Mr. Andre Masse Director of Sales

Bertec Medical Inc., a private corporation owned and operated by Canadians, enjoys over seventy years experience in industrial manufacturing. The company is specialized in the manufacturing of electric and manual hospital and nursing home beds, overbed tables, cabinets, dressers, bassinets, emergency stretchers, geriatric chairs, and related accessories. All products manufactured by Bertec Medical meet or exceed the Canadian Standards Association (CSA) and the Quebec Standards Bureau (BNQ) requirements. Bertec Médical Inc. is presently undergoing ISO 9002 certification program. Research and Development of products adapted to modern Health Care needs is a key element of Bertec Medical's success. Significant revenue dollars are spent on product improvement and new product development and updating of production technology every year. Development programs are based on customer and patient input, backed by a beta site testing program.

Bertec Medical's plant and head office are located in L'isletville, one hundred kilometres East of Quebec city, occupying a 4,000 square meter facility and employing 85 people. The manufacturing facility is equipped with state of the art CAD/CAM systems, a new baked epoxy paint system and employs 85 production and administration personnel. There is room for growth without major investments, as the plant is running at approximately 60% of its production capacity, and skilled labour is available within the immediate area. In addition to the Canadian market, Bertec Médical's export markets now include Africa and the Caribbean.
