CHARLOTTETOWN, SATURDAY, DEC. 7, 1861.

Articles for the International Exhibition.

In our last we referred to the goods which have been procured by the Commissioners in this Island for the International Exhibition of 1862, to represent our agricultural productions, and different branches of manufacture on that important occasion, and promised to furnish this week a list of the principal articles which have been forwarded. The following list, we understand, enumerates the greater part of the articles referred to:—

Egg Cups, 1 Maple Bench Screw and Nutt, 1 piece polished Waved-maple Plank.

INDIAN, &C., MANUFACTURE.—1 Birch-bark Canoe and Paddles; lot of Salmon, Trout, Eel and Lobster Spears, 26 packages Indian Baskets, Boxes, &c.; 10 Willow Baskets, 1 bundle Basket Willow Cane, 1 do. White Raspberry Cane, 1 do. Lombardy Poplar shoots, 1 do. split Basket Ash.

LEATHER MANUFACTURE.—2 sets Silver-mounted Harness, 1 set Gig Harness, 2 sets Brass-mounted Harness, 1 Fancy Collar, 1 set Cart Harness, 1 Riding Saddle, 11 pairs Ladies' and Gentlemen's Boots and Shoes of different descriptions, 4 rolls Leather, 1 large Bear skin, 1 full set Bear skin sleigh furs.

CLOTH MANUFACTURE.—35 pieces Home-made Cloths, about 1 dozen parcels containing Flannel, Dragget, Shawls, Carpeting, Hearth Rugs, Horse Rugs, Counterpanes, Toweling, Table-cloths, Woolen Hoods, Mitts, Stockings, Overalls, &c.; 1 Box Down Boas and Cuffs, 1 parcel Linen Socks, 1 box Military Caps, 1 box Hats and Caps; also 1 Straw Bonnet.

AGRICULTURAL PRODUCTIONS.—4 sacks Wheat, 4 do. Barley, 4 do. Oats, 1 do. Vetches, 1 do Peas, 1 bag Carraway Seed, 1 do. Clover Seed, 1 do. Timothy Seed, 1 do. Flax Seed, 1 do. Beans, 1 case Cheese, Bacon, &c.; 4 barrels Pork, 2 do. Flour, 4 do Oatmeal, 2 half barrels Pearl Barley, 1 barrel White Corn Meal, 2 boxes Bread, 2 crocks Butter, 1 firkin do., 1 box Honey, 2 dozen ears Indian Corn, 1 box Flax, 2 bundles Hemp Stalks; also 4 cakes Bayberry or myrtle wax.

FISH.—1 dozen tins Preserved Salmon, 1 dozen do. Lobsters

MINERALS.—1 box of Minerals consisting of Marga Paint and Red Chalk, 1 piece Petrified Wood.

No doubt every person deeply interested in the prosperity of the Island could wish that a greater number and variety of articles had been procured; but considering the short time that has elapsed since decided action was taken in the matter, we must say that the collection is better than we anticipated. Much credit is due to Henry Haszard, Esq., Secretary to the Commissioners appointed by the Government, for the enterprise and zeal which he has manifested to obtain for this Colony a creditable representation at the World's Fair.

Among the articles of Wood and Iron Manufacture, the Reaping and Mowing Machine, made by Mr Elisha Weatherbie, of Lot 49, and the Sewing Machine, manufactured by Mr Hildreth of this City, are most worthy of notice. If such machines can be manufactured here —and it has now been proved that they can—why should not the business be taken up by some of our mechanics, and an effort be made to prevent hundreds of pounds being sent every year to the United States to supply the existing demand for these articles? The Axes and Forks, which were also supplied by Mr Weatherbie, are very creditable specimens of Island manufacture. We had not the privilege of examining the Carriage and Sleigh forwarded, but the mention of the manufacturer's name, Mr John Scott of this City, will be a sufficient guarantee that they have been got up in the best style of that branch of manufacture in this Colony.

We understand that all the articles of Furniture in the list were manufactured by Mr Mark Butcher. We were particularly pleased with the Centre Birch Table. We never saw such a beautiful specimen of birch wood, as that of which the table is made,—we would prefer it to mahogany; and the design and finish of the article are of the first order. The Waved Maple Bureau must, we think attract attention at the Exhibition, both on account of the quality of the wood, and its neat appearance as a piece of furniture. The chairs are cushioned with Island made cloth, and look very nice. But what interested us most in this department, was the Fancy Table and Fire Screen. The former is painted a dark color, and on this are spread the leaves of quite a number of Island plants and trees, such as the strawberry, fern, beech, birch, maple, &c. The whole is varnished over, and at little distance the leaves have the appearance of a fancy painting. The Fire Screen is a still more interesting object. The front of the screen is a beautiful piece of white paper, on which are glued or stuck in some manner a variety of flowers, calyx and all. The whole of the flowers have, we understand been produced on the Island, though two or three of them do not belong to native plants. This piece of fancy work which is protected by glass, and mounted on a neat stand, as well as the table just alluded to, cannot fail to attract the notice of botanists at the Exhibition, who are interested in the Colonies.

The boots and shoes would do credit to any manufacturer in the world. On some of the cards attached we observed the name of Faught, and on others of W. C. Trowan. We hope these mechanics will have the satisfaction to hear that their workmanship does honor to their adopted country. A set of Harness manufactured by Mr Murray of this City, and another by Mr Gates are very neatly got up; the latter is perhaps too light and fanciful to please British taste.

Some of the pieces of cloth looked remarkably well, particularly the grey fancy mixture, and shepherd's plaid, in which varieties we think this Colony will be able to compete successfully with the neighboring Provinces. Some of the hearth rugs are very handsome, and two or three of the shawls will show that even in this department we could very well shift for ourselves. The military and other caps, which we understand were supplied by Mr Hobbs, are very neatly made. We were quite pleased with the linen sacks. If our farmers would only grow flax, and some of our men of capital and enterprise undertake to erect manufactories, we think this Colony might save a great deal annually in this article alone.

The samples of grain forwarded, though good, are not equal in appearance, if in weight, to what we have seen produced on the Island. The specimens of pearl barley, which we learn were supplied by Benjamin Wright, Esq., are beautifully prepared. The flour is also of a superior quality. The butter and cheese looked well; in short, we think our agricultural productions will be fairly represented by the samples forwarded. Not so, however, with respect to the fish which swarm our waters. We regret, to see Mackarel, Codfish and Trout wanting in the list. We think also that a greater variety of Minerals might have been procured than one or two kinds of paint and chalk. We shall not, however, censure the Commissioners, as no doubt they were disappointed in receiving some articles which they intended to forward before the close of the navigation.

Holloway's Pills

The best known remedy.—Just now the cold, dampness, and fogs, are producing innumerable ailments; the first two diminish nervous power, the last contaminates the blood. These fruitful sources of disease can readily be removed by Holloway's Pills. They immediately expel from the circulation any impurities communicated to it by a vitiated atmosphere, and give energy to the nervous system. These are important points in securing the human frame from disease. Holloway's Pills correct, cleanse, and stimulate every organ. They are invaluable in gout, rheumatism and dropsy. In all diseases incidental to the throat, chest, liver, or stomach, these admirable Pills are both safe and efficient. They contain no mercurial, mineral or noxious ingredient.

BLACKWOOD'S MAGAZINE AND THE BRITISH REVIEWS.

L. SCOTT & CO., NEW YORK, CONTINUE to publish the following leading British Periodicals, viz:—

1. The LONDON QUARTERLY (Conservative).
2. The EDINBURGH REVIEW (Whig).
3. The NORTH BRITISH REVIEW (Free Church).
4. The WESTMINSTER REVIEW (Liberal).
5. BLACKWOOD'S EDINBURGH MAGAZINE (Tory).

The present critical state of European affairs will render these publications unusually interesting during the forthcoming year. They will occupy a middle ground between the hastily written news-items, crude speculations, and flying rumors of the daily Journal, and the ponderous Tome of the future historian, written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals that readers must look for the only really intelligible and reliable history of current events, and as such, in addition to their well-established literary, scientific, and theological character, we urge them upon the consideration of the reading public.
