WILSON'S LAST WORD.

WASHINGTON, To-day, numerication which he has drafted as the last word of the United States to Germany on the submarine issue, was completed yesterday by President Wilson, and probably will be despatched to Berlin to-day. The document reviews Germany's submarine activities since the Lusitania was super a year a year and probably sunk, almost a year ago, and makes plain that only an immediate change of German policy can make possible the continuance of friendly relations between the two nations. As the President was putting the finishing touches to the note on which he and Secretary Lansing have been working for nearly a week, official word was received by the State Dept., that the lives of two Americans had been enangered by an attack on the Russian barque Imperator by an Austrian submarine. The American Consul-General at Barcelona, Spain, who sent Palm Sunday, one which recalls to a report, said the attack was without warning. One American on board was wounded by shrapnel shells fired by submarine. A full investigation
