the Division Courts. THE increased demand for Summonses and other BLANK WRITS, in connection with the business of the several Division Courts in the District, has warranted was the greatest yield, although there were us in printing them in much larger quanti-ties than heretofore, and consequently enar-bles us to sell them much cheaper—therebles us to sell them much cheaper—there fore we intimate to the several Officers requiring these Blank Forms, that from this date, Summonses and all other Writs belonging to the Division Court, will be Sold at the Signal Office at the reduced price of Two Sullings and Sixpence per Huyders.

Signal Office, Goderich, Sixpence per Sixpence of these produced so much as a greater number of the September 1249

poetry.

TO AN ABSENT FRIEND.

Thou art not gone ; thou could'st not go True friends can never part, Our prayer is one, our hope is one, As we are one in heart! Ner place, nor time, can e'er divide The souls which friendship seals ; But still the clanging scenes of life Their mutual love reveals.

Body from body may be placed Renote as pola from pole:
But can our fleshly fraitties bind
The fellowship of soul?
'T is when removed from grosser sense
My spirit claims her right:

bers of ears, but from that number which

of 168 kernels, or twelve per foot, planted in nine different ways, allowing fourteen

or seythe, only one-fourth or enc-fifth can be expected. But it only requires one ounce per square foot to produce by weight some

exists.

I remain, dear Sir, Your most obliged, THOS. KING THEDAM.

or one lb. avoirdupois, and calculating 64 lbs., a bushel of the finest wheat would contain exactly 448,000 kernels.

The experiments alluded to were for the purpose of ascertaining the quantity of seed which was most productive, and also whether the grains should be allowed to germinate singly or otherwise.

Distribution of the Sea Bird left solicity of vive would never again disfigure the pertous of making short work of it, and to that tous of not he best sail on her bows, but too far abead to be made out with certainty evidently watching their formed a choice banquet for the monsters of the deep.

The experiments alluded to were for the purpose of ascertaining the quantity of seed which was most productive, and also whether the grains should be allowed to germinate singly or otherwise.

The experiments alluded to were for the proposed the captain of the Sea Bird left solicity divisions of Africa.

One hundred of the unhappy wretches incorrected in that living sepulchre, gazed to appreciate their worth, the remainder to appreciate their worth the captain of the Sea Bird left solicity and to that the sons of the injured so the men. No alternative remained but to pull for the land, and if interrupted, fight

bors of ears, but from that number of grains approaches nearest the number of grains sown, so that if the soil will produce twenty-one kernels, or seven pecks of seed, may be sown per acre.

The other experiment shows the products the Englishman's deck, and the ugly custo-mer aft her foremast was screened by a tar-pawling, which soon brought them in speaking distance of each other, and as she drop ped under the lee of the slaver, a clear voice bailed; Brig aboy!

'What Brig's that ?'
'The Sea Bird, at your service,' return-

ner to speak to some purpose. A shot of the Sea Bird's top mast flying from it.

wheat regulate weight of gravity, and that as 7,000 grains troy are equivalent to 16 oz.

Having an unusual valuable cargo on the secone I have attempted to describe, the auctioneer's harmer would drop nerveless by his side, the lash of the slave drop on the secone I have attempted to describe, the auctioneer's harmer would drop nerveless by his side, the lash of the slave drop of unking short work of the investment of the per-

ret the grains should be allowed to germinate singly or otherwise.

In reference to the thick and thin planting, there were nine experiments, containing fourteen feet each, and four holes upon each foot, in which were dropped from one extended to the into requisition to mislead the curious sail, forever hovering on the horizon's verge, but in vain. Thus situated, the slaver was been shed to recognise the far famed English man-of war-brig, whose captain knew from one—third to three bushels of seed per tarafford.

2v-n49

LARS, Chancery, 10 consequently from four to thirty-six kernels per foot, and at the rate from one—third to three bushels of seed per tarafford.

impossible to determine, otherwise it apimpossible to determine, otherwise it appears from this experiment that the greatcost produce is not from the greatest num
by the semigrant the great thorough the of New York. I visited the dead house and among the cold white votaries of the lund tion at Rio for the purpose of exercising temb, exposed for recognition, I beheld the corpse of the slaver captain! He who had fettered so many in life, had been forced to yield an unconditional surrender to the grim messenger whose keys unlock the por-tels of eternity.

THE FATAL SECRET.

BY D. WEBSTER.

An aged man, without an enemy in the world, in his own house, and in his own hed, is made the victim of a butcherly murder, for mere pay. Deep sleep had fallen on the destined victim, and on all beneath his roof. A healthful old man, to whom sleep was sweet, the first sound slumbers of the night hold him. for we intimate to the several Officers sequiring these Blank Forms, that from the results, and would have appeared in the results, which are somewhat extraordinary and control in any way, were not sufficient, as neither of the Blank Forms, that from the short each of the Division Court, will be Sold the Signal Office, the the Polision Court, will be Sold the Signal Office, and the several Officers is an an interesting the self-short each of the Division Court and the several Officers is an interesting the self-short each of the Polision Court will be Sold the Signal Office, and the several Officers is an interesting the self-short each of the Polision Court will be Sold to the Division Court will be Sold to the Division Court will be Sold the Signal Office, and the several Officers is an interesting subject, that the Polision Court Act, and all the

repose of sleep to the repose of death! It period of his life, been a bankrupt, either in is the assassin's purpose to make sure work; health or in poverty. Such men, having and he yet piles the dagger, though it was learned by God's providences the value of shvious that he had been destroyed by the what they have lost, and being undiscourblew of the bludgeon. He even raised the aged, have always found themselves aged srm, that he may not fail in his aim at the healt, and replaces it again over the thing more than forty-two bushels per acre, the duck, her topgaliant and royal mast blow of the bludgeon. He even raised the aged, have always found in the part of a the heart, and replaces it again over the wounds of the point of the

One impression has taken me by surprise I used to wonder—and always did till now —at that stupidity of the Israelites which so angered, their leader,—their pining after Egypt, after finding it impossible to live there. It was incenceivable how they could long to go back to a place of such cruel oppression, for the sake of anything it could give. I now wonder no longer, having seemand felt the desert, and knowing the charms of the valley of the Nile. One evening slately, just at sunset, the scene struck upon my heart, oppressing it with the sense of beauty. A village was beside an extensive grove of palms, which sprain from out of the thickest and richest clover to the height of eighty feet. Their tops waved gently in the soft breeze which ruffled the surface of a blue pond lying among grassy shores. There were golden lights and sharp shadows among the banks where a stream had lately made its way. The dom to the industry and freedom to the yellow sand hills of the deserts just showed to be free from the fluctuations, incidental to be free from the fluctuations incidental. themselves between the stems of the more scattered palms. Within view were some carefully-tilled fields, with strong wheat, lupins and purple bean blossoms; and some melon and cucumber patches were not far off. Cattle were tethered beside the horses; and on a bank near sat an old woman and a boy and a girl, basking in the last rays of the sun with evident capyment, though the magical colouring given by Egyptian at-mosphere could not be so striking as to English eyes. But what must it have been in the memory of the Israelites, wandering in the desert, where there is no colour except at sunrise and sunset; but only glare parched rocks and choking dust or sand !--I will not attempt now, for no one has ever succeeded in such an attempt, to convey any impression of the appaling dreariness of the depths of the desert. I can only say, that when it rose up before me at sunset I then understood the surrender of heart and reason on the part of the Israelites, and ould sympathise in their forgetfulness of their past woes in their pining for verdure and streams, for shape, and good food, and for a perpetual sight of the adored river, instead of the hateful sands which hammed them in whichever way they turned — Pendle's Journal.

years past had asked the farmers to send them to parliament to raise the price of agricultural produce, and now, when the price is low, they turn round upon those gentlemen who have not fulfilled their en-gagements, and they express themselves in a most violent and intolerant manner against nation. They suppose that agriculture is to be free from the fluctuations incidental to the other branches industry, and they are now only launching forth on the ocean track which should have been followed 30 years ago, and then they would not have found themselves so astonished and so distracted at the changes they must inevitably meet with. He thought the landed proprietors had no right to come to them with certain facts which he believed were true throughts agreed to produce a contract of England proughout a great portion of England .-Hitherto there had been no reduction of rents (hear). If the Corn-laws were intended to maintain rents, they are perhaps right in asking for it; but ask them freely if they have done anything to meet the case of the tenant farmer (cheers). And of the farmers he would ask if they had taken the advice of a very able agriculturist in the county of Devon, Mr. Fowler, who recently recommended, in a letter to the farmers of the county, as one means of competing with foreigners, to confine the number of their acres to the pumber of their £10 notes; for if the farms corresponded to their capital, they could much more easily sustain oreign competition, and live well with preood, and for a perpetual sight of the adored ver, instead of the hatful sands which cammed them in whichever way they turn-been so long pursued in all parts of the kingdom (app suse). He was not surprised at what was going on in the agricultural abareby (laughter). The fagmers were actorished
