

WOMAN'S WORK IN MANY LINES VARIETIES ON VIEW ALMOST ENDLESS

Public School Exhibits—Old English Laces—Competitive Art Entries

The exhibits in the woman's building this year were so numerous and so diverse as to need a deal of space to adequately describe or notice all.

Filling a large space was a beautiful display of English lace in many varieties, shown by Mrs. Diespecker, and a chat with her was productive of much interesting information. The hand-made pillow laces were the work of the wives and daughters of farm laborers in Buckinghamshire. The art was first introduced into the Midlands counties by Queen Catherine of Aragon, and developed by the Flemish refugees of the sixteenth century. It flourished for a time and then fell into decay, but of late years it has been revived.

The Honiton laces, which are especially admired, were taught the village women and girls by Queen Catherine herself at the time when she was awaiting her divorce from Henry VIII. This lace is made like the Buckingham, with bobbins and pins on a pillow, but at what time the pins were first introduced is unknown. There are in existence pins that are over 300 years old with hand-basted heads. Before their advent, thorns and fishbones were used.

Mary Queen of Scots was famous for her lace-making and designing, and some is credited to many designs of birds and four-footed animals which are greatly used in the Honiton lace of today. Queen Adelaide suggested the first Honiton applique dress and started a fashion which has never died out. Queen Victoria's coronation dress was of Honiton lace over which there was great trouble for the time given to make it was too short and workers from many parts were engaged on it. The present Queen Mother Alexandra, has always done all in her power to help and encourage the English lace industry.

Competitive Art Exhibit.

While the exhibit of china painting at the fair was not very large the quality was beyond criticism. Miss Cowper's showing was very beautiful and varied. Miss French will show a favorite exhibit with Victorians headed the list of amateurs with some very dainty work. Miss W. Gaunt was a close second. It seems a pity that more exhibitors do not compete in this class of art.

In the designs for borders or stencilling Mrs. R. B. McMicking was first with a very catchy colored design, while Miss Phyllis Wollaston was second.

In pierced brass Mrs. McMicking was again an easy winner, her effort taking the form of a very handsome lamp shade. Miss Muriel Nicholson was winner of first prize and Miss Edna McKittick second in designs for given spaces. Only a few samples were shown, but all were good.

In wood-carving in relief the competition was not at all keen, but the work submitted was exceedingly well-executed. A photo frame by Sidney Ashdown and a full-length figure stood by Mrs. McMicking carried off the prizes.

Two interesting models, one of a horizontal and another of a marine steam engine, which were not in competition, were exhibited in the competitive art department and were viewed with much interest.

In still life Miss Bane won first prize with a very pretty design in water-colors of daffodils, and Miss Woodward's clever depicting of mountain ash berries which came second, was very much admired. L. O'Connell's realistic sketch of a wheat-field won him first prize among seventeen entries. This same artist, who is a newcomer to the city, exhibited several very beautiful marine studies of Scottish harbors, in which the coloring and technique displayed in the painting of ships is most remarkable.

A cover design for a magazine, "The Golden Age, Port Rupert, 1909," was an excellent piece of work although it did not appear in a class where a prize could be awarded.

In water colors from nature Miss Dolly Smith won first prize by a pretty spray of autumn foliage, and a sunflower design by the same artist is very cleverly painted. Lewis Heald won second in this class for some very naturally painted fruit. In still life Miss Dolly Smith was again a winner. She had chosen panicles as her subject.

In professional work the showing was small. Mr. Shrapnel won first in a pretty landscape and second in still life with a cleverly painted brace of pheasants. In the latter class W. Quicks, Royal Oak, was first with a brace of grouse. Miss M. Beattie won first in portraits with a small but realistic sketch of an old man's head.

In the collection of native flowers and plants, which includes grasses, ferns, shrubs and mosses from the interior (east of the Cascades) limited to the school children of the province, the showing was small but so beautifully mounted that it is to be regretted that interest was not taken by teachers in encouraging children to make such collections and become familiar with the beautiful flora of the west. The collections from Vancouver Island and the coast islands were likewise few in number, but the mounting was very carefully done. It is to be hoped that next year will show a great improvement in this line. It is a matter for teachers to take up during the spring and summer months, and if a love for nature is instilled into children it will be an unfailing source of interest and argument in their more mature years.

A Toronto Exhibit.

A large consignment of fancy work arrived on Thursday afternoon from Mrs. J. B. Carson, Toronto, which had unfortunately been delayed in transit. The exhibit was a most varied one and was entered in all classes. It was put

on exhibition by Mrs. Richards and was awarded a special prize. The samples of knitting were said by experts to be the best they had ever seen, one pair of socks in particular being as fine in texture as merino. A cross stitch design on canvas in yellow and green was very effective, and a beautiful sofa cushion top done in ribbon work was much admired. The fad for Paisley designs was seen in an elaborate embroidery design on satin. Another striking piece of work was a pretty embroidery design on cream flannellette done in mauve silk. Hardanger, Mountmellick and Walsloon embroidery work was all excellent and there were all sorts of fancy netting and knitting designs which showed the exhibitor to be an adept in fancy work in all its branches.

Women's Institutes.

Throughout the fair great interest was taken in the exhibits of the Women's Institutes, which occupied large booths on the ground floor of the woman's building. The silver cup offered by the Agricultural Association for the best display was won by the Lake Hill Institute of which Mrs. Tolmie is president. Without in any way disparaging the exhibits of the other Institutes, which are highly creditable from every standpoint the prize winning booth made a beautiful showing. A great variety of fancy work in all its branches was advantageously displayed, and the domestic science department was represented by all sorts of delicious cookery, jellies, bottled fruits, eggs, butter, etc. The decorations were carried out most effectively in green and gold, many grass and grain designs being used, the work of Mrs. Grant.

The prize collection of cookery by Mrs. Jameson has been the subject of much comment. From a delicious-looking lemon pie to a Scotch haggis, or mystery bag, as it has been dubbed by those who fail to recognize its merits, Mrs. Jameson's display covered all varieties of cookery. The second prize in the same class was won by her mother, Mrs. Joseph McCoy.

Throughout the fair the Woman's Exchange has been doing a thriving trade. Many articles have been sold, and a great number of orders taken from samples.

DOUKHOBORS ARRIVE FROM SASKATOON

Over Seven Hundred Join the Colonies at Grand Forks and Brilliant.

Nelson, Oct. 1.—Between 700 and 800 Doukhobors have arrived from the Yorkton district, in Saskatchewan, destined for the Brilliant and Grand Forks colonies in this province.

"About 300 of the party are going to Grand Forks," said Mr. Sherbini, agent of the Brilliant colony, "and the remainder to Brilliant. At the latter settlement we are putting up a large number of double tents for their immediate accommodation. Twenty frame houses have been completed there this summer, the lumber for which was sawed at our sawmills, and we have 40 carpenters at work now on other houses. Before snow falls, our whole community of 1,500 souls will be comfortably housed. Brilliant, in our main colony, that at Grand Forks numbering 450 persons. There are about 6,000 members of the Doukhobor society in Canada, and the arrival of this last contingent leaves about 4,000 Doukhobors in Saskatchewan.

"Our total land holdings in British Columbia consists of 2,900 acres at Brilliant, 2,500 acres at Pass creek, 1,100 acres at Slocan Junction, and 3,500 acres at Grand Forks. The first three are operated for the present from Brilliant, but in a year or so, when we have much of the land cleared we will start a community at Slocan Junction. Our new settlers mill at the latter point will commence sawing next week.

"At Brilliant we have 600 acres cleared, 250 acres being planted to fruit, while 50,000 trees have been ordered for planting this fall and next spring. There are fifty colonies of bees, and they have been doing very well. In addition to the native flowers, we are sowing certain kinds of grass, including a variety of mustard, for the bees.

"We are completing an eight-room hospital, and next year we will build a school. Besides the concrete reservoir we opened in the spring, we are building another, also of concrete, 150 feet long, 70 feet wide, and 13 feet deep."

BODY FOUND IN LAKE.

Revelstoke, Oct. 1.—The body of Dr. Slaw, who was drowned this summer in Kinbasket lake, in the Big Bend country, when his canoe capsized in a squall, has been found by a survey party half covered in sand and mud near the edge of the lake, being laid bare when the lake water subsided. The remains were badly decomposed. Dr. Slaw was well known in Revelstoke, having made frequent botanizing trips up the Big Bend from here. This year he had a large party of eastern people with him and it was while returning from taking some of them across Kinbasket lake in the Big Bend that he lost his life.

CRIED DAY AND NIGHT

Mrs. R. E. Sanford, Inverary, Ont., writes: "My baby was sickly for over a week with bowel and stomach trouble and cried night and day. Nothing I did helped her in the least till I began giving her Baby's Own Tablets. They helped baby right away and now she is a big healthy child with fine rosy cheeks. Tablets are certainly a wonderful medicine and I recommend them to all my friends who have children in the house."

What Baby's Own Tablets have done for thousands of other little ones simply because they go to the root of so many childhood ailments—that is, they drive all impurities from the stomach and leave it sweet and healthy. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

The new battleship Rio de Janeiro, being built in England for Brazil, will be by far the largest in the world. She will displace 22,000 tons, and her cost will be approximately \$22,000,000.

Fashion Interest Centres at Campbell's

A visit to our premises to-morrow, or any day, will give you as much information about the new and exclusive Fall and Winter fashions as you could gain from a trip to Fifth Avenue, London or Paris, for what is shown in the most exclusive shops of these three great fashion centres is shown at "Campbell's."

As mentioned in our advertisement of Saturday, each day is bringing us new arrivals in COATS, SUITS AND DRESSES. We wish it were possible to adequately describe our new arrivals in print, but we cannot—instead, we most sincerely ask you to visit us and see for yourselves the beautiful models that are so charmingly exclusive.

Every Suit Here Is Perfect in Its Way

Take the least expensive suit in the house, examine it carefully, and you will find it has been skillfully designed, the material is excellent, it is well lined, not a detail has been slighted. It is just as perfect in its way as the most elaborate costume designed for more ceremonious occasions. There has been a definite style idea carried out in the fashioning of every suit.

Afternoon and Evening Dresses

Newness is the keynote of our exquisitely beautiful assortment of Dresses for Autumn and Winter Wear, developed in a variety of charming materials and styles in which you may discover numerous modifications and adaptations of "the much talked of" Hobbled Gown, which has usurped more than its portion of the envy and admiration of fashion's devotees during the past few weeks.

Our Mantle Department is an Exposition in Itself.

Figures From the Underwear and Hosiery Section

CONTRACT FOR CITADEL.

Prince Rupert, Oct. 1.—The contract for the Salvation Army citadel has been awarded to E. H. Morrison, who introduced a bill amending the constitution, giving the Commonwealth complete legislative control over trade and commerce corporations and industrial matters, including employment, wages and settlement of disputes, and also giving power to deal with combinations and monopolies. The bill was read a first time. When passed it will go to referendum.

MONOPOLY LEGISLATION.

Melbourne, Sept. 30.—In the federal parliament Attorney-General Hughes introduced a bill amending the constitution, giving the Commonwealth complete legislative control over trade and commerce corporations and industrial matters, including employment, wages and settlement of disputes, and also giving power to deal with combinations and monopolies. The bill was read a first time. When passed it will go to referendum.

DESIRED TO POSE AS "HERO."

Chicago, Oct. 3.—The police are convinced that Fred Wahlemeyer, who was found at the home of Mrs. Potter Palmer, carrying an open knife and with a bomb lying nearby, is demented. He probably will be sent to a sanatorium.

Wahlemeyer confessed that he "faked" a bomb mystery in order to appear as a hero.

Austria is the only empire in the world which has never had colonies or even trans-marine possessions.

CUMBERLAND CITIZENS' LEAGUE.

Cumberland, Oct. 1.—At a meeting of the Citizens' League the secretary was instructed to write the school trustees recommending that small children at the public school be moved down stairs, and that the doors leading to the various rooms open outwards. A committee was appointed to work with teachers and children to collect money to cover expenses of iron fire escapes in place of the wooden stairs.

The matter of securing the services of the medical practitioners by paying a monthly fee, the same to be collected by the city, was brought up.

THOUSAND MILE AEROPLANE RACE

Nearly Dozen Aviators Will Take Part in Chicago to New York Flight

Chicago, Oct. 3.—A year's remarkable progress in aviation was indicated in Chicago Saturday when entrants in the \$30,000 New York-Chicago air race gave exhibitions at Hawthorne track. The race to New York will start next Saturday. Nine aviators are entered.

Under the direction of the Chicago Evening Post, which, with the New York Times, is promoting the Chicago-New York flight, all this week will be devoted by the entrants to practice flights.

The 1,000 mile flight to New York, which must be accomplished in 156 hours elapsed time, stops unlimited, will be the greatest endurance test of modern flyers.

The entrants, with the make and capacity of their machines are:

Eugene Ely—Curtiss biplane, 35 horse power.

Charles Willard—Curtiss biplane, 40 horse power.

J. A. D. McCurdy—Curtiss biplane, 35 horse power.

August Post—Curtiss biplane, 35 horse power.

James Radley—Bleriot monoplane, 25 horse power.

Charles K. Hamilton—Diets biplane, 115 horse power.

Thomas S. Baldwin—Curtiss biplane, 35 horse power.

Todd Schriever—Diets biplane, 80 horse power.

J. C. Marr—Curtiss biplane, 35 horse power.

There is a possibility of the entry of a Wright biplane to be guided by Walter Brookings, who won the Chicago Record-Herald prize of \$10,000 for a continuous flight to Springfield, Ill., from Chicago, Thursday, a distance of 181 miles.

James Radley, the English air pilot, expects to use a Bleriot monoplane, with a fifty horse power engine, if it can reach here in time. Otherwise he will use a Curtiss biplane with a heavier engine.

BURNED TO DEATH.

Minot, N. D., Oct. 3.—Elwin, the three-year-old son of A. C. Johnson, Republican candidate for governor, was burned to death, on Saturday afternoon, at his father's home here. He was playing in a toy house, which was lighted from the fire place.

REPUBLICAN PARTY PROGRESSIVE, SAYS TAFT

President Gives All Factions Credit for Share in Assisting to Pass Legislation

ACCUSED OF MURDER.

Vancouver, Oct. 3.—Alphonse Richer has been brought down from the north by Special Constable Crippen of Prince Rupert. Richer is charged with the murder of Joseph Beaudoin in a shack in which they were living, near the northern city. It is alleged that the two men had a quarrel and that Richer shot Beaudoin with a 22-calibre rifle. Richer does not deny that they had a quarrel, but says that the shooting occurred some time afterwards, when he was handling the rifle and it accidentally discharged. The bullet struck Beaudoin in the abdomen and glancing upward touched the heart. Beaudoin died about fifteen minutes afterwards. After the shooting Richer ran at once for a doctor, but when he arrived Beaudoin was dead. Richer will be held in the provincial goal for trial at the assizes here.

CRUSHED TO DEATH.

Toronto, Sept. 30.—Nellie Jordan, aged 27, a packer in William Nelson, Ltd., 307 Gladstone avenue, ice cream manufacturer, was so badly crushed by an elevator off which she sought to step yesterday that she died in the Western hospital three hours later.

"A progressive Republican," the

president went on, "is one who recognizes existing and concrete evils and who is in favor of practical and definite steps to eradicate them."

The president mentioned Colonel Roosevelt by name in connection with the campaign against corruption abuse and a third time by inference when he referred to the New York situation.

"A progressive Republican," the

EXPERT HEARD IN DENTAL CASE SCORED BY COUNSEL FOR THE DEFENSE

Continuation Yesterday of Case
Richards vs. Verrinder at
Dental College

The case of Richards vs. Verrinder and the Dental College of British Columbia was continued in the court yesterday afternoon, before Justice Gregory and a special jury. The features of the afternoon's proceedings were the declaration of expert from Seattle for the plaintiff, testifying that in his opinion Dr. Richards ought to have been passed board of examiners, and the subsequent severe cross-examination of Dr. Richards by E. V. Bodwell, K. C., for the defense.

On the court reassembling for the examination of Dr. Richards was resumed by W. J. Taylor, C. counsel for the plaintiff.

Much of witness' evidence has been technical, methods of dental practice. On a number of questions as answered by Dr. Richards Dr. Jordan found them faulty, though the answers plaintiff were in the main satisfactory.

One question in the examination which had been set before Richards was: "Wherein is a danger in any other than a normal position when anaesthetic being administered?"

Mr. Taylor—What does that mean?

Dr. Jordan—Don't know.

Mr. Bodwell protested against the question on the grounds that Dr. Richards was an expert in the room who was prepared to answer the questions.

Dr. Jordan to Mr. Taylor: "He had marked Richards 8 for the question. If the question had been clearer he would have given 20."

Dr. Verrinder, the examiner of the present action, appears from the record of his examination, said that Dr. Richards was incomplete as he had not mentioned the "danger" as "of the back."

Quoting further from his examination on discovery, Mr. Taylor said Dr. Verrinder had said that Dr. Richards had been "surprised at the general opinion of Dr. Richards' papers" by himself.

In regard to the question: "Was the pressure per square inch vulcanizing at 350 pounds steady?" Dr. Jordan testified that his opinion both plaintiff's and defendant's had been wrong. Dr. Richards had answered 50 pounds, square inch and Dr. Verrinder said it was not steady. To effect all the text books which Dr. Richards had consulted showed the pressure to be 75 pounds.

At this point the court asked Taylor what the status of the case would be the court to find that there was no evidence of any kind.

Mr. Taylor said the plaintiff seek a remedy for injury wrongfully being deprived of tunity to practice in this province.

Mr. Bodwell said he would that point.

Mr. Taylor asked Dr. Jordan, being examined by Dr. Richards, he believed plaintiff should have admitted to the college.

Mr. Bodwell objected and said Richards was not admitted because examiners had not passed him.

Action which Richards had was set out in the statement of claims, for conspiracy and fraud.

The court was of the opinion that Jordan, unless he knew the facts was hardly in a position to answer question.

Mr. Bodwell, quoting from the clause providing that judge had full powers to reject cases.

The court held it might be proved conspiracy by circumstantial evidence. He allowed the question ground.

Mr. Bodwell asked that his be noted.

Dr. Jordan then answered question in the affirmative. Dr. had, he said, passed a most examination.

The court ruled against Mr. question whether witness Richards well-acquainted with work.

Mr. Taylor—Was there any other thing to show that Richards incompetent?

The court would not allow a question several others of the nature.

Mr. Taylor desired to have retraction to this ruling noted.

Mr. Bodwell then under cross-examination of Dr. Jordan witness said his fees were \$100 and \$100 each day he remained. He had practised dentistry more. He was a student on Canadian. The State of Washington. The State of Washington rule not to admit dentists to without examination. His business was to prepare pupils for examination in any state in the United States. He had been in the State of Washington. He was not to get men to pass the exam. He wanted to pass on good men. He had frequently pupils whom he thought would make good dentists.

Mr. Bodwell—You coach a man pass that examination?

Witness—No, I instruct the that he may be declared competent as a result of his ability.

He denied that the fact that friendly with the president of examiners in Washington had ed him in his business. He al that the president had helped get Dr. Richards admitted in ton. He had had the president of the Washington board to take matter of Dr. Richards' admission British Columbia with the
