CEMENTING A WOODEN TANK

I repaired an old wooden tank with
cement. A piece of woven wire was
placed inside and stapled loosely so
that it stood out from the wood about
an inch. Then I plastered with two
coats of rich cement. The wire held
the first coat and made it possible to
stick the cement to the wood. After
the second coat had dried I washed it
thoroughly with pure cement. My tank
doesn't leak now, and it only cost me
\$3.50 to repair it.—Neb. Farmer.

We Can Sell Livestock Horses - Cattle - Sheep - Swine

The Guide's Farmers' Market Place has a separate division for each of the above classes of livestock. If you have one or more breeding animals of good class for sale or young stock to dispose of this department can help you find the best market. We are doing it every week for others, why not for you?

The Guide's "Farmers' Market Place" is planned so as to co-operate with the readers in affording them an economical opening to wider markets. A glance at this page will show the many departments into which it is divided. This affords the prospective buyer a quick method of referring to the section in which he will find offerings in the line he intends to buy. Naturally he will look over all the advertisements in that particular section before making his choice. This means that every advertisement will be read by every prospective buyer. This is the strong advantage of this classified section.

Advertising rates are given at the top of this page. Send in your order now accompanied by the amount for the number of times you wish your ad. to run, and let The Guide demonstrate to you, as it has to hundreds of other farmers, how it can sell.
