The Council of Nanaimo, B. C., is considering the purchase of an electric light plant.

PERSONAL.

At the recent annual convention of the National Electric Light Association of the United States, held at Washington, Mr. Frederic Nicholls, manager of the Canadian General Electric Company, was elected to the office of second vice-president. We congratulate Mr. Nicholls upon this recognition of his ability, and the National Association upon the wisdom of its choice.

We learn that W. A. Johnson, for ten years General Manager of the Ball Electric Light Co., Ltd., of Canada, and who has since the sale of the Ball factory to the Canadian General Electric Co. acted as general agent for the latter, has terminated his engagement with said company, and will enter into business again on his own account and engage in electric contracting, engineering and installation work.

The citizens of Belleville, Ont., are agitating for an electric railway. The Mayor estimates the cost of construction at \$24,000.

We have received from Mr. C. W. Chadwick, of Rat Portage, Ont., samples of white mica of excellent quality from deposits recently discovered in that locality.

The Bell Telephone Co'y

OF CANADA, LTD.

MONTREAL

MANUFACTURES AND HAS FOR SALE EVERY DESCRIPTION OF

TELEPHONIC and other ELECTRICAL APPARATUS

LINE MATERIAL AND SUPPLIES.

Queen Street.

QUEBEC:

Bell Telephone Building,
St. John and Palace Streets.

WINNIPEG:

Forrest Block, Main Street.

For indoor lighting.

THE EXACT ARC LAMP

NON-MAGNETIC

... FOR ...

Direct-Incandescent or Alternating Circuits.

IT IS WITHOUT A COMPETITOR ON ALL CIRCUITS SINGLY OR IN SERIES.

It is not affected by the flashing of machine.

IT CAN BE REPAIRED BY ANY ONE.

It is much more reliable in action and would save the cost of patrolmen.

The energy expended on the electro magnets' mechanism to operate most arc lamps is utilized in THE EXACT to enhance its candle power. Its resistance is lower than any other lamp.

By using this lamp all the requirements of a city for power arc and incandescent lighting may be met by an alternating plant, thereby saving cost of direct generators, engines, shafting, line construction and maintenance of same, thus reducing the cost of installing and maintenance nearly fifty per cent.

One lamp can be burned on a 5 light transformer and from 25 volts up.

To Electric Lighting Companies—

It will pay you to destroy your lamps and purchase direct from us.

The Gurney-Tilden Co., Ltd.

Sole Manufacturers
under the W. E. Irish Patents.
