### Ottawa Items.

Ottaws, August 31 - Now that i is definitely announced that parliament will meet again in Nomember considerable interest is felt in political circles here as to the programme of legislation to be brought down. Some amusement has been caused by the pious wish expressed in certain government organs that the coming session will be a short one as it is conceded on all sides that never since 1896 has the opportunity been placed in the grasp of the opposition to force the hand of the Laurier administration and to bring about a different order of things than has obtained since by virtue of the big club placed in his hands by the servile majority from the province of Quebec, the premier has been able to play the role of a conquering Czar. The length of the session depends naturally on the nature of the legislation announced in the speech from the throne, although in past years that utterance has been marked by the announcements which it omitted. In spite of the bopes of the inspired governmen organs the united opposition, never stronger than in this parliament, will scrutinize with the utmost care every piece of legislation brought before the House, and will exert to its utmost its prerogatives of protest ing against unwise and extravagant expenditure which has been such a feature of this government's wanton policy of taking no thought of the morrow. So if the feeling is spread in the Liberal camp that the session will be devoid of legitimate criticism from those who sit at the left of the speaker, it can be speedily thrown aside. As to legislation there wil undoubtedly be some step taken to give effect to the resolution of last session and inaugurate some system of national paval defence. Sir Frederick Borden and Hon L P Brodeur while spending a plessan holiday in London at the country's expense, base been attending the conference which met to discuss the matter of empire defence, and their decision in the matter will be placed before parliament and in some manner crystalized into legislation Then Mr Fielding will tinker with the bank act, in the same way that be has been playing for three years with the insurance business of the country. As a political tinkerer Mr Fielding is second only to Mr Fisher, the Minister of Agriculture, who invariably has several bills each session altering previous laws on the statute book and adding a lot of unnecessary dead weight thereto. The extension of the boundaries of Manitoba is sure to be brought to the front again by the able little band of prairie province. For some years Sir Wilfrid Laurier bas bedged about this question, and never yet has he screwed his courage up to the sticking point. Manitoba is getting accustomed to being punished for its adherence to Conservative principles both federal and provincial. The big s'ick has been waved over ber head so long that she does not fear it now, and it remains to be seen whether this year justice will be done ber. Then the insurance bil which has been the subject of extended consideration both in committees of the bouse and in the House itself for the past two years will again come up. Last session culated form of the original bill which had all its teeth drawn, bu the leisurely gentlemen of the Senate p o'es'ed against having to deal with a hundred clause document in the dying bours of the session, so the insurance bill went over. The insurance bill is a typical piece o Laurieriem. When the insurance ecandals were brought to light in the United States Sir Wilfrid Laurier and Mr Fielding jumped to the con-

clusion that similar conditions muet

ex'st in Canadian insurance circles.

and after the investigation by the

royal c mmission which practically

All Stuffed Up Great difficulty is experienced in clearng the head and throat.

No wonder catarrh causes headache, mpairs the taste, smell and hearing, ach and affects the appetite.

To cure catarrh, treatment must be constitutional—alterative and tonic. "I was ill for four months with catarrh in the head and throat. Had a bad cough and raised blood. I had become discouraged when my husband bought a bottle of Hood's Sarsaparilla and persuaded me to try it. I advise all to take it. It has cured and built me up." Mrs. Hugh Rupolph, West Liscomb, N. S.

Hood's Sarsaparilla Cures catarrh-it soothes and strengthens the mucous membrane and builds up the whole system.

failed to bring out any dreadful skeletons in the cupboard a bill was drafted on the recommendations thereof. The present bill is child's play compared with its father.

But the government must not run

away with the idea that because it has a servile majority mainly from one province at its back that it can afford to play fast and loose with whatever legislation it desires to bring forward. The opposition, 24 Fri 6 086 14 a m 3 57 6 58 representing as it does the majority 25 Sat | 6 09 6 12 0 46 5 21 8 01 of the thinking citizens of the coun-26 San 6 11 6 10 2 00 6 50 8 52 try was never more united, and it is 27 Mon 6 12 6 08 3 18 8 09 9 38 that feeling that they have the best 28 Tue 6 13 6 06 4 39 9 16 10 21 sentiment of the Canadian people at 29 Wed 6 14 6 04 rises 10 19 11 03 30 Thu 6 15 6 02 7 03 11 20 11 43 their backs that causes Mr Borden and his able lieutenants from the various provinces to keep up the fight for clean and bonest government. One thing is certain. The oming session will see no more appointments of royal commissions. The Laurier administration has tried them in the past and they have proved to be boomerangs, and the greatest campaign material ever provided for any party is set forth n the numerous volumes of evidence

aken before the commission which probed into the unwholesome mess of the civil service. There is likely o be a shake up in the cabinet before the House meets. Mr Aylesworth, whose hearing is not improving and who has neither the liking nor aptitude for political life is expected to step out of the cabinet and there are constant lumors that Hon. L. P. Brodeur, Minister of Marine and Fisheries after he has obtained the knighthood which he is slated for will be given a seat on the Supreme Court beach. However, this may be there is no denying the fact that Sir Wilfrid will meet the House with a weakened array to face the attacks of the opposition. The importation of Mr Mackenzie King ino cabinet circles has proved to be most distasteful to many of the rank and file who have borne the burden and heat of the political day for the Liberal party for many years. There is a general disposition on the part of Liberal members to get appointments, and it would appear as though the rats were preparing to leave the

# Britain Rules The Air.

during the coming session will not

British subjects throughout the Empire had been preparing sadly to admit that though Britain rules the waves, she was hopelessly at sea when t comes to building flying machines that would rule the air. We have been hearing so much about the successful Americans, who broke a leg or killed a man oceasionally; and about the successful Frenchman who took a flutter of a score of miles across the Channel or fell in the drink as the case might be; and of the imposing German dirigible balloons, those Dreadnoughts of the sky, which occassionally burn up or blow up, But all the time old John Bull has been preserving that stolidity of countenance which usually characterizes him when he has something up his Conservative members from the sleeve and has solemnly accepted the condolence of other nations at the lack of likelihood of his dominating the air as well as the sea,

Then along comes the great international flying competition, Canadians reading the American cables were educated to believe that it was a case of one Glenn Curtiss against the field. On the Continent M, Bleriot, who has made such a valiant flutter at the shores of perfidious Albion, and M Latham, led in the betting, while various other world-known experts cavorted spectacularly in the air during the preliminary flights and did everything but turnsumersaults like tumbler pigeons, As the French would say themselves, it was all very magnificent but not exactly war- No doubt these distracting exhibitions

THE STANDARD OF THE WORLD

a healthy mentality and morality sideration sinking ship. The vacancies on the Board of Railway Commissioners and the National Transcontinental Commission are the plums in sight and there is a rush to grasp the fruit, Never since 1396 did things look velopment of the qualities of the mor less rosy for the Liberal party, and with the opposition working as one ontentment. "The dominion of the product of crown lands. It is not man the path of Sir Wilfrid Laurier orces of the mind," declared the likely that the action taken will lead

secret of perfect health

It would be a particularly happy world if all Dr McCallum's conclusions were correct. There can be no doubt but that anger, envy, fear, bare and all the other mental di eases have vorked woe to untold millions, That ney have made those who were affect ed with them miserable is equally certain. The man with the group oday is generally accused of having liver, with all that such an accusaon implies. Thus it will be seen hat even laymen have a dim notion of Dr. McCallum's elaborated theory If we wish to wipe out disease we must irst get rid of mental disorders. It s worth trying at any rate. - Ottawa

(Montreal Gazette.)

The New York Journal of Com- up? merce does not approve of the instructions issued by the US Secretary of the Treasury relative to the collection of duty upon mechanically ground wood pulp and paper imported into the United States and coming from the provinces of Ontario and Quebec. The Journal very pertinen ly points out that this policy of retaliation is a very foolish one, increasing instead of mitigating the effect of the restrictions at the cost of the United States consumers. The policy of retaliation is distinctly foreign to the spirit of protection. If the United States Congress was of opinion that the interests of the pulp and paper trades in the United sical body. The aim then of the States would be injuriously affected physican, and of the patient, or of the by the reduction in duty made in the already healthy man, was to cultivate revision, then it was in error i these latter qualities, or if they already making such a reduction. If, on the existed to develope them until a fine other hand, it was of opinion that harmony prevailed between the the reduction was one to be properly healthy organs of the body and the made, having the interest of connerve centers of the mind.
