

reflect the significant volume of trans-shipment through Singapore, nor do they capture the service sectors. It is estimated that these factors would add over CDN \$100 million to the total trade figure.)

In contrast with Indonesia's exports of the early 1980's, which were exclusively primary products (ie. rubber, coffee, tea and spices), the main exports to Canada in the early 1990's were textiles and apparel. With shipments covered by the bilateral textile restraint arrangement signed with Canada in 1986 and extended to 1993, Indonesia is a major supplier of clothing and textiles to Canada. Other significant Indonesian exports to Canada include natural rubber, wood, mineral fuels and footwear.

In 1991, Canada's exports to Indonesia were officially recorded at CDN \$340.7 million, making

Indonesia Canada's third largest export market in ASEAN. Almost 70 percent of the exports to Indonesia consisted of cereals, plastics, pulp and paper and sulphur. The change in the composition of Canada's exports to Indonesia over the decade can be seen in Table VII on the following page.

### Priority Sectors:

Priority areas for export promotion activities for 1992 were identified as follows:

1. Forestry Sector Equipment
2. Environmental Equipment and Services
3. Information Technology and Electronic Products
4. Power Equipment Products and Services
5. Oil & Gas Equipment and Services
6. Transport Systems and Services
