

small, with 7 Fathom Water; the Ground is bad, and lies entirely exposed to the S. W. Winds, which heave in a very great Sea.

**Long Island.** From *Point Latina* to the South Point of *Long Island* the Course is N. by W.  $\frac{1}{2}$  W. 4  $\frac{1}{2}$  Leagues; this Island is near 3 Leagues long. in high Land, the South Point being remarkable high steep Rocks. On the East Side of the Island, about one League from the South Point lies *Harbour Buffet*; a tolerable good Harbour; the Entrance into it is narrow, but hath 13 Fathom Water in it. There are two Arms in this Harbour, one running to the Westward, the other to the Northward; the best Anchorage is in the North Arm, in about 15 Fathom Water. This Harbour may be known by the Islands that lie in the Mouth and to the Southward of it, and by *Harbour Buffet* Island, that lies ENE.  $\frac{1}{2}$  E. 1 Mile from the Entrance. To sail into it, you must pass to the Northward of the Islands in the Mouth.

**Muscle Harbour.** About 4 Miles from the South Point of *Long Island*, on the West Side, lieth *Muscle Harbour*; Vessels bound for this Harbour may pass between *Long Island* and *Barren Island*, which is a high barren Island about one Mile long, and about  $\frac{1}{2}$  of a Mile from *Long Island*. The Entrance into the Harbour lies opposite the North End of *Barren Island*, and is between a low green Point on your Starboard Hand, and a small Island on your Larboard Hand; this Harbour is near 2 Miles long, and one broad; in it is from 10 to 22 Fathoms Water, rocky Bottom.

**Little South Harbour.** *Little South Harbour* lies one Mile to the Westward of *Little Harbour*; before the Mouth of it are several rocky Islands: in sailing into the Harbour you must leave all the Islands on your Starboard Hand except one, on either Side of which is a safe Passage of 15 Fathom Water. On the East Shore within the Islands is a sunken Rock about one Cable's Length from the Shore, which generally breaks: nearly opposite to the West Shore are some Rocks about half a Cable's Length from the Shore, that shew at  $\frac{1}{2}$  Ebb. This Harbour is about  $1\frac{1}{2}$  Mile long, near  $\frac{1}{2}$  Mile wide, with 7 Fathom Water, good Bottom.

**Great South Harbour.** *Great South Harbour* lies about one Mile to the Northward of *Little South Harbour*; there is no Danger in sailing into it; near the Head is very good Anchorage in 6 or 7 Fathoms Water.

**Isle au Bourdeaux.** One Mile to the Westward of *Great South Harbour* is *Isle au Bourdeaux*, a high round Island near the Main.

**Come by Chance.** The Entrance into *Come by Chance* lies North 4 Miles from *Isle au Bourdeaux*, and runs up NE. by N. 3 Miles: in it is from 20 to 3 Fathom Water, sandy Bottom, is intirely exposed to the SW. Winds, which heave in a very great Swell.

**North Harbour.** *North Harbour* is NW.  $2\frac{1}{2}$  Miles from *Come by Chance*, and SE. by E.  $2\frac{1}{2}$  Miles from *Piper's Hole*; about 2 Miles from the Entrance is good Anchorage in 7 Fathom Water, and no Danger sailing into it.
