FACTS IN WATURAL HISTORY.

<text> ection.

reflection. Lyonnet, a French naturalist, spent sev-eral years in examining the structure of a single insect, and left the work unfinished, thus showing the exceeding delicateness of the structure. In the body of an insect, about an inch in length, M. Straus has enumerated three hundred and siz pieces, composing the structure of the outer envel-ope; four hundred and ninety-four muscles, ope; four hundred and ninety-four muscles, for putting these in motion; twenty-four pairs of nerves to animate them, and forty-eight pairs of traches, or breathing organs, equally ramified and divided, to convey air and sustemance to this complicated tissue. We regard the common house-fly as a contemptible insect—but how important an biset of tasks.

object of study its structure may be can be learned from the fact, that its eye is one of the most singular and curiously constructed mirrors that science has yet invented, or study discovered. The number of lenses in its eyes is numbered at six or seven in its eyes is numbered at six or seven thousand—in the eye of a dragon fly, twelve thousand—the eye of a butterfly, seventeen thousand. The house-fly's wing has a power of six hundred strokes in a single second, which can propel it thirty-five fact, while the speed of the awillest race horse is but ninety feet per second—more than a mile per minute. The beauty of the butterfly is proverbial; but how much more intense should be our admiration when we learn that it is a thing of 34,000 eyes, and that in a single wing there have been found 100,000 scales! The wings of many insects are of such extreme tenuity that 50,000 of them, placed over each other, would not compose the thickness of a quarter of an inch; and yet, thin as they are, each is double, so that the actual laming here would be 100,000.

We often see in pools of water small bits of elongated straw and wood, seemingly having the power of motion. With what interest has science invested these, when we find that each elongated tube is the we and that each clongated tube is the home of a caddis-worm, which is ultimately to become a worm or fly-such as the ephe-meron fly, whole peculiar characteristics we have before noticed. These worms are 1 to the and hence they glue together small bits of wood and straw to make a house for shelter; and when the frail castle is too buoyant. they add a piece of gravel to preserve the balance, in order that the castle shall not shall not be burdensome nor too buoyant. We regard the web of a common spider as the trifling excressence of a disgusting insect---but it is an object of intense curiosity, when we reflect that each thread is composed of 4000 threads, and that 4,000,000 of these 4000 threads, and that 4,000,000 of these small threads, would not make a cord thicker than, a single hair, from a may's head!. There is one apecies of apider. that lives in water, in a house of air, like a diving bell; and another builds a house in the ground, with a door upon elastic hinges, which keep it constantly shut.

HOLLOWAY'S OINTMENT.

MOST ASTONISHING CURE OF SCROFULO ULCERS-A CASE CERTIFIED BY THE MAYOR OF BOSTON.

THE MATOR OF BOSTON. Copy of a Letter from J. Moble, Esg., Muyor of Boaton, Lincolnshire. To Protessor HoxLowAy. Dent Sir, ---Mrs. Sarah Dixon, of Laucorpoind street, Benton, has this day depiced before me that for a considerable period ane was severely afflicted with Scrofishins Sories and Ulcers in her arms, feet, legs, and other parts of her body; and although the first of medical advice was obtained, at the cost of a largo sum of mongs, she obtained, at the cost of a largo sum of mongs, she obtained an abatement of suffer-ing, by gradually grew worse. Being recommended by a friend to try yoar Oint-ment, she procured a small pot, and a bez of the Fills, and before that was all used, symptoms of mendicent appeared. By prisevering with the as-dicines for a short time longer, according to the direc-tions, and strictly adhering to your reles, as to diet, &c., she was perfectly cared, and now enjoys the best of health. I remain, Day Sir, yours traly.

I remain, Dear Sir, yours truly, (Signed) J. NOBLE, Dated August 12th, 1852.

AT MALTA AND PORTSMOUTH HOSPITALS.
 The following important communication has been forwarded to Professor Holloway for publication, by Mr. B. Dison, Chemist, Kingst., Norvich.
 Copy of a Letter from Captain Smith, of Great YarmoulA, dated January 1944, 1883.
 To Mr. DIXON,
 Dear Sir, --I send you the particulars of a cure efficient by Professor Holloway's invaluable medicines:--Mr. John Walton, late in Her Majesty's Service, in the British Fleet at Malta, had a very bid alcorated ancle, and after having been in the Malth Hospital for six months, was send to England as an invalid to Portsmouth Hospital, where he remained an inmate four months, there, as at Malta, refusing to have the limb ampointed, he was turned out incurable. He then came to Yarmouth, and was under a medical gentleman for about three months, bat his matcie became as much works that all hoge was lost. At this period, by my advice, he tried Holloway's Ointment and Fills, which, by amenited application, healed all the ulcers, and restored him to perfect health astrongth.
 I remain, Dear Sir, yoars very traly. (Signed) JOHN SMITH.

ness estructures and the second secon Tems of Subscription, one Copy, for One Year \$2.

Subscriptions received by George T. Haszard, Agent for P. E. Island.

Notice to Travellers.

NOLICE to Travellers. IT has become an established fact that accidents will happen notwithstanding the care and atten-tion which may be paid to the safety and convenience of travellers. Explosions will take place, bridges will be left open, and cars ran off the track as useal. It is well enough for the public and legislators to caution companies to "beware," and " take head," yet these casualties will occur, which re-sult in severe contusions, broken links, barns, bruises, &c.

The Mexican Mustang Liniment,

Upon such occasions, is invaluable? The wea-dering effects of its southing and healing properties have induced many, who have tried if, to always entry a spitle of it with them which they are travel-tion.
