SHOOT STRAIGHT

One Thing That Is Needed In Our Soldiers

CONFIDENCE NECESSARY

Three Stages of The Preparatory Work in Fitting Men For a Place in The Army at The Front

"The nation's task now is to make armies," writes Professor Spencer Wilkinson in a recent issue of The London Morning Post. "Anyone who has read the accounts of the fighting at Mons and at Cambrai," he continues, "will see that only first-rate soldiers will be able to stand in that kind of fiery ordeal." He accordingly proceeds to discuss the training needed by the Territorials, as follows:

"Living together in complete units at full strength, the Territorial troops must be gradually gaining that quality of cohesion which marks an army. Daily marches will harden them for the field. Their officers are keen and intelligent and many of them have studied war. What they are now acquiring is the confidence which comes from practice. But there is one other thing which is indispensable to give officers and men the spiritual quality which will enable them to emulate the achievement of the army now in France. That one thing is the power to shoot straight. It is everything."

"The weapon with which the infantry soldier destroys his enemy is the 190 bullet which he carries. The rifle is merely a machine for directing it. Give a recruit a rifle and he will be afraid of it. When he fires it kicks him, he will hit the target and probably the target he thought he was aiming. A man in that condition is bound to be afraid when he hears the bullets whistling past him in the air. He may hope that one of his bullets may hit an enemy, but in his heart he is quite sure that it will not. But let the recruit be quickly taught to handle the rifle; let him practice every day on the range, firing in shots, and let this practice be continued day after day for weeks. By degrees the man will find that he can hit the target. He will hit the target and probably the target he thought he was aiming. A man in that condition is bound to be afraid when he hears the bullets whistling past him in the air. He may hope that one of his bullets may hit an enemy, but in his heart he is quite sure that it will not. But let the recruit be quickly taught to handle the rifle; let him practice every day on the range, firing in shots, and let this practice be continued day after day for weeks. By degrees the man will find that he can hit the target. He will hit the target and probably the target he thought he was aiming. He may hope that one of his bullets may hit an enemy, but in his heart he is quite sure that it will not. But let the recruit be quickly taught to handle the rifle; let him practice every day on the range, firing in shots, and let this practice be continued day after day for weeks. By degrees the man will find that he can hit the target. He will hit the target and probably the target he thought he was aiming. A man in that condition is bound to be afraid when he hears the bullets whistling past him in the air. He may hope that one of his bullets may hit an enemy, but in his heart he is quite sure that it will not. But let the recruit be quickly taught to handle the rifle; let him practice every day on the range, firing in shots, and let this practice be continued day after day for weeks.
