The Crops and Live Stock of Canada

Ottawa, July 12. The Census and Statistics Office today reports on the condition of field crops and the number and condition of farm animals of the Dominion at June 30. For the three years 1908-1910 the field crops range in condition from 82.16 for spring wheat to 91.42 for hay and clover this year to 80 for spring wheat and 82 for rye and peas in 1908. Fall wheat is 85.47 this year compared with 77.28 in 1909 and 89 in 1908. Oats was 90 in 1908 and 93.81 in 1909, and this year it is 86.29. Peas is 86.94 this year; last year it was 84.40 and in the previous year 82. The condition of mixed grains is nearly the same, being 84.53 this year, 86.58 last year and 84 in 1908. Hay and clover is better this year than in either of the previous years, being 91.42 compared with 76 in 1909 and 87 in 1908. The condition of alfalfa has been recorded this year for the first time and its average is 88.94. Pasture has a condition of 89.02 this year, compared with 99 in 1908 and 87.74 last year. The conditions of all field crops are good in Ontario, the highest being 94.29 for fall wheat and the lowest 84.79 for spring wheat. Quebec crops range from 74.45 for mixed grains to 102.58 for hay and clover. Peas is 84.42 and its condition is the next above mixed grains. In Prince Edward Island and Nova Scotia all field crops are reported for a condition above 90 except alfalfa, which is 83.33 in the Island. Hay and clover are 104.31 in the Island and 105.79 in Nova Scotia. Wheat, oats, mixed grains and alfalfa are reported in a condition above 90 in New Brunswick, and all other crops between 83 and 89 except alfalfa, which is 97. Hay and clover are reported at 109.68. Manitoba, Saskatchewan and Alberta have low averages throughout owing to a light rainfall in June. The general condition of crops in Manitoba is much below the average. Correspondents in nearly every district report no rains—only a few light showers and hot dry winds that absorbed the moisture and withered the crops. The lowest average condition is reported from around Brandon and Morden, and the highest from Marquette where it is placed at a standard. In Saskatchewan the crops do not appear to have suffered from climatic conditions to the same extent as in either Manitoba or Alberta, as there have been many local showers. The reports from Lloydminster, Battleford, Indian Head and Qu'Appelle are very favorable, the condition of wheat being placed at 100 and over. The prevailing condition of crops in that part of Alberta south of townships No. 30 is below the average in consequence of drought and hot winds. In the Edmonton district the grains, although suffering to some extent from the same causes, are in much better condition.

PUMPING WATER

for Stock uses Time and Strength. Both are worth Money and can be Saved by the use of a . . .

CANADIAN AIRMOTOR
OR A
STICKNEY GASOLINE ENGINE.

See them before you buy as THE BEST IS THE CHEAPEST in the long run. PUMPS, TANKS, TROUGHS. Everything in Water Supply for the Farmer. Also "FLOUR CITY" GAS TRACTORS FOR PLOWING & THRESHING. **ONTARIO WIND ENGINE & Pump Co., Ltd.** WINNIPEG - CALGARY.
