Dr. Weeks, of Brooklyn, sends the following report of a few of the cases in which he ordered **EAGAR'S PHOSPHOLEINE** :

W.D., aged 5, a delicate boy, of marked strumous habit, had whooping cough which ran a very protracted course which rendered him very weak ; a slight exposure to cold was followed by a chill, violent cough and consolidation of the right lung. After the acute symptoms subsided he was put on **Eagar's Phospholeine**, and made a rapid and complete recovery—gained flesh and strength, and was soon in much better health than before he took the whooping cough.

E. L., girl, aged 7, had measles complicated with bronchitis, very severe cough and profuse puriform expectoration, night sweats, etc. Took **Phospholeine** with marked benefit, all the symptoms subsiding rapidly, leaving the lungs in a healthy state.

A. W., girl, aged 15, family history good ; contracted a severe cold which resulted in general bronchitis, both lungs being extensively involved, convalescence tedious, and showing a marked tendency to consumption. Under the use of **Phospholeine** the symptoms gradually yielded, and she regained her ordinary health. About one year after, took whooping cough, during which all the threatening lung symptoms returned, accompanied by hectic, night sweats, etc., the expectoration being occasionally bloody, she lost flesh and strength rapidly, she again took **Phospholeine** and though for three months she was confined to the house, she is now entirely free from all symptoms of consumption, and the respiratory sounds of the lungs quite normal.

50c. per Bottle containing 50 doses.
