Only Half Dozen Fail to ReCord Opposition Against
Conscription.

BESOLUTION IS ADOPTED

Cold Objects LAW

"No," said Mr. Draper. "It would not be as well to go home. We have more important business to discuss than this miserable issue."
Other delegates expressed the opinion that they had a right to discuss the law, some quoting cabinet ministers as authority.
Vice-President James Simpson, Toronto, declared that Premier Borden had stated that only in event of the state being in danger would be propose conscription. Then he went to England and on his return declared for it, not withstanding the fact that the United

RESOLUTION IS ADOPTED and on his return declared for it, nor withstanding the fact that the United States had come in. He thought that if there was need of conscription after the entry of the United States, there was greater need before Sir Robert went to England.

the labor movement or the Dominion of Canada to say or do anything that might prevent the Government of Canada from obtaining the result they anticipate in the raising of reinforcements for the fanadian expeditionary force by the enforcement of the law.

Will Oppse Interference.

This congress is emphatically opposed to any development in the enforcing of this legislation, which will make for industrial conscription or the interference with the trades union movement in taken the reference with the trades union movement in taken the reference with the trades union movement in taken to be used as fertilizer," and that he would be shot by a firing squad before the would be shot by a firing squad before the would be "compelled to take up arms damn you."

Delegate Atchinson (Hamilton) said the preferred to leave the matter to the output their final objectives."

Final Objectives Reached.

"Farther north Zeventoke was cap-tured, and London and Highland Ter-ritorials carried the second line of farms, including Rose Farm, Quebec Farm, and Wurst Farm on the line of their final objectives." Work of the Aviators. "During the morning the weat cleared and our airplanes were ab-take a more active part in the ba-indicating the position of our tr

ous technicalities that had been brought forward, and referred particularly to the patriotic stand taken by the typographical men who had supported the Allies and wanted a successful prosecution of the war. He reminded the delegates that it was not the time to bluff. They had not the power to take the drastic steps that had been proposed by some of the delegates, as the economic power of the congress depended upon the stand of the international unions. guns."

FOE MASSED FOR MOVE.

LONDON, Sept. 20.—British troops are reported to have penetrated the German positions in their offensive on the Flanders front as far as the Zonnebeke-Gheiuvelt line, Reuter's correspondent at British headquarters telegraphs. ters telegraphs. At the time the re-port was dispatched the Germans had launched no counter-attacks. They were massing in certain places, however, where the British places, however, where the British guns were bombarding them.

"The British penetration has reached the depth of a mile, which, considering the character of the ground, is a wonderful achievement." the dispatch adds. It characterizes the result of today's attack as "a fine success."

"Tanks were employed in limited numbers, for the ground does not favor their use, but some of these machines were seen by the airmen moving to the assistance of the infantry, where the latter were temporarily held up.

"The flying men are taking a great part in the battle and are carrying out a much more elaborate and co-ordinated offensive than on any previous occasion." any previous occasion.

CANADIANS PUSH AHEAD SOUTH OF ST. LAURENT.

[By Stewart Lyon, Special Correspondent of Canadian Press, Limited.]
CANADIAN HEADQUARTERS IN FRANCE, Sept. 20.—Pressure upon the defences of Lens is unrelenting. Posts have again been pushed out into "No Man's Land" in the region south of St. Laurant, and the ground in the defence of which the enemy a month ago fought fiercely, sustaining hundreds of casualties, has been occupied by us, almost without a struggle.

The Germans are being literally squeezed out of Lens, and if credence may be placed in the reports of prisoners, as to conditions in the city, the garrison would welcome the order to evacuate. Enemy orders are still to hold on at all costs. This is being done, but the cost is too great, since the occupation by us of the northern suburbs permits the projection of gas into the town its the projection of gas into the town and west.

Local opinion in this great industrial region seems to be in full accord with the declaration made by the new premier of France, as to the nation's war aims. The restoration of Alsace-Lorraine is regarded as vital to the future security of the country. By the deliberate policy of stripping the French population in the occupied territory of all their portable possessions, Germany is deepening the hatred of the people and hardening their resolve to make an end of militarism and terrorism.

f militarism and terrorism BERLIN SHORT OF MEAT

Greater Part of Population Unable to Secure Any.

Copenhagen, Sept. 21.—The municipality of Berlin announces that the cattle merchants have almost discontinued the supply of meat. Berlin gets only one-sixth of the quantity needed and the greater part of the population is unable to obtain any meat.

Defences That Were Nearly Impregnable Carried By British

IN THE CRUCIAL SECTOR

Attack Was Introduced by Artillery Hammering That Lasted For Week.

British Headquarters in France, Below Inverness are Dumbarton Lakes, and the ground about them is pitted with shell craters, which are filled with water. The paths and trenches here were wiped out by artillery fire, and the shell holes are so close together that there is no space to walk around them. In most places the mud and water are knee deep. Still further south is Shrewsbury Forest, through which the British lines ran, and the ground in front of the British trenches is a mass of tangled barbed wire. Just below Shrewsbury Forest is Belgian Wood, which lies near Hollebeke. There are many other little bits of forest scattered through this section, most of them in marshy ground, which was rendered still more difficult by the devastation wrought by shells.

Between Hollebeke and the River Lys the country is more or less open, and the ground about them is pittled with shell craters, which are filled with water. The paths and the ground about them is pittled with shell craters, which are filled with water. The paths and the ground about them is pittled with shell craters, which are filled with water. ambitious method of getting the giant link into its final position was perfectly feasible. The only thing the engineers have had to guard against was wind, and up to today scarcely a breath of it has been present since work was begun last Monday. This morning, however, there was a steady wind blowing almost broadside on to the span, and it gave the engineers an anxious time until the tests made proved that it was not strong enough to cause a swing. enough to cause a swing.

Three Years to Paint.

Three Years to Paint.

While the actual completion of the structural portion of the bridge can now be considered as complete, it will be some months before trains can be run over it. The bridge will be turned over to the gang of men who will be permanently employed upon it. This gang will have a steady job. It will take three years to paint the bridge, at a cost of \$35,000, and when the men have finished at one end they will start again at the into them at the factory.
