(CONTRACTOR CONTRACTOR Young Abbot clenched his hand at this and half arose from his chair, a muttered imprecation on his lips; but the proprietor was a powerfully built man, and he wisely refrained from his half-formed purpose to knock him down.

"How about the young lady's bill?" he questioned with a sneer. "I can't understand how your conscience will permit you to harbor her when you turn me loose with such devilish sanctimonious-ness."

you to harbor her when you turn me loose with such devilish sanctimoniousness."

Just then an agonized voice from the djoining room was heard to cry out:

"Don't let him come in!—don't—don't!"

"The young lady is all right," said the landlord, his face softening at that cry of distress. "It is evident that she came here in good faith, and I intend to throw around her my protection, until I can learn who she is and where she belongs. It is a mercy that your miserable plot failed, and I believe she owes her escape to a providential inspiration."

Abbot looked up with surprised inquiry. "Failed!" he repeated; "how so? and to what providential inspiration do you refer?" this last with an extremely disagreeable sneer, and with an air of incredulity which plainly indicated that he did not believe that Agnes had escaped him, even though for the time being he was foiled in his purpose of bringing her to his terms.

"I do not care to bandy words with you, sir," returned the proprietor, sternly, and longing to make the impudent villain measure his length upon the floor. "I simply want you to understand that I am going to take care of this girl until she is able to leave here, and if you dare to trouble her in any way I will have you arrested, and do all I can to make you suffer to the extent of the law."

"I'm not to be bullied by any petty threats," muttered the young man, doggedly.

and then take yourself off."
The young man saw that he meant what he said, and it would not be safe to defy him any longer. He sullenly pulled out his pocketbook and paid over the required amount, and then, upon receiving the receipted bill, slunk out of the room and from the house.

A tap on Agnes' door brought the house-keeper quickly to answer it.

A tap on Agnes' door brought the house-keeper quickly to answer it.

"I cannot find out who she is." Mn Harwood said, as she came softly into the room, "but I want you to give her the very best of care until I can get a nurse. I am going to send at once for a doctor, and he will probably recommend some one. How is she now?"

"A trifle more quiet, sir, but still so felirious that we can't get anything out that seemed capable of instantly reading the inmost thoughts of clients, or anyone else with whom he came in contast, yet he was suave and affable in manner. Max greeted him courteously, asked him to be seated, and then politely waited for him to state his business.

He was not long in availing himself of the opportunity, and startled Max by remarking:

"I fear, Mr. Remington, that I have of hearts, and the politely waited for him to state his business.

And this Christian gentleman, remembering One who said "I was a stranger, and ye took me in," went below to telephone for the most skillful physician of his acquaintance to attend the stranger. his acquaintance to attend the stranger.
The doctor arrived in the course of half an hour, and declared that the patient's symptoms indicated pneumonia,

with a typhoid tendency.
"She is a very sick girl," he gravely informed the housekeeper, "and she must have an experienced nurse immediately." The woman then made inquiries of the allroad officials, but could gain no clew there; no one remembered having seen a "young girl traveling alone" who answered her description. Her last resort was uppeal to the police, but more than a k went by, and, in despair, Mrs. Gardthen wrote to Mr. Archibald, giving an account of Agnes' disappearance, begging him to tell her what she uld do next, for she feared some terrible thing had happened to the "dear As soon as he received this letter, which

"But, Laura, you know it was all a mistake," Mrs. Remington had argued.
Laura smiled bitterly.
"Then it is a mistake that has ruined my life," she retorted.
"I hope not, dear," Mrs. Remington returned gently: "I realize that it is very turned, gently; "I realize that it is very uncomfortable for you; but it is no less so for my son. Mrs. Remington was taken ill almost immediately, and so neither she nor Max were able to take any steps to discover the girl's whereabouts, and they heard nothing from her until the end of a week, when they were suddenly overwhelmed by an astounding revelation regarding her, from an unexpected quarter.

CHAPTER XXIV. One evening Max was sitting in his library, feeling very lonely and miserable, both on account of his mother's illness and the unfortunate misunderstanding with Agnes, when a servant entered, bearing a card upon a tiny silver salver. silver salver.

But he betrayed nothing of this.

"Indeed!" he simply remarked, and then waited for further developments.

"At least, I am afraid you will so regard it," Mr. Field returned. "I understand, to come to the point, that, although you are not really Mrs. Remington's son you regard yourself as the though you are not really Mrs. Reming-ton's son, you regard yourself as the heir to the Remington property—that you are so regarded by the lady herself." Max looked at the man with an expres-

"That was all very wise and thoughtful in the lady," the lawyer blandly remarked; "but, sir, I told you my errand was unpleasant. I am here this evening to present to you the claims of another heir to Mrs. Remington's property." while the fever burned so hotly in her veins that both nurse and doctor feared the would never rally from the disease.

Meanwhile Mrs. Gardner was almost distracted on account of Agnes' prolonged and unaccountable absence.

When she did not return at the end of the second day, she went herself to Elgin, to Mr. Knight, asking tidings of her. But that gentleman could give her no definite information. such a declaration appears to me?" Max asked in a decidedly skeptical tone. "Such a contingency could not possibly arise or exist, except in one way."

"Are you sure? But please explain in what way it could arise, according to your belief," said the lawyer, composed-

"Certainly. My mother lost a little daughter, many years ago, under very peculiar and distressing circumstances. She has always, or for long years, believed her to be dead, although that fact has never been fully established. Could it be proved that this child is living—could she be restored to her mother, she alone would be the true heir to the Remington property, and, in such an event, I should be only too happy to relinquish my claim to it. Is it to produce this daughter that you are here this evening, Mr. Field?" Max asked, in conclusion. "Certainly. My mother lost a little

The veteran umpire, Bob Emslie, is out with a protest against the National League's latest scheme, that of abolishing the system of fines and allowing an umpire to penalize a player only by removing him from the game. Emslie says the men cannot be disciplined as well in this way as by a system that touches the pocketbook. AFTER BRADLEY AND EARL MOORE.

Nashville, April 19.-It is reported that Billy Bradley, third baseman of the Cleveland team, has an offer of \$12,000 for three years, with contract assuring the salary of \$4,000 per year for that period, regardless of any disability that he may suffer. Earl Moore, the pitcher, has also been approached by the same party that talked with Bradley. It is understood that Cincinnati is the club that wishes the men. 100 MILE RACE. Preparations are under way for the third annual 100-mile road race at Milwaukee on Decoration Day, under the auspices of the American Century Wheelmen, entry sheets having been already distributed throughout the middle west. The race will be over the Wheeling, Libertyville, Waukegan course, one of the best in the country. Besides time prizes, there will be inducements for the place riders. Every contestant finishing within ten hours receives a prize. Entries must be in the hands of A. E. Abram, 440 East Thirty-Eighth street, Chicago, by May 24, inclusive.

the stretch at the time. Of all the machines seen in the east the McGinnis machine undoubtedly is the swiftest and the best, says a writer in the New York Press, and it is ithe best not alone because it is the swiftest, but because with it the starter is the dominant and dominating force at the post. The Clark machine has some merits, but that it is not to be compared with the McGinnis apparatus was proved conclusively when it was given a thorough trial and cast aside ast summer. Nor has any machine a chance of faring any better when tried alongside the McGinnis machine. The atter machine is the quickest and best that has been seen. It is absolutely under the control of the starter. With it the best results yet shown by a starting machine have been produced. There have been machines with great-

er reputations, but always for doing something somewhere else. It has been adopted by some of the biggest training establishments. Horses have been trained to break from it, and to adopt t would seem to be the fair and only easonable thing to do. You cannot train a horse to break from a slow moving machine and expect him to get away well from a swift moving one; but if he is trained to break from a swift moving one the best results may e anticipated, and, in any event, the trainer has done everything that it is possible for man to do. As already said, the main thing to be desired is uniformity. Let it be the one machine everywhere. And, so far as results and experiments have gone, common sense would seem to dictate that that machine should be the one which bears the name of McGinnis.
