THE BISHOP STRACHAN SCHOOL FOR YOUNG LADIES.

President.—The Lord Bishop of Toronto.

This School offers a liberal Education at a rate sufficient only to cover the necessary expenditure, the best teaching being secured in every department. The only extras are Music, Painting, and Dancing, which, open to all are the Languages, (English, Latin, French and German,) the Mathematics, Natural Sciences, Drawing, Needlework, Calligraphy, and Vocal Music in Class. Special attention is given to the English Language and Literature, and to English Composition.

The Building possesses great advantages in size and situation, the arrangement for the health and comfort of the inmates are perfect, and the grounds spacious and well-kept.

The Lady Principal and her Assistants earnestly desire the happiness and well-being of their pupils, and strive to keep constantly before them the highest motives for exertion and self-discipline, being anxious to make them not only educated and refined, but conscientious and Christian women.

The School re-opens after vacation on JANUARY 14, when pupils may be admitted for the remainder of the Term. LENT TERM begins FEBRUARY 11.

Fees, per Term, \$6 to \$18. Additional for boarders, \$45.
Apply for admission and information to MISS GRIER, LADY PRINCIPAL, Wykeham Hall, Toronto.

SAVE YOUR COAL.

J. W. ELLIOTT'S

—PATENT—

Saver Hall Stove.

The advantages gained over all other stoves

are, it produces the greatest amount of heat from

a given amount of fuel: this is accomplished by

the flue pipe, which is bent down, around and

underneath the base. Another object is to secure

the greatest possible benefit of the fire, which

consists in placing around the body of the stove

a series of internally projecting pockets over-

lapping the fire pot, and so formed that the air

of the room is admitted into the lower end of the

pockets, and after passing through them, re-

enters the room, having become intensely heated

through contact with the inner sides of the said

pockets, which are immediately over the hottest

part of the fire, thereby producing far greater

results from a GIVEN AMOUNT OF FUEL THAN ANY

OTHER STOVE.

An Evaporator which is part of the Stove.

The cover is a water tank, and becomes an

effective evaporator, which produces a greater

or less amount of vapor in proportion to the in-

tensity of heat.

There is a double heater, by means of which

heat can be conveyed to any apartment above,

and supplied with sufficient vapor from the tank.

Also a combined hot air and steam bath is made

if desired.

It is Simple and Easy to Control.

All hinged doors are abandoned, the mica lights

can be removed, cleaned and replaced without

burning one's fingers.

The base plate is of cast iron, in the place of

zinc or other perishable materials, and is raised

sufficient for the cold air on the floor to pass up

through its raised and hollow cone-shape to the

stove, and the circulation produced thereby

equalizes the temperature of the room.

There are two grates similar to the base of a

circular basket. They can be rotated together or

separately.

The fire can always be re-lighted without re-

moving the coal. No screening or sieving, and

no waste whatever.

For further information, apply to
