This cut shows an up-to-date Barn Construction, 40 feet x 70 feet, and the method of covering with Corrugated Sheets. The framework is light, as the corrugated sheets, when nailed in place, make the building very rigid. This drawing is made from actual plans and the barn has been built many times with splendid results.

The saving of wood sheathing, as compared with the ordinary barn construction, will cover the difference in cost between wooden shingles and our "Acorn Quality" Corrugated Galvanized Sheets.

This galvanized covering protects your building from lightning, prevents fires from the outside, and is easily and cheaply applied.

**OUTLASTS A GENERATION.**

Do not make a mistake and put up an old style barn, when you can secure a better and more durable construction for less money.

See the page of barn descriptions in our new catalogue, and write for our book of testimonials and list of users.
