Japan Weakened.

According to the Russian version, it was Japan and not Russia which weakened this afternoon. M. Witte publicly announced after the sitting that it was aron Komura who asked for an adournment until Monday in order to have time to submit a new proposition. Yet it is known that M. Witte has received instructions sent after the president's intercession at Peterhof thru Ambassador Meyer to agree to the divicompensation for the Russian prison- Remarkeble Results at Annual Annese Eastern Railway, but to continue absolutely to refuse to pay war tribute under any guise. This was described as Russia's "ultimatum," leaving ever which the Nfles, Bement, Fond Company the sumbling block to an agreement. In the regular course of procedure, after the presentation of the Japanese compromise proposition on Wednesday, the diffusion was M. Witte's turn naturally to present the counter proposition of his government. If he succeeded, as is intimated, in withholding his card and force. mated, in withholding his card and forc-

Government Making Representations to Strathcona to Offset Alleged Inaccuracies in Official Report.

understood that the provincial government is making direct representations to Lord Strathcona regarding certain slanderous misrepresentations containslanderous misrepresentations contained in a report issued under the auspices of the British Board of Trade, by Professor Mavor of Toronto, on the wheat potentialities of the Northwest. The whole trend of this book it is claimed is calculated to do irretrievable damage to the reputation of the Northwest as a wheat producing country, and serious developments are quite probable. As an instance of Prof. Mavor's "inaccuracies" the statement is gravely in a wheat producing country, and serious developments are quite probable.

As an instance of Prof. Mavor's "inaccuracies" the statement is gravely
made that not more than 2,800,000 acres
in Manitoba are immediately available
for wheat production. The official returns issued last June by the provincial department of agriculture show
2,643,558 acres actually seeded to wheat
in the province this spring. There is
not the slightest doubt that as much
more is immediately available without
recourse to drainage or clearing.
Another instance is that of a map
wherein the professor colors blue all
the Swan River and Gilbert Plains disiricts, where the wheat yield this year
is phenomenal, as indicating that the
land is not fit to grow wheat. Strawbearies were grown this year along
Swan River, and extensive experiments
are to be tried this fall of turkey red
