

**NOW READY.**  
A NEW AND CHEAP EDITION OF  
**DR. FOOTE'S**  
**Sexual Physiology for the Young,**  
250 ILLUSTRATED PAGES—CLOTH BINDING.  
Price Only 50 Cents by Mail.

THIS book is one of the series entitled "Science in Story," but is so prepared that it may be published and read separate from the rest. It not only treats of the reproductive organs of plants, animals, and of the human kind, but also of elimination and the importance of having the eliminating organs in a healthy state of activity. Being written for the young, it, of course, can be easily understood by adults, and those who have not the time nor inclination to look into dry books of physiology, will find here, in an interesting form, that which will instruct them in the most important organs and processes of the human system.
