Ladies' Black Wool Hose, 25c PAIR.

Ladies' \$1 Kid Gloves, for 50c PAIR.

Children's Ribbed Cashmere Hose, 10c PAIR.

IN AN INDIAN MOUND.

A Million Dollars of Gold Dust and Nuggets Hid Away.

KNOXVILLE, Tenn., Nov. 22.—A large amount of gold has been found in an Indian mound in Union county, 25 miles from this city. A week ago a Cherokee woman named McDonald, a granddaughter of Chief McIntosh, one of the famous chiefs of her tribe, appeared in the neighborhood with a map, showing the location of a large amount of hidden treasure. She claimed that \$500,000 had been buried in the mound by her grandfather. People were disposed to treat her as a quack, but finally the owner of the farm on which the mound was located agreed to open the mound for half the treasure, if any was found. Three workmen commenced excavating and early yesterday morning they found \$16 worth of gold dust and nuggets in a jar. Later they unearthed an iron box containing \$30,000 worth of the precious metal. The Indian woman claims there is a great deal more to be unearthed. Over 2,000 people have gathered in the neighborhood of the mound, and 50 armed men are guarding it.

MEDICAL MEN

Are Interested in the Discovery of a Remedy for Bright's Disease.

MONTREAL, Nov. 22.—The subject of kidney disorders and diseases is one receiving special attention from the medical profession just now, probably owing to the fact that a disease of these organs caused the death of Russia's Czar. Among other points attractive to the profession is the case of Dr. McCormick, of Richmond, Que., a practitioner well known throughout Quebec and Ontario. He has lately published a letter announcing that he was cured of Bright's disease by Dodd's Kidney Pills. This case has a peculiar interest for medical men because, until these pills were offered for sale, this disease was universally considered incurable. That belief is now thoroughly exploded by the success of this remedy, to which numerous victims of the disease owe their lives and sound health.

Somebody Hold Senator Hawley!

NEW HAVEN, Conn., Nov. 22.—At the annual banquet of the New Haven Chamber of Commerce last night Senator Hawley condemned the spirit of the National Strike Commission, which, he said, was socialistic in its teachings. He declared his belief that in a century the United States would dominate the world.

A Hideous Discovery.

CITY OF MEXICO, Nov. 22.—A hideous discovery has just been made near Chapultepec, Michoacan, by a freighter named Paragomez. The find consisted of 30 human bodies in an advanced state of decomposition and piled one upon another. In a way which was almost impenetrable to the senses of the stench emanating therefrom. Many mysterious murders have occurred in Michoacan during the past few months by a band of bandits.

My Toothache!

Is an exclamation heard every hour in the day. Toothache is the most common ailment of young and old, and in the aggregate inflicts more suffering than perhaps any other single complaint. A one minute cure is just what every person desires to possess. Nervine—nerve pain cure—acts almost instantly in relieving the agony, and a simple bottle affords a quantity sufficient for 100 applications. Ten cents fills the bottle. Rolan's Nervine is the only positive remedy for toothache and all nerve pains. Sold by all dealers in medicine.

WESTERN ONTARIO.

The Late Father Molphy's Career—Costly Spite—Windsor's Jack the Hunter—A Sterling Liberal Honored in Oxford.

Guelph has a Limburger club. W. D. Balfour, M.P.P., has entered about 100 appeals against the Amherstburg voters lists. The Conservatives made no appeals.

The Thamesford Record made its appearance last week. It is edited by Mr. J. A. Young, and contains a considerable amount of interesting local news. Wm. Marshall, Windsor's Jack the Hunter, who is now doing a 30 days' sentence for assault, has been released and arrested upon the complaint of Miss Dickson, who says he is the man who knocked her down on Ouellette avenue a couple of months ago.

Henry Nelson, of Stratford, was put out of the Windsor Hotel recently. The next Sunday he bought a drink and a cigar there and had the proprietor arrested and fined for breaking the law. Nelson admitted he did it for spite and he was fined \$10.

The marriage of Mr. B. Forsyth Masson, of the Detroit, Grand Haven and Milwaukee and Grand Trunk Railways, Detroit, and Miss Edith Gauthier occurred at the residence of the bride's parents, 27 Victoria avenue, Windsor, on Wednesday night. Many guests were present.

A Woodstock dispatch says: The courts having discharged the capias in Woods vs. Pentland, Dr. Pentland occurred at the residence of Mrs. Woods, Henry Muma and Charles A. Muma, of Drumbo, for alleged conspiracy, slander and for making false and malicious statements which caused his arrest.

A number of Woodstock grocers and fruiterers have received drafts within the last few days from the firm of A. G. Gibson & Co., Toronto, for amounts ranging from \$2 to \$18, which had already been paid the traveler upon delivery of the goods. The local merchants are in a quandary as to whether they will have to pay for the goods a second time, Gibson & Co.'s traveler having levanted.

What might have been a fatal accident happened at Thos. Senne's, Edgemoor, on Wednesday. James Decey was in the kitchen of others, raising his derrier preparatory to boring for gas, when by some accident the bottom slipped, precipitating the whole institution on Mr. Decey. The soft nature of the soil saved him from sudden death. He was crushed into the earth and his ribs were broken.

The Indians on Walpole Island held their election for chief and councilors a few days ago. The election was carried on in a quiet and orderly manner. There were 12 candidates for chief and 28 for the council. Louis Fisher was elected chief, and Joseph White, Philip Keyolik, Womassum and Peter Miskakom for the council. The council-elect took office on Jan. 1 next, and remain in office for five years.

Tuesday night about 350 friends of Mr. Alex. Wood, of East Nissouri, met at his residence and presented him and his good lady with a beautiful suite of parlor furniture. The occasion of this was the presentation of his steadfast fealty to the cause of Liberalism and Sir Oliver Mowat during the late Provincial elections. He had been a Patron, and because he would not allow Mr. Mallory and Mr. Wrigley to dictate to him he was subsequently expelled from the lodge. The address was read by Mr. Fergus McMaster, and the presentation made by Messrs. E. Brown and Wm. McLaren. Mr. James Sutherland, M.P. for North Oxford, was present, and performed the duties of chairman.

The late Father Molphy, of Ingersoll, was a native of Longford, county Meath, Ireland, and was 43 years of age. He was a student of St. Francis Xavier College, Sixteenth street, New York, where he completed his studies at Sandwich and Montreal, and was ordained a priest in 1875. He was first appointed curate at Amherstburg under Dean Laurent, P.P., of Sandwich. Afterwards he was appointed to St. Anthony's, from whence he was transferred to Maidstone, and in 1884 to the vacancy in Ingersoll. He died a member of the C. M. B. A., of which society he was past grand, and spiritual adviser of the local branch, No. 19. He was a man of bright intelligence, of sterling worth, a model to his congregation, a credit to the priesthood and an honor to society.

MIDDLESEX MATTERS.

Thieves the other night burglarized McRae's Hotel, Glenora, and Mead's Hotel, Ardville. They secured some fine watches at McRae's and at Mead's captured all his stock of second hand watches, whiskeys and cigars. No trace of the thieves as yet, although the police are scouring the country right and left.

TRAGEDY AT MONTCELLO.

Two Men Killed by a Boiler Explosion in T. E. Essery's Sawmill.

ORANGEVILLE, Ont., Nov. 22.—Shortly after 5 o'clock yesterday a boiler exploded in the sawmill of T. E. Essery at Montcello, near Grand Valley. The explosion caused great havoc, blowing the mill to pieces and killing two Orangemen, namely Robert McQuarrie, aged 24, and Alex. Darragh, an elderly man, whose wife and family live here. McQuarrie's widowed mother also lives in town.

Several men were badly injured. Otto Hendrick had an arm broken; Jas. Bowler and two men named Walker and Cooper, with several others, were badly hurt.

Senator Tasse Seriously Ill.

MONTREAL, Nov. 22.—Senator Tasse, the well known politician and editor of the Minerve, is very ill, and is not expected to recover.

Important Arrest.

MONTREAL, Nov. 22.—J. R. Bourdon, St. Albans, was arrested tonight at the Grand Trunk station on a charge of stealing passengers' goods from the trains. In his possession was found plans of the cars of nearly all the railroads. The arrest is an important one.

The Vandeville Syndicate.

ALBANY, N. Y., Nov. 22.—The association of vandeville managers of America was incorporated today with the Secretary of State to the business of supplying all kinds of attractions, performers and entertainments for the opera houses, theaters and music halls in the United States and Canada. The capital is \$20,000, and the principal offices will be in New York. The directors are Wm. J. Gilmore, of Philadelphia; Henry C. Miner and Jas. Donaldson, of New York; Marvin S. Robinson, of Buffalo, and Jas. G. Butler, of St. Louis, Mo.

Murdered for Money.

KALAMAZOO, Mich., Nov. 22.—William Wickwer and sister, living three and a half miles west of Kalamazoo, this county, were the victims of a murderous assault at 7 o'clock last night. At that hour a stranger knocked at the door and asked for Mr. Wickwer. He responded and was met with a shower of bullets, three of which took effect. He is fatally injured. His sister was hit with one bullet, but her condition is not dangerous. The sheriff and all his deputies and a large posse of men are in search of the man guilty of the murderous assault, and lynchings are freely talked of if he is captured.

THANKS DUE TO WHALERS.

How Their Stiffened Joints Have Aided Science.

The Peruvian Indian and Barbarous Asiatics All Come in for a Share of the Praise—The Wonderful Development That Has Followed the Whalers' Discovery—What Science Owes the Unscientific.

It is a curious and noteworthy fact that medicine owes to the unscientific most of the valuable remedies used for the cure of disease. We received quinine from the Peruvian Indian, opium from the barbarous Asiatics and Cod-liver Oil from ignorant whalers, who, because it softened leather thought it would also soften joints stiffened with rheumatism.

These whalers used Cod-liver Oil externally for years before they tried taking it internally, but when they took it internally they found it did them more good, and the best remedy today for chronic rheumatism. The medical world realizes this fact and prescribes Scott's Emulsion of Cod-liver Oil almost universally for this complaint.

In 1784, one hundred and forty years ago, the first treatise written on the value of Cod-liver Oil as a cure for rheumatism by a Dr. Percival. Seventy-five years later—1829—an article was published showing that Cod-liver Oil was good for skin diseases due to rheumatism, and in 1848, about 50 years ago, the oil came into use as a cure for consumption.

Thus for 200 years at least Cod-liver Oil has been steadily gaining ground, as a cure for disease. It may have been in use for even a longer period, but it can be traced back two centuries with absolute certainty. It is within recent years, however, that it has developed a wide scope and scientists have learned its true nature and many uses.

It cannot now be said that physicians have really reasoned out the "why" of all its beneficial effects, but experience has revealed some of its underlying principles and science is still at work trying to determine the reason for some of its remarkable results.

About 25 years ago physicians came to the unanimous opinion that in order to realize the full benefits of Cod-liver Oil, it must be taken in the form of a food. The illustration of this principle is to be found in the use of butter fat. It is perfectly clear that to get the greatest benefit from butter fat it should be taken in its emulsified form of cream. To put raw butter in the stomach and derange digestion, whereas if taken in cream the nourishing properties of the butter fat are assimilated without effort.

Exactly this principle applies to Cod-liver Oil. The oil is likely to upset the stomach and excite nausea, but in the form of Scott's Emulsion it is natural, easy on the most delicate stomach, and its taste is completely disguised.

But Messrs. Scott & Bowne, the proprietors of Scott's Emulsion, have done more than make a perfect emulsion of Cod-liver Oil. They have combined the emulsified oil with the Hypophosphites of Lime and Soda, adding to the potency of each of these valuable constituents. The hypophosphites form a basis for healthy bone development, assist in the construction of healthy tissue and are a great tonic for the nervous system. Indeed, these hypophosphites alone are a great factor in toning up the system and warding off disease.

This happy combination, therefore, of Cod-liver Oil and Hypophosphites, as found in Scott's Emulsion, is the best possible nutriment to overcome the many ailments where a loss of flesh, or diseased or depleted blood is indicated.

The uses for Scott's Emulsion comprise such forms of waste as consumption, scrofula, anæmia and chronic rheumatism, and the wasting of children. Scott's Emulsion is the most efficient nutriment that can be taken by children in addition to their ordinary food. It improves the appetite, builds up the system, and is easy for assimilation, and combines with these also materials for solid flesh and healthy bones.

Scott's Emulsion has completely revolutionized the administration of Cod-liver Oil, and multiplied its usefulness by making it a practical and efficient remedy in cases where the plain oil could not be taken. All druggists sell Scott's Emulsion.

MONARCH OF THE CASCADES.

Strange Transformation in the Appearance of Mount Tacoma.

SAN FRANCISCO, Cal., Nov. 22.—Great excitement has been caused through the Puget Sound country by what is looked upon by many as an eruption of Mount Tacoma, or Rainier, 14,444 feet high, and one of the loftiest peaks there. The mountain has lately been strangely transformed. The great snow-covered mountain of the Cascades has changed, the cone having fallen in, and steam can be seen rising from the crater. There is no eruption, it is believed by those most competent to judge, but great masses of rock seem to have fallen. The snow-capped cone has disappeared and a sharp-pointed peak has risen in its place to the east of the crater.

The changed appearance of the mountain is evident from the streets of Seattle, 90 miles distant, and thousands of people have watched the great peak all the afternoon. But a very few people have ever ascended the mountain, and at this season of the year the ascension is an absolute impossibility. There is no way of making a thorough investigation of the phenomenon.

A FISHING LINE DISPUTE

That Must Go to the Courts Before Uncle Sam Takes It Up.

CLEVELAND, Ohio, Nov. 22.—A Washington special to the Press says the letter of the Lake Erie fishermen, complaining that the Canadian officials on the cruiser Petrel illegally removed their nets from a portion of the lake belonging to the United States, has been referred by the State Department to the British embassy. At the State Department it was stated that it would have to be decided in the courts. If the American fishermen had set their nets north of the imaginary line which is drawn directly through the lake from east to west, then they were in Canadian waters, and Canadians had a right, under the treaty, to seize their nets and contents. If, however, they can prove that their nets set south of the line, or in other words, in American waters, then they will have a good case for heavy damages, and the United States authorities will back them to the hilt.

Little Things.

"Little deeds of kindness, Little words of love, Make our earth an Eden, Like the heaven above." Pierce's Little "Pelle's" is a sovereign cure for constipation, biliousness and all minor troubles. Smallest, cheapest, easiest to take. According to a custom of Korea all loyal Koreans must wear a white hat for three years after the death of one of the royal family.

CHATTELLE'S CASE.

An Interview with the Culprit's Half-Brother.

Who Decides It Will Not Be Advisable to Defend the Murderer.

Mr. Malcolm Macfarlane, of Stratford, was in St. Hyacinthe, Que., a few days ago, and availed himself of the opportunity to call on Eusebe Chatteille, the half-brother of the confessed murderer of Jessie Keith. Eusebe Chatteille keeps a grocery store in St. Hyacinthe, and appeared to be doing a flourishing business. He is a tall, dark, straight-looking man of 32 years of age, and is smart and business-like. He is assisted in the store by his wife, who is a tidy-looking woman. They speak English fairly well.

Chatteille (the prisoner) left St. Hyacinthe when his half-brother was only 2 years old, so that the latter never saw him until he returned there last spring. Eusebe knew from his father that there was such a brother. While in St. Hyacinthe the prisoner worked as laborer on a railway, and appeared to be very quiet. All who knew him were shocked to hear of the murder, and the laborers with whom he had worked all said that they had considered him very quiet. To his half-brother, especially, the news was a terrible shock.

"If we had never seen him," he said to Mr. Macfarlane, "it would have been nothing; but it seems terrible that he should go away and commit such a murder after coming home and getting acquainted with us."

Mr. Chatteille said his father had been married three times, the prisoner being a son of the second wife, and himself a son of the third. The prisoner had two full sisters, one of whom is in a convent. There were two girls by the first marriage and one by the last. They are all married, excepting, of course, the one in the convent. The sisters have not been informed of the murder, although they may have heard of it.

He had several letters from parties in Toronto making inquiries about his brother's insanity, and offering to defend him on that plea. Eusebe, however, thinks his brother is perfectly sane, and asked Mr. Chatteille minute details of the evidence against the prisoner. Mr. Macfarlane said he didn't think it would be advisable to defend him. "It would not be advisable," assented Mr. Chatteille in response.

Mr. Chatteille asked what it would cost to come to Stratford. On being informed that it would cost \$25, he remarked that he thought he would come and see his brother.

ENGINE MADE OF FLOWERS.

Unique Feature of the Michigan Central Yard at Ypsilanti, Mich.

What can be accomplished in the way of decorative gardening that is unique and effectively serves the purpose for which it is designed is shown in the station grounds of the Michigan Central at Ypsilanti, Mich., says the Buffalo Courier. The chief feature is a locomotive that, from cab to pilot, is made of a variety of plants, ingeniously selected for their respective purposes, the whole structure presenting something that is both novel and attractive. In the composition of the engine something over 2,800 plants are used, the botanical names of which are given below: Boiler, alternanthera, spatulularia; wheels, alternanthera, spatulularia, with sedum variegatum; between wheels and spokes of wheels, roosa, echeveria metallica; bell, alternanthera aurea; chimney, white, sedum variegatum; smokestack, sedum variegatum; cab, alternanthera variegatum; roof of cab, aclyanthus indeni; windows of cab, echeveria secunda glooc; cow-catcher, alternanthera variegatum and sedum variegatum. The device was designed and executed by John Laidlaw, the Michigan Central official florist, who has charge of the greenhouse at Ypsilanti. Some idea of the extent of the Michigan Central's greenhouse at Ypsilanti may be gained from the fact that the twelve months ending Sept. 1, 1894, there were distributed to passengers upon trains 28,383 bouquets, and in addition 455 large bouquets were sent to the hospital at Detroit. The company's greenhouses at Niles are about as large, and the two together undoubtedly make the Michigan Central the largest grower of flowers among the railway companies of the world. That the beauty of the station grounds (and the station buildings themselves for that matter) along the line of the Michigan Central has contributed to the fame and popularity of the road and has been of financial benefit to it is probably indisputable.

HERE, THERE AND EVERYWHERE.

A NEW cannon, invented by Col. Deport, has been tried in France with excellent results. The gun, which does not recoil, fires at the rate of 25 shots a minute and can be worked by three men.

The expedition under the governor of German East Africa to punish the Wahehe for the destruction of the Zelewski expedition in August, 1891, has been abandoned. Swarms of locusts have devastated the country and caused a famine.

TWENTY-FIVE miles of the Congo Railroad, forming the first section between Matange and Kenge, are completed at a cost of \$100,000 per mile. The line will be 93 miles long and will connect the immense waterways above the falls with the sea.

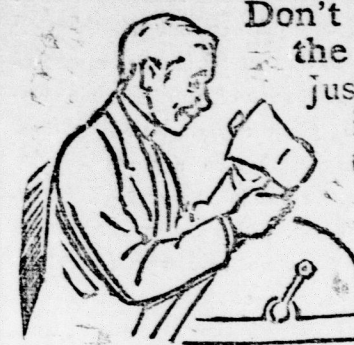

The City Railway Company, of Berlin, has adopted the nickel-in-the-slot plan for selling tickets during busy hours. The machines are so constructed that the coin drops out again if a wrong one has been used or if there are no more tickets to come out.

AT THE opening service of the Synod of Glasgow and Ayr, held in Glasgow Cathedral, a clergyman in the congregation shouted to the choir to cease their interruptions of the worship of God by singing "Amen" at the close of the prayers. He also protested against the reading of the prayers by a young man.

MOURNING for the late Czar is a very serious business in Russia. For months cities, towns and villages will be dressed in the present dismal garb of woe. The people drape themselves in coarse, heavy woolen materials, disagreeable to the touch and unresponsive to the light, and made in shapes that denote nothing of the figure they shroud. Complete indifference to everything but grief for the illustrious dead has to appear both in demeanor and dress.

Give Holloway's Corn Cure a trial. It removed ten corns from one pair of feet without any pain. What it has done once it will do again.

It is very important to know where to find the bedroom sets at low prices. When buying call at Trafford's and you will find them. 95 and 97 King street.

Don't be the Axe! just keep in mind that the grocer or the peddler has

"an axe to grind," when he tells you that he has something "as good as" or "the same as" Pearlina. There can be but one reason—more profit to him by your use of the substitutes.

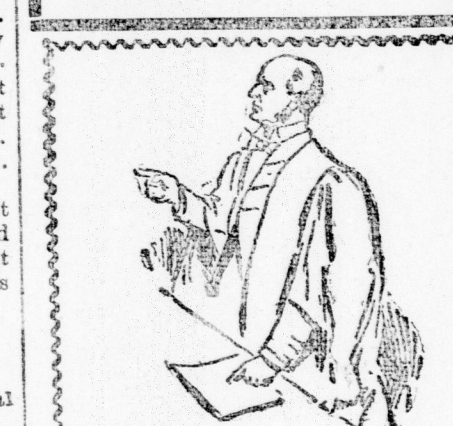

But how is it with you? What reason can you have for wanting to take the risk? Certainly not economy—Pearlina leads to the greatest economy in every direction—saves the most money, time, clothes and health. If your grocer sends you an imitation, be honest—send it back.

Absolute Purity Guaranteed

Responsible physicians have lately said that the purest and most economical is

Liebig COMPANY'S Extract of Beef

Free from fat and gelatine, of fine flavor, its excellence never varies.

The greatest medical authorities and scientists in the world recommend Adams' Tonic Food for Indigestion. Among them Dr. CYRUS EDSON, Health Commissioner, and R. OGDEN DOERNUM, M.D., LL.D.

Allow no imitations to be palmed off on you.
