A Curious Mistake.

Mr. A. was a happy man as he stood on the deck of a huge ocean liner, surrounded by his family. He felt contented because he had tightly locked up a well-insured house and left the keys in charge of a well-known real estate agent. "A far better arrange-ment," he explained to a friend on board, "than leaving your house in charge of servants, who might do anything, and end by

happy had he known what was going on in house. After listening to his requirements the agent turned to one of his clerks, saying: . X. : take the kevs and show him over the house." By some oversight, however, the clerk misunderstood the number, and instead of taking the keys of the house indicated, he selected those belonging to Mr. A.'s home, which was next door, and, accompanying their client, showed him over the premises. It was a far larger and finer home than Mr. X. had expected to get for his figure, and much better furnished. Returning to the office he closed the bargain at once. The same clerk was told to make out a lease. He still supposed it to be for Mr. A,'s house. and took the two forms to the new tenant. do, and received the first quarter's rent, which Mr. X., who was a ready-money man, ces the mistake remained unfamily, which consisted of Mr. and Mrs. X., riegen children of ail ages and what poor Mrs. A., who was a particular person, would have considered a totally inadequate number of servants, took possession. On examining their new premises the new tenants could hardly believe their good fortune. Mr. X. the children discovered plenty of toys in the bicycles, left there apparently for their use,

and which they immediately appropriated. her beautiful home. The X. children reigned supreme, the servants were slatternly, the mother incapable and untidy. So the summer went by, the A.'s travelling happily through Europe, and the X.'s in possession home. As they had not collected their serhotel, and then, taking his duplicate key, started up to have a look at his house. The sequel beggars description, and it is left to the reader's imagination

Value of the Sun's Rays.

curative value of the sun's rays: It is astonishing how few people there are who properly estimate the hygienic value of the sun's rays A valuable lessen on this point may be learned by observing the lower animals, none of whom ever neglect an opportunity to bask in the sun. And the nearer man approaches to his primitive condition the more he is inclined to follow the example of the animals. It is a natural instinct, which civilization has partially destroyed in the human race. The effect of sunshine is not merely thermal. its rays have chemical and electric functions. It is more than possible that sunshine pro duces vibrations and changes of particles in pain, neuralgic and inflammatory, is more effective and lasting than that of any application whatever. Those who have face ache should prove it for themselves, sitting in a sunny window, where the warmth falls full on the cheek. For nervous debility and insomnia, the treatment of all others is rest in sunshine. There is no topic like it would a sunshine. There is no topic like it would are not culture for the attainment of the attainment of knowledge, we have mechanical effort to pass examinations. With curious perversity, too, these examinations are conducted as if to find out what the students should prove it for themselves, sitting in a sunny window, where the warmth falls full on the cheek. For nervous debility and insomnia, the treatment of all others is rest in sunshine. There is no topic like it would as the conduction of the all-round sort, running through all off the all-round sort, running through all is life. He has a constitution that enables him to endure hard labor. It is a notable fact that in all of our colleges the very best students are the boys from the farms. In the workshops, in the halls of legislation, at the bar, in the forum, in the pulpit, minety and on the case.

The property is beautifully situated on the ment of knowledge, we have mechanical effort to pass examinations. With curious perversity, too, these examinations were the action that can be should prove it for themselves, sitting in a sunny window, where the warmth falls full on the cheek. For nervous debility and insomnia, the real round sort, running through all there." There is a kind of broad intellect, of the all-round sort, running through all is life. He has a constitution that enables him to endure hard labor. It is a notable for the all-round sort, running through all there." The property is beautifully situated on the mail variety rode from the policy. It is a notable for the all-round sort, running through all there." The property is beautifully situated on the missing through all the same to the all-round sort, ru sunshine. There is no tonic like it, provided prostration up speedily, a most efficient part of the treatment would be to expose the limb or the person as many hours to direct sunlight as the day would afford. With weak hours. If internal humor or ulceration is suspected, let the sun burn through the bare akin, directly on the point of disease, for their natural bent. hours daily. There will be no doubt left in the mind that there is a curative power in the chemical rays of the sun. For the chilliresort to the sun-let it almost blister the skin, and the circulation will answer the attraction. It is a finer stimulus than wine, electricity or massage, and we are on the ginning to fly them for amusement like the verge of great therapeutic discoveries con-

following tribute to the late Archibald Lampman: I can remember no poem of Archibald Lampman's in which I was not sensible of an atmosphere of exquisite refinement, breathing a scent as rare as if it drifted from beds of arbutus or thickets of eglantine, where he led the way. His pure spirit was electrical in every line; he made no picture of the nature he loved in which he did not supply the spectator with the human interest of his own genial presence, and light up the scone with the lamp of his keen and beautiful

He has his own way of showing it of course, intelligence. He listened for its breath, its pulse; he peered into its face, and held his ear to its heart, with a devotion none the people of sense all over the world must less impassioned because his report of what he saw and heard was so far from vehemence with its loveliness he coul I not help crowding his verse with the facts that were also dear to him; but one knew from its affluence that not a scent, or sound, or sight of the Canadian summer was lost upon his quick sense, and one saw how he could not bear to forbid any, in a world finding its way through his music of wing, of foot; the drifting odours of wood and field; the colors of flowers, of skies, of outside fire escape. After that he should dusty roads and shadowy streams and soli- familiarize himself with the location of the tary lakes, all so preciously new, gave his readers the thrill of the intense life of the thrill of the intense life of the roof of the adjoining buildings. He

-What period of life is most enjoyable This is a question suggested, says London Tit-Bits, by the gossip of the veterans as in-teresting as that of their diet or their habits Mr. Frith R. A., by the way, declares he has no rules about eating, and he tells a friend who gives porridge as the secret of old age, that if old age can only be had by living on porridge he prefers a short life. As to the enjoyable period of life, the late Mrs. Keeley said life grew healthier as the years went on, and that mankind had better days before it than behind. Mrs. Cady Stanton, who is eighty-three, says that life was never fulle r sweeter to her than it is now, when she understands the true philosophy of life, and wastes no energy in regrets of the past of

MATERIAL LITTLE KNOWN GENERALL Of the great variety of drugs and chem cals which play an important part in the commerce of the world little is known by general public. The importation into the United States of balsams, barks, beans, flowers, gums, herbs and leaves gathered from every part of the globe foots up in of the London Live Stock Journal. The atvalue annually to nearly \$50,000,000, while | tendants upon horses-at least a section of the exports of similar products from this country have now reached a total of about is of iron construction, something in the \$10,000,000. But of the hundreds of differnature of a machine, in place of being built ent names on the list with which the impor-ter and wholesale drug dealer are familiar his absence. Shortly after his departure a there are acores which are almost perfect man applied at the real estate office for a strangers to the lay mind. Along with alstrangers to the lay mind. Along with al-cohol, borax, opium, quinine and other well known drugs will be found cantharides, cocculus indicus, crystallose, lycopodium, meli-

equally enigmatical character. In this latter class might almost be men tioned sugar of milk, which occupies one of of the drug would imply common knowledge, though, as a matter of fact, few understand its important uses. Time was when every ounce of this drug was imported from Europe. Today, thanks to American enter prise, it is manufactured in the United States on such an extensive scale that not only is the enormous domestic demand supplied by the homemade product, but large quantities are annually exported. When it

prepared in 1619, although not introduced into medicine until 1698. It is used almost entirely by pill manufacturers on account of its neutral, filling properties. It is absorbed lutely neutral, inodorous and with a slightly sweet taste. As a vehicle for all manner of pulverized medicine it is perfect. Acids and drugs of all kinds with which it may be mixed do not have any effect upon it nor i upon them, and in the human stomach it is most easily disposed of.

It is manufactured from the whey of cow's milk, and is really a byproduct of milk. The process is one of evaporation and recrystallization. Switzerland once had a mor opoly of its manufacture. Now Illinois eads the world, while a large factory has been started in New York state, which gives promise of producing as much as its western predecessor. Such has been the success of the American industry that the product is shipped even to Switzerland, where it is able to compete satisfactorily with the European makers.

In crystal form it resembles rock candy being white in color. The growing demand for it has been caused by the development of patent medicines in pill and tablet form, where bulk is desired. It is said to be exported in the form of powdered sugar for the eason that low freight rates are thus secured. Otherwise as a drug the cost of ocean transportation would be largely in

-Cramming is undoubtedly the greates evil connected with the public school system, and, taken with the stress laid upon examinations as a test of merit, has done much to reduce popular education to con ditions resembling those in vogue in China Its effect upon teachers is as stunting as it is benumbing on pupils. It transforms what should be a free and bracing exercise of the intellect into a mill-horse grinding mono end rather than a means, and pupils cramthe good effects are not neutralized by ill feeding. To restore a withered arm, a palsied feeding. To restore a withered arm, a palsied feeding. The tendency of examinations to crystallize into mere formulas is notorious, and has the effect of repressing country, and feed themselves, and the other instead of expanding the youthful mind Thus it not infrequently occurs that pupils regarded as dullards and dunces at school, light as the day would show the chest for have astonished the world with their intellectual achievements when freed from scholastic trammels and allowed to follow

-Kite flying was once only child's play, but now it has become dignified almost into ness which causes blue hands and bad color, a science. Kites are used in war operations to send men up into the air to discover the enemy, and in every day life for the purpose Chinese, and every fair afternoon when the They were born in him, on the farm. The wind is from the west, pedestrians on Broad- were woven into his fibre by years of hard way, New York, may see one or more American flags floating apparently unsup-ported in midair. Then if the spectator's of his young life developed energy and curiosity prompts him to study the matter long enough he will learn that far away in the blue ether sails a tailless box kite and that to its string this floating flag is fastened while far away in the sky other flags and

kites are similarly displayed. -The kaiser, with his many quips and cranks, has the good of his people at heart the most of his time it is easy to believe. and why shouldn't he? but every little while he comes out with a new scheme that applaud. For instance his efforts have reparts of his empire of free dental service for all pupils of the public schools whose parents cannot afford to pay for this necessity.
In addition to this an oculist and an aurist are also employed by the government to treat the children of these schools who are in need of their services.

-The first thing a hotel guest should do on entering his room is to locate the nearest the roof of the adjoining buildings. He should next learn the position of the stairs and their top and bottom landings. The top landing particularly he should know all about, as well as the method of egress to the roof. All this information the guest can acquire in ten minutes or less. After making these investigations, should a fire break out, he knows his relative location and his various

A New Life Destroyer. London, May 14.—The Daily Mail, this morning, says the Admiralty has offered £75,000 for an electric gun invented by the son of a Portland grocer. The gun throws an explosive not a distance of five and a half miles with a velocity of two seconds. It is noiseless and smokeless.

DAILY MISUSE WHICH LEADS TO INEVITABLE BREAKDOWN, thought, and in this respect the horse is too them-appear to have the idea that a hors up pretty much on the same lines as the human frame. When these erroneous ideas prevail the horse is treated as a machine, its days of utility, its years of work and service are materially curtailed, and many sudde

of horses to have hung in their stables and gan, cutch, buchu, chicle and others of to bring before grooms and drivers some suc rules as the following: Never kick a horse in the belly. Remember that a horse has organs to be injured just as has man, wind the most important positions in the drug transactions of the present day. The title to be broken, injured and sprained. T prevent this, use the animals as you us yourself in regard to drafts and chille Whether in saddle, cenveyance, cart of wagon, never start a horse with the whip ntil previously signalled by the voice. In the ascent of a hill never put on speed until the summit is fully reached, a few yards allowed to recover wind and strength. The bulk of drivers start their horses when 10 or was imported the wholesale price was 30 cents a pound. Now it has declined to 8 puffed by the ascent, the call upon exhausted energies at the very worst time leads to History says that sugar of milk was first ruptured bowels broken wind, sprained

> calls which lead up to the breakdown. More chickens are killed through the

avages of vermin than through all the diseases put together. The birds are so weaktime from five to seven days after the first dressing, also at the same time apply a few

Using Insect Powder.

drops of sweet oil on the heads. When dusting the chickens place a large sheet of paper on the table, and lay the bird n its back. Then part the feathers and shake the powder well in, so that the whole of the skin is covered with it. Turn the bird over and rub the preparation well into the ends of the flights among the quille After they have been well dusted with the powder it should be knocked off the surface of the feathers with the hand, onto the pap er, so that none is wasted.

The Farm Roy Ahead. In every avenue of life where thrift, capa city and energy are required, the man who pushes to the front is the son of a farmer. He has the intellect and push to "get the summit were once boys on the farm half, too. Where are our city lads in the race for life? Fooling curling their hair and polishing their shoes while our rough country boys are plunging along, bare-footed, up the lars in his pocket, a few books under his arm, and his valise in the other, he starts to school Dusty and tired, he is almost be grudged a cup of cold water by some wealthy millionaire in the city suburbs, but some day, that same millionaire will be voting for him for office or some other high position of honor. We may well ask in as tonishment: Where did that boy get his noble purpose and unfaltering courage toil and self-denials on the old country character for futile possibilities. Hurral for the farmer's boy.

Grafting Wax.

Cold liquid compounds are preferable to thers, as they are always ready for use and can be applied with the least trouble. A good formula is here given. Two pounds of cosin, two ounces of beeswax, two ounces of beef tallow and a pint of alcohol. Take the first three and melt together over a fire Boil thoroughly, and after removing from the fire add the alcohol slowly and stir coninually until the mass cools down. Grafting compound prepared in this way may be kept in airtight tin cans for any desired length of time.

-White hellebore-white, remember, is the remedy for the current worm, and worms that eat the leaf of the grape vine in neither of which cases ought paris green to be used. The preferable way of using hellebore is to use it in solution. It is to be recollected that water dissolves neither paris green nor white hellebore, and consequently in applying them the solution must be constantly agitated. Hellebore, in quantities that might attach to fruit, is not poisonous to human beings, yet it is advisable to wash the fruit before eating it.

-It is probable that if farmers generally would plant ten acres of each farm with elm, hickory, ash and whitewood, the principal woods used in the manufacture of carriages, the profits from these ten acres in twenty years would be much larger than from any other ten acres of the farm for the entir period. It is predicted that within a quar er of a century there will be such shortage arriage manufacturing business.

-The fertility of the soil must be kept up an intelligent and systematic plan of nuring and in addition the soil must be put in proper shape for receiving the seed.
When this is done the farmer may rely upon nature doing the rest, and if by chance there should be an unfavorable season, he will be better off by having cultivated his and properly before sowing than if he had

-A well kept lawn, nicely laid out with es and shrubs, gives an appearance of esperity and thrift. Much can be done vay; if it were done there would be i oys wanting to leave the farm.

RHEUMATISM

Sufferers from Rheuma tism have found great benefit from using Puttner's Emulsion

the Cod Liver Oil contained in it being one of the most effective remedies in this disease.

Always get Puttner's, it is the Original and Best.

NOTICE OF SALE!

ELIAS MESSENGER, of Bridgetown, in the County of Annapolis, Farmer, and HENRY S. JONES, of Upper Granville, in the County of Annapolis, Farmer, and tall others whom it shall and may concern: the County of Annapolis, Farmer, and to all others whom it shall and may concern:

The undersigned as mortgagee of the lands and premises and property hereinafter magnitioned by virtue of a mortgage executed to film by Elias Messenger and Permelia Messenger his wife, bearing date the 28th day of June, A. D. 1892, and duly recorded in the office of the Registrar of Deeds in and for the County of Arnapolis, in libro 97, folios 23, 22 and 25, will sell by Public Auction at the Central Court House in the Town of Bridgetown, in the County of Annapolis, on Thursday, the 6th day of July, A. D. 1899, at the beur of two o'clock in the afternoon (local time), under and by virtue of the power of sale contained in said mortgage and because default has been made in the payment of the principal money and interest thereby secured, and in the performance of the covenants and agreements therein contained and in order to obtain payment of the samont due and owing to the said mortgage under said mortgage:

"All that certain piece or parcel of marsh tendons, wornout legs, etc.—a horse spoiled for life. It is not one call, but the daily ease put together. The birds are so weakened by these pests that they are very susceptible to many allments, and where
chickens have been practically killed by lice
in some cases the gall duct of the liver is
found very full. When chickens have many
vermin upon them, their feathers look
a little rough, eyes pale and sunken, there is
a line underneath the eye which gives the
bird a particular appearance, as if the beak
were too long for the head (crown head) and
the wings too long for the body. Even
when the chickens appear strong and healthy
it is well to catch one or two occasionally
and examine them very closely, and if there
are the least signs they should be well
dusted with insect powder twice, the second
time from tive to seven days after the first

ment of the amount and owing to the said
mortgage:

"All that certain piece or parcel of marsh
into Tornain struate in the Township of Granville in
the County of Annapolis, and bounded as follouded and the course of the south-west corner
of lands now in possession of Wallace Young
and the late Daniel Munro; thence following
to a stake in the dyke in range of a line ditch
add the late Daniel Munro; thence following
to a stake in the dyke in range of a line ditch
add on the west by lands of David Durling; and
the late Daniel Munro; thence following
to a stake in the dyke in range of a line ditch
add on the east by Isaac Durling; thence
are the least signs they should be well
dusted with insect powder twice, the second
time from tive to seven days after the first Dated this 23rd day of May, A. D. 1899.

The Shortest and Best Route between HANDSOME RESIDENCE

FOR SALE estead of GEORGE B. MUR is now offered for sale.

The aforesaid property consists of six acres of land under a high state of cultivation, and has on it about two hundred and twenty-five apple trees, all in bearing and capable of yielding annually two hundred and fifty barrels of the best marketable varieties, besides plum, pear and cherry trees, with small fruits.

It has on it a large and well-built brick dwelling house, containing eleven commodious rooms, besides halls, closets, pantry and porches. Also a large barn, coach-house and other outbuildings.

SPRING OPENING - OF-Millinery

MISS A. LeCAIN. MAXIMS ON CLEANLINESS.

Housecleaning is the hinge upon which the oor of health and cleanliness is hung. Many diseases are due to dirt. which, while not causing death, make life a burden. not causing death, make life a burgon.

More disease is removed from a house by proper cleaning than can be cured by all the doctors in the place.

The relation of health and house cleaning is very important, not only because the removal of filth preserves it, but keeps it in good confilth preserves it, but keeps it in good confilth preserves it. The dust of our houses is the dust of our street. We dread it on our clothing but we breathe it in our lungs.

The month of March is the time when all the disease and germs should be removed from our bouses. A. C. HICKS makes a specialty of Whitening, Kalsomining, Albastining and Painting. Also Paper Hanging and House Painting in all its branches. Orders left at Cochran's Shoe Store will be Shop in Murdoch's Block. March 1st, 1899.

Spring 1899! We are now ready for business with

the best stock of goods in our line in the county. We import direct from factory in car lots and can give SPECIAL PRICES WHOLESALE AND RETAIL Write for price list.

Children's Teeth. Children should be trained when very young to clean their teeth regularly, and to nse out the mouth after each meal. The had come into his office to have

round the roots of the teeth, it should be fourteen teeth out at one sitting, and never carefully acraped off with some sharp instrument. It is best to have a dentist remove it. Some people are so negligent as to
and I don't think that I could have even one allow such a quantity to collect that several teeth become soldered together, and if one "Have you ever taken gas?" of them decays and it is necessary to extract it, it becomes almost impossible for the dentist to do so without removing all.

A decayed tooth, though painless, which same as if she hadn't taken it, and it made has a sharp edge, or which in breaking off leaves a pointed stump behind it, should be at once filed, as the irritation caused by the tongue rubbing upon it is a frequent origin of cancer. It is well to wash the mouth

A woman who is building a tiny house, which, however, is the crystallization of her ingenuity and ideas of cenvenience picked hina closet opening from her dining room two deep drawers inserted under the bottom helf. The drawers are each of them 14 inches deep and are lined throughout with tin. In one of them bread is kept and in the other cake. They fit snugly, the cake drawer locking. Everybody knows that the tin bread and cake boxes bought at the shops and kept on the floors of closets are very well while new, but the careless maids opening and shutting them many times alay, soon bang them into a shape which prevents their tight closing. When that ondition is reached, they are about as useess as an open shelf for the purpose for which they are designed, that of keeping out the heat and damp air and also mice, if such infest the place. Housekeepers whose hina closets have been in existence for years will find it an easy matter to have such drawers added.

How to Dry Wet Shoes.

When without overshoes, you have been aught in a heavy rainstorm, perhaps you have known already what to do with your best kid boots, which have been thoroughly wet through, and which, if left to dry in the ordinary way, will be stiff, brittle, and unexperience is of value. First, wipe off gently with a soft cloth all

urface water and mud; then, while still wet, rub well with kerosene oil, using for he purpose the furred side of Canton flannel. Set them aside till partially dry, when a second treatment of oil is advisable. They may then be deposited in a conveniently warm place, where they will dry gradually and thoroughly. Before applying French kid dressing give them a final rubbing with the flannel, still slightly dampened with kerosene, and your boots will be soft and flexible as new kid, and be very little afected by their bath in the rain.

-Combs and hairbrushes should be washed weekly. Use a teaspoonful of ammonia in a basinful of warm water. Move ombs and brushes up and down in the water till they are clean, then ringe in clear, ukewarm water, wipe with a towel and dry n the open air, our of the dust. It is an inpleasant truth that most hairbrushes and use public combs and brushes in public toilet cooms, see one general family comb and brush in the country kitchen, I wonder what the women who sin in these particulars can be thinking of, says a writer who makes the foregoing statements in The Gentlewoman, and recommends the following as a good stimulant for the hair. Bay rum, one pint; tincture cantharides, one dram; castor oil, one ounce; resorcin, one dram. Rub well into the rocts of the hair two or three times

The Sleeping Chamber.

a week.

The Japanese believe in banishing from the bedroom everything that is not really necessary to that department. All things useful they make as decorative as possible, but for mere ornament's sake, little or nothing is added, unless it be a vase containing lowers arranged in their own inimitable way or something else equally simple.

Their custom will bear consideration by the housewives of our eastern world, says the utmost neatness, simplicity and repose are possible. Add beauty and daintiness and little else is left to be desired. Bedrooms so appointed may be easily kept in order and free from dust, that foe to comfort

and health. How to Grow Young.

warm water, aided by a brush, which leaves the body tingling and smooth; a nap or rest for twenty minutes every noon before the system has exhausted its supply of force, a long and rapid walk, which gradually exwith ventilation night and day; a perpetual open air life in summer, a few, but comple gymnastics for 15 minutes a day to supply the muscles and tone the nerves, food com posed principally of fruits and whole bread. with mest once a day and an abundance of salads and nuts, and lastly nights of unbroken sleep for nine hours.

No Wonder You Can't Keep Quiet. If you never wholly give yourself up to his subject. he chair you sit in, but always keep your rise; if you breathe 18 or 19 instead of 16 times a minute and never quite breathe out at that, what mental mood can you be in but one of your inner panting and expect- Bank, N. Didn't Believe In Gas

"Do you want to take gas?" asked Dr.

"Well, that's what I hardly know, do

says that she felt everything exactly the

"My husband's sister's aunt gets her work done Lere, and she says I could depend on the best work and the most gentle treatment, and that If I did take gas it would be of the best; but my sister-inmother took gas in a nice place where she fully. She laughed and hugged the dentist and talked silly and squirmed out of the chair and carried on awfully, and I'd hate dreadfully to do anything of that sort. Then, again, I think: What if I shouldn't come o! I've read of several different person dying in dentists' chairs. My heart ain't weak that I know of, and my doctor says I could take ether or chloroform if I wanted to, but that's something I simply would not take. I've a perfect horror of anything of that kind, and I'd be sure I'd never con sister's husband took ether and never came out of it; and as for cocaine, I'm afraid of it, because my brother's son by his first mar-

"Do you want to take gas? "That's what I want to talk to you about, If I could be sure it wouldn't leave any aftereffects, or make me do anything silly, or aicken me, or—An old friend of mine named Lucy Jane Tardy—her name is Hooper now-she married a man of that name the winter I married my husband, and she lives in Africa now, and has five lovely graphs only last week. If I'd thought, I might have brought them with me. Anyhow, her husband took something to have his teeth out, and Lucy Jane thinks it salivated him, and he did think of suing the dentist-and no one could blame him, either. But ther sightly. If not, you will be glad to learn it wasn't gas he took, and-Well, my teeth what I heard only recently, from one whose don't pain me very much, and I'm in no hurry about having them out, so I'll come in again and talk to you about it; but, to tell the honest truth, doctor, I don't believe very

much in gas. "No; I should think you didn't!" muttered the dentist sarcastically as she diss peared.
