

INVENTIONS WE NEED.

Plenty of Opportunities For Would Be and Could Be Edisons.

The world is full of would be Edisons, and the point we want to bring out is that quite a lot of them are could be Edisons.

A man invented the stocking frame for weaving silk stockings. He got the idea while he sat watching his wife work. But surely he wasn't the first man who sat and watched his wife work.

There is a huge fortune for the man who can commercialize weeds. The raw material is inexhaustible, for it renews itself automatically every year. It might pay a reader in the paper making trade to follow up this idea. Then we want a paint that will last as long as the material upon which it is placed and an iron that won't rust. We want something that will counteract the wearing effect of the atmosphere. It's going to be invented some day, and it may as well be done now, and you who read this may as well be the person to do it.

In some remote corner of the earth today a could be Edison may be experimenting with the possibilities of tiles on the sea. There are millions of square miles of water that are more or less wasted, and sooner or later, as the land area of the earth becomes crowded, people will inevitably take to tiles on the sea.

Above all, keep your eyes on Nature, who is continually making inventions which she never protects with patents—stray stories.

FREE FALLING.

Just Collapse, Drop Limply and You May Escape Serious Injury.

It was stated in a description of a recent aeroplane mishap that the aviator had time to clamber to the upper struts of his machine and that when the crash came he was practically unhurt, the landing wheels and lower part of the machine receiving and absorbing the shock.

Flying men, too, in the early days of aviation frequently leaped from falling machines and escaped with minor injuries. There is a knack in leaping and an art in falling, and athletes and aviators know both. It is to "fall free" and to offer no resistance or as little as possible.

It is not Providence that specially guards drunken men and little children when they topple. They collapse, and as the muscles and sinews are not drawn taut and no resistance offered, but little damage and frequently none results. The bone of a limp arm would need some force to be applied before it broke. A "resisting" arm would snap almost at once. In a fall all attempts to recover one's balance, if unsuccessful, mean greater damage. Let yourself collapse—fall limply—and you may escape serious injuries. It is the limbs and—wrench on muscles and sinews which make the bones snap—fall anyhow. Don't try to save yourself—and you will.—London Answers.

Never Had 'Em.

Old Dick was an old plantation dandy. He was rarely if ever sick, and he always claimed that it was the way he had lived. One day as he was walking down the street a local merchant, taking advantage of his ignorance, accosted him thus:

"Dick, one of your best friends has just told me that you have ancestors of the worst sort."

"Now, look here, Cap'n Gaws, I don't want to hurt nobody, but I jes' want to know who dat man was wot tol' you, and I sho' will go after him, 'cause he done gone and 'sult me. Me got ancestors? Why, cap'n, that's as big a lie as was ever told. I never had nothin' in my life but the mumps and colic."—National Monthly.

The Telephone Pole.

The employer of a Polish girl who has learned quickly to speak English tells of her attempted mastery of the telephone. After its use was explained to her she was eager to answer every call. A ring came and she jumped to the phone.

"Hello," came from the receiver.

"Hello," answered the girl, flushed with pride at being able to give the proper answer.

"Who is this?" continued the voice.

"I don't know," exclaimed the maid. "I can't see you."—Philadelphia Ledger.

Was Troubled for Years With Kidney Disease

And This Treatment Cured Me—This Statement Endorsed By a Baptist Minister.

The great majority of people are familiar with the extraordinary curative powers of Dr. Chase's Kidney-Liver Pills. But for the benefit of those who are not we continue to publish from day to day reports from persons who have been actually cured.

The case described in this letter was an extreme one, and the writer was in a very low condition when he began the use of these pills. The cure was so marked that Mr. Mosher's pastor did not hesitate to vouch for his statement. By their unique combined action on the liver, kidneys and bowels, Dr. Chase's Kidney-Liver Pills cure in

MR. MOSHER.

complicated cases which defy the action of ordinary kidney medicines. Mr. W. H. Mosher, Brockville, Ont., writes:—"I used Dr. Chase's Kidney-Liver Pills, and firmly believe there is no medicine to equal them. I was troubled for years with kidney disease, and this treatment has cured me. When I began the use of these pills I could only walk from my bed to a chair. Now I can go to the field and work like any other man. Dr. Chase's Kidney-Liver Pills are an excellent medicine."

This statement is certified to by the Rev. E. H. Emmett, Baptist minister of Brockville, Ont.

By awakening the action of liver, kidneys and bowels Dr. Chase's Kidney-Liver Pills cure Constipation, Headaches, Chronic Indigestion, Kidney Disease, Liver Complaint and Backache. One pill a dose, 25 cents a box, all dealers, or Edmondson, Bates & Co., Limited, Toronto.

THE DOMINION OF CANADA.

That's the Official Title of England's North American Daughter.

The official title of Canada is the Dominion of Canada. It embraces eleven provinces—viz. Alberta, British Columbia, Manitoba, New Brunswick, Nova Scotia, Ontario, Prince Edward Island, Quebec, Saskatchewan, Northwest Territories and Yukon Territory. The government is federal, centered at Ottawa, the capital of the Dominion, while each of the provinces, like our states, has its local legislature and capital. The head of the federal government is a governor general, appointed by the king of Great Britain and holding office for five years. Each province has a lieutenant governor, appointed by the federal government for a term of five years.

The federal or Dominion parliament consists of a senate, with eighty-seven members, nominated by the governor general and appointed for life by the king, and a house of commons of 221 members, elected by the people of the several provinces for a term of five years, the right of suffrage being subject to a property qualification.

The provincial legislatures are elected by the people of each province. Each province has its own courts of local jurisdiction, and there is a federal supreme court, consisting of a chief justice and five associate judges.—Philadelphia Press.

BEE CULTURE.

It Doesn't Cost Very Much to Start It in a Small Way.

It is simple, and not very expensive, to start bee keeping in a small way. About \$25 to \$30 will do it. The amateur bee keeper needs but one colony of bees, a good queen and a couple of frames. Of course he should have two or three books on bee culture, a veil, gloves and a smoker.

The smoker is for the purpose of slightly confusing the bees when it is desired to open the hive. The extra hive is necessary because, when bee keeping is usually started in the spring, there must be some place for the swarm which may soon leave the parent colony. It is by swarming that increase comes about, and this may be so regulated by the bee man that his profit will be entirely through increase. Or, if he chooses, he can retard increase and work for honey only.

With an outfit such as that mentioned above the amateur can in most seasons produce enough honey for a family of five persons, and he can do this by giving no more than a few moments daily, or perhaps half an hour during the course of the week, to the care of his bees. Starting with two colonies of bees, he ought to be able to provide for his own family and have a surplus of honey to sell.—Pheasant Barnard in the Country Magazine.

World's Longest Street.

In Seeböhm's "Siberia in Asia" is thus described what is called the longest street in the world: "Siberia was half festively described to me as a big village, the main street of which, extending from Nishni-Novgorod to Khabarovsk, was about 5,000 miles long, where there were always half a million horses on the road and where everybody knew everybody from one end of the street to the other."

Immortal Animals.
Some of the lower animals are immortal, having neither birth nor death. The condition was never more clearly or scientifically expressed than by S. T. Coleridge in his "Biographia Literaria" in a footnote to chapter IV on Wordsworth's "Lyrical Ballads" where he says:
"There is a sort of minim immortal among the animalcula infusoria which has not naturally either birth or death, absolute beginning or absolute end, for at a certain period a small point appears on its back, which deepens and lengthens till the creature divides into two, and the same process recommences in each of the halves now become integral."
