The North American Free Trade Agreement (NAFTA) expands Canada's freetrade area of 270 million people into a market of 360 million — a market larger than the population of the 12 countries of the European Union and one with a total North American output of \$7 trillion.

Mexico is Canada's most important trading partner in Latin America. Two-way merchandise trade with Mexico exceeded \$4.2 billion in 1993 and is expected to increase to over \$5 billion by the end of the decade.

Cumulative Canadian investment in Mexico is growing rapidly, increasing from \$350 million in 1989 to over \$580 million in 1992.

This guide has been prepared with the problems inherent to the new exporter in mind. However it is not exhaustive; individual circumstances, interests and needs will dictate how companies should tailor their approach and strategy to the Mexican market. While every attempt has been made to ensure accuracy in this study, no responsibility can be accepted for errors or omissions.
