Delivery of Canadian Courier

Mailing Canadian Courier to subscribers is arranged so as to give delivery by the date of issue to those parts of the Dominion most distant from the office of publication. Ontario subscribers should receive theirs by Friday; Toronto subscribers by Thursday.

CANADIAN COURIER

Published fortnightly at 181 Simcoe St., Toronto, by the Courier Press, Limited.
Subscription Price—Canada and Great Britain \$1.00 per year, United States \$1.50 per year, other countries \$2.00 per year, payable in advance. **IMPORTANT:** Changes of address should be sent two weeks before the date they are to go into effect. Both old and new addresses must be given. **CANCELLATIONS:** We find that most of our subscribers prefer not to have their subscriptions interrupted in case they fail to remit before expiration. While subscriptions will not be carried in arrears over an extended period, yet unless we are notified to cancel, we assume the subscriber wishes the service continued.

Published Every Other Week

Think This Over

CANADA spends on general goods made in the United States about three times as much as Canada gets from the United States for goods made in this country. Canada also spends easily one thousand dollars on American-made magazines which come in free of duty to every dollar she gets from the United States for magazines made in Canada. The handicap in the case of Boots, Drygoods & Co. is 3 to 1. The handicap in the cost of Magazines and Illustrated Weeklies is 1,000 to 1. What about the 1,000 to 3 argument that Canadian periodicals should at least be protected by a tariff?

If it is true that even so material a thing as a war is not won by materials and munitions so much as by manhood, how much of a fiction is it that nationhood can never be established merely by stabilizing the dollar? We may put a Chinese wall around Canada to keep out foreign goods which we can't make ourselves. But if we let foreign magazines flood the market the exclusion of foreign goods won't go far to build up a nation. More money is spent in a week and more anti-national influences created by the hordes of cheap magazines that invade Canada than the United States spends on Canadian magazines in a decade. How about nationalizing sentiment in the balance of trade?

Schrader
The mileage obtainable from tires is in direct ratio with the air put into them. If your tire lacks twenty per cent of the air it needs, it will render you twenty per cent less than the mileage it could have given you. Measure the air in your tires with a **SCHRADER Universal Tire Pressure Gauge** and get the maximum out of your tires.

CANADIAN OFFICE SCHOOL FURNITURE CO. LTD.

JUST PUBLISHED—1918 NEW REVISED, RESET AND MUCH ENLARGED EDITION, WITH 500 NEW ENGRAVINGS ADDED

THE Modern Gasoline Automobile

By VICTOR W. PAGÉ, M. S. A. E.,

Author of "Automobile Repairing Made Easy," "Automobile Starting, Lighting and Ignition Systems," etc., etc.

1,011 OCTAVO PAGES—1,000 SPECIALLY MADE ENGRAVINGS WITH TWELVE FOLDING PLATES.

PRICE \$3.25.

This is the most complete, practical and up-to-date treatise on gasoline automobiles and their component parts ever published. In the new revised and enlarged 1918 edition all phases of automobile construction, operation and maintenance are fully and completely described, and in language anyone can understand. Every part of all types of automobiles, from light cycle-cars to heavy motor trucks and tractors, are described in a thorough manner, not only the automobile, but every item of it; equipment, accessories, tools needed, supplies and spare parts necessary for its upkeep, are fully discussed.

It is clearly and concisely written by an expert familiar with every branch of the automobile industry and the originator of the practical system of self-education on technical subjects. It is a liberal education in the automobile art, useful to all who motor for either business or pleasure.

Anyone reading the incomparable treatise is in touch with all improvements that have been made in motor-car construction. All latest developments, such as high speed aluminum motors and multiple valve and sleeve-valve engines, are considered in detail. The latest ignition, carburetor and lubrication practice is outlined. New forms of change speed gears, and final power transmission systems, and all latest chassis improvements are shown and described. This book is used in all leading automobile schools, and is conceded to be the Standard Treatise. The chapter on Starting and Lighting Systems has been

greatly enlarged, and many automobile engineering features that have long puzzled laymen are explained so clearly that the underlying principles can be understood by anyone. This book was first published six years ago, and so much new matter has been added that it is nearly twice its original size. The only treatise covering various forms of war automobiles and recent developments in motor-truck design as well as pleasure cars. This book is not too technical for the layman nor too elementary for the more expert. It is an incomparable work of reference for home or school.
