

UNDERGROUND WORKINGS Pot Hook Mine.

Kamloops, B.C.

Scale 20 feet to an inch.

TEXT FOR ACCOMPANYING PLAN.

The above plan shows the underground workings of the Pothook Mine. It is impossible to properly show the ore chutes in plan, but as the drifts are following the various chutes, the extent and value of the property will be seen. The whole of the workings are in the vein-stuff.

Our thanks are tendered to Mr. H. Ashby, the enterprising manager of the mine, for permission to publish the above.
