

AUTO SPARE PARTS
For most makes and models of cars. Repair old, broken or worn-out parts replaced. Write or wire us describing what you want. We carry the largest and most complete stock in Canada of slightly used or new parts and automobile equipment. We ship C.O.D. anywhere in Canada. Satisfaction or refund in full our motto. **Shaw's Auto Salvage Part Supply, 223-221 Danforth St., Toronto, Ont.**

24,000 Miles of Tree-Lined Roads.

Many of us trudged up and down the tree-lined roads of France during the war, says the London Chronicle. All the national roads, to the extent of 24,000 miles, are lined with trees planted and cared for by the Government.
Four centuries ago Francis I. started the good work with a batch of Lombardy poplars, and it has ever since been carried on, despite all political upheavals.
The Ministry of Public Works has now more than 3,000,000 trees under its control. When the road is between ten and sixteen metres in width one row of trees is set out on each side. When the width is over sixteen metres two rows are planted, with a foot path between them.
Tree-planting is given out in small contracts to local men, who receive a lump sum as soon as the trees are planted and the balance at the end of two years.
During that period the contractor is responsible for the care of the trees, and for replacing any that die or prove defective.

Overgrazing will ruin the best of pastures.
The halibut is the largest of the fish family.
Minard's Liniment Relieves Distemper

Spiders Aid Astronomers.
To give fine lines by which to measure the relative position of the stars, astronomers use the threads spun by the garden spider. For a century they used silver wire drawn as thin as possible; then the finest of hairs, and the silk threads of the silkworm's cocoon. Finally, an English telescope-maker discovered that a spider's web is three or four times smaller than the thread of a silkworm, and is, at the same time, stronger. Spiders are carefully placed on tiny racks, and when they begin to spin, the thread is fastened to a winder, which is turned till the desired length is spun.

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel troubles, or if the trouble comes suddenly—as it generally does—the Tablets will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Russia is the only great gold-producing country in Europe.
Potato-blight usually follows a period of prolonged wet weather.
A charter-party is the document involved in the hiring of a whole ship in one contract.

FASHIONABLE MODELS

9298—Ladies' Dress (two styles of sleeve; four-piece skirt, with or without side panniers; inseep or shorter length). Price, 25 cents. In 3 sizes, 34 to 48 ins. bust measure. Size 36 requires 4 1/2 yds. 40 ins. wide. Width, 1 1/2 yds.
9610—Ladies' Waist (two styles of sleeve). Price, 25 cents. In 8 sizes, 34 to 48 ins. bust measure. Size 36 requires, with long sleeves, 2 1/2 yds. 36 ins. wide, or 2 yds. 45 ins. wide.
These patterns may be obtained from your local McCall dealer, or from The McCall Co., 70 Bond Street, Toronto, Dept. W.

WHY BEAUTY FADES

A Condition Due Entirely to Poor, Watery Blood.

The girl who returns home from school or from work thoroughly tired out will be fortunate if she escapes a physical breakdown, because this getting tired so easily is probably the first warning symptom of a thinning blood that must not be disregarded if her health is to be preserved.
When the blood becomes thin and impure the patient becomes pale, haggard and angular. She not only tires out easily but suffers from headaches, palpitation of the heart, dizzy spells and a loss of appetite. This condition will go from bad to worse, if prompt steps are not taken to increase and enrich the blood supply. To make the rich, red blood that brings the glow of health, no other medicine can equal Dr. Williams' Pink Pills. If given a fair trial their use brings rosy cheeks, bright eyes, a good appetite and good spirits. Dr. Williams' Pink Pills have made thousands of pale, languid girls active and strong. On the first sign of poor, thin blood mothers should insist upon their daughters taking a fair course of these pills. They will not only restore health, but will save further doctor bills.
Dr. Williams' Pink Pills can be obtained from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Britain Profits Through War Materials.

Lord Inverforth, formerly Surveyor General of Supplies in the British War Office, by world-wide purchases of raw materials on behalf of the government, was able to turn into the British treasury on March 1 last \$25,000,000, representing profits on all transactions since 1914, according to his report recently made to the Ministry of Munitions, says a London despatch.
While the profits were large, Sir Arthur Goldfinch, Director General of War Materials, points out that the economic benefits were far greater. The raw materials obtained were largely used in the manufacture of military equipment with a direct saving estimated at more than \$500,000,000. The purchases were of wool, hides, leather, flax, hemp and similar materials.
Insurance, generously taken out, served to more than make up losses from submarine warfare, it was stated. The record of Lord Inverforth's activities is in contrast with results obtained by similar departments in other Allied countries. Among the purchases were nearly 24,000,000 pounds of American sole leather and \$2,000,000 feet of American upper leather.
Included in the chief items of textile and leather equipment for the army and navy, air force and other branches of the public service and for the Allies from August 4, 1914, to March 31, 1919, were 61,899,626 pairs of boots, 81,538,000 yards of cotton drill, 60,917,000 yards of khaki, 16,259,000 ground sheets, 1,186,000,000 sand bags, 49,508,665 blankets, 23,776,345 jackets, 164,314,787 pairs of socks and 20,190,810 pairs of woolen gloves.
Contracts made with British manufacturers for the goods afforded them a larger profit than they made for similar work in pre-war days, it was said, and served to speed up production.

Bolshevism a Social Disease.

Bolshevism cannot be kept out of any country, because it is an idea, and ideas cannot be stopped at frontier barriers, says the London Daily Telegraph. "There is Bolshevism in our own country and plenty of it, but it is held in subjection by the commonsense of the mass of our people. It is folly to think that it can be defeated by a mere attempt to the discredited method of human slaughter."

SUMMER ASTHMA—HAY FEVER

—sleepless nights, constant sneezing, streaming eyes, wheezy breathing:—**RAZ-MAH** brings relief. Put up in capsules, easily swallowed. Sold by reliable druggists for a dollar. Ask our agents or send card for free sample to Templeton's, 142 King St. W., Toronto.

Costly Carpets.

The deal by which England secured control of the Persian carpet and rug industry is a good one for this country—that is, if the Bolsheviks do not overrun the land of the Shahs, says an English writer.
The genuine Persian rug is the most valuable thing of its kind in the world, a really fine specimen fetching anything from twenty-five dollars to one hundred thousand dollars. Shiraz and Kerman are the chief centres of the industry, though the products of Meshed and Rejd are also held in high esteem.
The trade is largely in the hands of certain families, who have handed down the art and its secrets from one generation to another. To the making of even one comparatively small rug, ten or fifteen years of patient labor may be devoted.

In the reign of Muzaffer-Din, however, this great and beautiful industry was threatened with extinction. This was when the aniline dyes of Germany burst upon an astonished world. These "split-your-eyeball" chemical products—German-made rugs—found their way to Persia, and, incredible though it may seem, the beauty-loving natives took kindly to them, and in their favor the weavers abandoned the dyes that had been in use for thousands of years, and copied the appalling Hun designs.
Fortunately, the Shah had an artist's soul, and was also a good business man. He saw that his country's carpet export trade was in imminent danger of being ruined by these aniline atrocities, and, under appropriate penalties—banning oil, and so forth—he forbade the importation of the German dyes, or their use if already in the country, in the carpet trade.

To this day, however, the traveller may see in the Persian equivalent of our drawing-room, the place of honor given to some abominable German hearthrug, while ancient Persian products, for which collectors would give their very souls, are scattered anywhere.

Catfish Used to Help in Street Cleaning.

In one of the towns of the State of Oregon the familiar catfish figures as a hardy pioneer, and a valued adjunct to the street department, all because the terra cotta sewers and drains, especially those in the lower part of the town, frequently get choked.
If the sewer is not broken it can be cleaned by passing a rope through it, to be pulled backward and forward until the obstruction is loosened and removed. The deputy superintendent of streets had a great deal of such work to look after, but at last he discovered a quick, sure and easy method.
He goes to the river, catches a catfish, ties a string to its tail, drops it down a manhole into the sewer, and it at once starts for the river and forces its way through any obstruction not as solid as brick, dragging the string after it. Then the deputy goes as far down the sewer as he deems necessary and picks up the string, which he uses to draw a wire through the sewer, and with this a rope is pulled through and the sewer is soon cleared.

St. Isidore, P.Q., Aug. 18, 1894. Minard's Liniment Co., Limited.

Gentlemen,—I have frequently used MINARD'S LINIMENT and also prescribe it for my patients, always with the most gratifying results, and I consider it the best all-round Liniment extant.
Yours truly,
DR. JOS. AUG. SIROIS.

British Women on Jury.

"Ladies and gentlemen of the jury," was the address of counsel heard for the first time in the history of English courts recently, when six women formed a part of a jury in the Bristol Quarter Sessions. Six cases were tried, one of them being that of a man who was charged with assault. He was convicted and sentenced to nine months' imprisonment. All the women on the jury voted for his conviction, after hearing the evidence.
At the close of the day's session two of the women asked the court to excuse them from further service because of their home duties. The court granted their request, whereupon two other women in the room volunteered for jury service and were accepted.
The prosecuting attorney congratulated the women jurors on "at last taking their proper places in the administration of justice in England." He declared that justice also was furthered in women accepting jury duty.

BITS OF HUMOR FROM HERE & THERE

Reward of Politeness.
They were entertaining the minister at dinner, and after dessert little Johnny said:
"Won't you take another piece of pie?"
The preacher laughed. "Well, Johnny," he said, "since you are so polite, I will have another."
"Good!" said Johnny. "Now, ma, remember your promise. You said if it was necessary to cut into the second pie I could have another piece!"

The Woman Pays.
Through the long summer hours she had done her best to let him see she liked him. But he wrapped himself in a cloak of cynicism and made no move.
"Marriage!" he spoke bitterly. "Marriage is a mistake! Why should a man saddle himself with a wife for life, when he can buy a parrot for \$5?"
She hid her anger behind a charming smile.
"Yes," she retorted. "There again you men certainly have the advantage. We poor women can't buy a bear of any kind under \$200."

His Hopes Were Dashed Away.
A family in an Eastern city includes several children, but only one—the eldest—is a boy. The little lad longed for a brother. Recently the house was rather upset. A nurse who had appeared on the scene came to the little boy.
"What do you think you've got?" she asked him.
"A baby brother!" fairly gasped the youngster.
"No, dearie, it's a baby sister," replied the nurse.
"Aw!" groaned the youngster, "am I goin' always to have to sift those ashes?"

MONEY ORDERS.
Send a Dominion Express Money Order. They are payable everywhere.
The time to buy a second-hand car is just before you move, so people in the new neighborhood will think you have had it all the time.

MOTHER!

"California Syrup of Figs" Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

Minard's Liniment For Dandruff.

Conclusive Evidence.
William and Henry, chauffeurs, were discussing the ill luck of a fellow chauffeur, Clarence, who had the day before been fined for taking out his employer's car without permission.
"But how did the boss know Clarence had taken the car out?" asked Henry.
"Why," explained William, "Clarence ran over him."

LET "DANDERINE" BEAUTIFY HAIR

Girls! Have a mass of long, thick, gleamy hair

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vitality and vitality.
Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic, then its life, color, brightness and abundance will return—Hurry!

Clear Your Scalp and Skin With Cuticura

After shaving and before bathing touch dandruff and itching, pimples and blackheads with Cuticura Ointment. Wash all off with Cuticura Soap and hot water, using plenty of Soap, best applied with the hands. One Soap for all uses, shaving, shampooing, bathing.
Soap 25c, Ointment 25c and 50c. Sold throughout the Dominion. Canadian Depot: Leveson, Limited, St. Paul St., Montreal. Cuticura Soap shaves without mug.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" on Aspirin identifies the only genuine Aspirin—Bayer Tablets of Aspirin which contains proper directions for Colds, Headache, Toothache, Hayfever, Neuralgia, Lumbago, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost but Always buy an unbroken package a few cents. Larger "Bayer" packages.
There is only one Aspirin—"Bayer"—You must say "Bayer"
Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Mono-aceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

She Got the Yellow Pitcher

For thrills certain and cheap many women prefer the auction room to the best melon patch ever written but it is the innocent who gets most of them and reacts most violently. Quite recently a housekeeper noticed the red flag up on a house in her neighborhood, and after looking the offerings over she informed her husband that she meant to attend the sale and acquire, if possible, two side chairs, which had caught her fancy. He advised her to be careful and protect her pocket by taking with her a sum of money not exceeding \$5. And this measure of precaution she promised to observe.
On the day of the auction she went early and got a good seat, but a long wait intervened between the first articles put up and the chairs she fancied. One of these articles was a small yellow pitcher. The first bid it called forth was 15 cents. Mercy! thought the innocent, the pitcher must be worth more than that, so she raised the bid to 25 cents. The first bidder rose to 35 cents, and thinking that she wouldn't let her opponent walk away with the prize for an insignificant sum up she went to 50 cents. By this time her face was flushed and the usual thing happened.
"Sixty cents, 75 cents, \$1, \$1.25; and a half, and a half; make it \$2?" She nodded, but the old game went on, and with every raise she felt more determined that other woman should not have the little yellow pitcher. As she reached \$4.50 opposition ceased and the innocent cried out:
"Did I get it?"
"You got it," replied the auctioneer.
That night at dinner her husband remarked jocosely that he presumed the two side chairs wouldn't come home till next day, and added: "Of course, you did not spend more than \$5?"
"No, I didn't; I spent only \$4.50, and I bought—I bought—" But she could not bring herself to tell him, for by this time she had waked up.

Noble Gases in the Atmosphere

We are accustomed to think of the air we breathe as a mixture of four-fifths nitrogen and one-fifth oxygen. But within very recent years science has discovered that the atmosphere also contains, in very small quantities, five other gases.
These are called argon, neon, helium, krypton and xenon. They are sometimes spoken of as "noble" gases, not so much because they are rare as for the reason that they refuse under any circumstances to combine chemically with other elements. They will not thus combine even with one another.
All five of them together form about 1 per cent. of the air. Inasmuch as nearly nineteen-twentieths of this 1 per cent. is argon, one may judge how minute are the quantities in which the others occur. Of neon there is, by volume in the air, one part in 55,000; of helium, one in 185,000; of krypton, one in 20,000,000; of xenon, one in 175,000,000. If there was nothing to breathe but xenon, it would take a man more than two centuries to get one breath the size of a breath of air.
Of what use in nature are these noble gases? None whatever, apparently. Perhaps they are too noble to work. At all events, they seem to have no influence upon animal or plant life.
One member of the gas nobility, however, has recently been drafted into the service of mankind and made to do something useful. This is argon, which, through experiments, has been proved to be excellent for filling incandescent lamps. Because of its very inertness, it is one of the poorest conductors of heat, and thus increases the efficiency of the lamp and lengthens the life of the filament.
Another of the noble gases for which a possible job has been found is helium, which, being too lazy to catch fire, and yet with an "ascensional power," almost equal to that of hydrogen, is an admirable substitute for the latter in balloons. But there is no commercial demand for it even for this purpose, because it costs too much, and probably it will not come into use until there is another war.
Krypton and xenon make good lamp atmosphere, but they are too scarce and expensive for any such employment.
When a current of electricity is passed through a tube of neon a wondrous and beautiful orange-pink glow is given off. The effect is so attractive that experimenters are trying to develop lamps of the kind for use in rich folks' dining-rooms and drawing-rooms.
All five of the noble gases are colorless, odorless and tasteless. Argon, krypton and xenon, when liquefied, look like water, and when reduced to solids have the appearance of clear ice.
