The properties of the company are wen studied for economic mining by the quarrying system, while tunnels and shafts will also be used. Either of the two railways, it is stated, are ready to build spurs to the property, when ship-

but the veins are strong and the claims,

considered of great potential value, hav-

ments are ready.

F. P. Buck, president of the Phoenix Amalgamated, has been interested in this camp for many years. He was one of the organizers and president of the Knob Hill Gold Mining Co., one of the companies which were afterwards merged into the present Granby Consolidate but disposed of his interests and formed the War Eagle, Red Rock and Bald Eagle companies. For a year or two the War Eagle was operated, about 1900, but present. The Sherbrooke and other men associated with Mr. Buck are gentlemen of standing and responsibility, and they propose to give the properties is expected to arrive in the Bou some time in September, when arrange-ments are to be made for the starting of active work on the group.

This gentleman, Mr. Yip Sang, is a pioneer resident of the city and a busi-ness man of unqualified good standing. He is the head of the well known Chin-ese firm of Wing, Sang & Wo. He was asked directly if he knew that the Chin-ese had purchased a controlling interest in a well known British Colum-bia newspaper. He said that he knew of it.

(Special to The Pally News) Ottawa, Aug. 24.—A call has gone out for an urgent meeting of the Canadian cabinet at Ottawa next week, and a number of ministers who were out of town have been recalled from their vacations. Speculation associates the meeting with the present visit of sir Mortimer Durand to Quebec, where he met earl Grey and sir Wilfrid Laurier. It is known that the British government and sir Mortimer himself are axious to settle United States, and it is conjectured that the ambassador may have submitted to the government and earl Grey a propo-

sition for an amicable adjustment of outstanding questions on the lines of the joint high commission of 1896.

The report, however, cannot be confirmed until sir Wilfrid Laurier, who is at his country home in Arthabaskarille, returns to the city.

Were it not for his steady nerve, presence of mind and trusty rifle, Mr. Anders, the well known Arrow lake rancher who lives just above Fire Valley, would not be in the land of the living today. Lying behind a log, intently watching for the approach of two marauding deer, he was attracted by a noise behind him and, turning his head, found his blood run cold as he caught a glimpse of three panthers, crouching within twenty feet, and apparently ready to spring. As quick as a flash, Mr. Anders threw his magazine rifle to his shoulder, pulled the trigger thrice, and had the satisfaction of seeing two of the brutes roll over dead of seeing two of the brutes roll over dead while the third sprang away into the bush: It was not until next day that he discovered that it too, had been killed, its strength after receiving the fatal wound only sufficing to carry it out of

He took up a secluded position behind a sheltering log, and settled down to await the coming of the deer—little dreaming of the dramatic ending his nocturnal hunting trip was to have. The night was wearing on and Mr. Anders possessed also soul in patience and listened with keen ears for the first sound that would warn him of the approach of his intended prey. His concentration was finally rewarded,—but not as he expected. Hearing a sound behind, he glanced around carelessly, only to be transfixed by the steady gaze of unree pair of gleaning eyes. What his thoughts were when he finally found the mountain lions so close to him and apparently so intent upon making a useal of his fiesh, need not be the subject of any serious debate, for he acted so promptly that his brain had litle time to pay atention to anything besides the stern business in hand. DOMINION COPPER CO. READY FOR CALL ON GLOUCESTER GROUP

S PURSUING ENERGETIC DEVELOP MENT POLICY AT PHOENIX

(Special to The Daily News)
Grand Forks, Aug. 24—An event of some importance took place yesterday when the Dominion Copper company deposited in the bank the first payment of \$3000 due on the bond taken, on the Gloucester group of claims in Franklin camp. As is well known the Dominion Copper company is pursuing an energetic policy in the development of its Phoenix properties, and will shortly be smelting 1200 tons a day at the Boundary Falls reduction works. Like all Boundary companies the Dominion Copper Boundary Falls reduction works. Like all Boundary companies the Dominion Copper people are on the lookout for good fluxing ores, and the Franklin camp, when once values at depth are proved, offers a highly promising field in this respect. The Gloucester group was located in 1898 by T. Newby, H. Garnett and L. Merson. It consists of four claims, the Gloucester, the G.H., the Ophir and the G.H. fraction. Development work was confined practically to the Gloucester claim on which a shaft

of some 50 feet in depth was sunk, disclos-ing a fine grade of copper ore in the form of chalcopyrite, running from 7 to 10 per cent copper. A tunnel was then driven 255 feet with the intention of striking the ore at depth. This was how matters stood at the close of the war.

at depth. This was how matters stood at the close of the year.

In February of this year the group was bonded to George A. Macleod, who subsequently turned over the bond to the B.C. Copper company of Greenwood. The latter company, however, allowed the time limit for the first payment to expire and in May last Thomas Newby and his associates bonded the group to the Dominion Copper company for \$110,000. Early this year a series of open cuts have disclosed other good copper showings. After examining the property thoroughly T. R. Mr. Wilson says in Milwaukee, Aug. 14-20. Mr. Wilson says the convention was the most successful and most largely attended one ever held by the order. There were 1200 delegates present, representing Canada, Alaska and every state in the union. The whole city was elaborately decorated in honor of the occasion and the speakers who made the chief addresses were very able and eloquent. At a fair estimate there were 2500 Eagles in line in the monster procession.

He issued orders today to public printer Stillings that hereafter all messages from the president and all other documents emanating from the White House shall be printed in accordance with the recommendation of the spelling reform committee, headed by Brander Matthews, professor of English in Columbia university.

This committee has published a list of words in which the spelling is reformed. The list contains such words as "thru" and "tho" as the spelling for "through" and "though." The president's official sanction of this reform movement is regarded as the most effective and speedlest method of inaugurating the new system of spelling throughout the United States.
