

what's up in sports

The UAC Stags blanked the U of A Bears rugger team 13-0 last Saturday. The win gave the Stags the Little Brown Jug trophy with a total score of 27-3 for the two-game total-point series.

This weekend the Bears meet the UBC Thunderbirds at 2:00 p.m.

on varsity grid.

The Bears meet the Harlem Stars Friday and Saturday evenings at 8 p.m. in the gymnasium.

The Golden Bears meet the Calgary Spurs in the ice arena Friday at 8:30 p.m.

Women's res meets phys ed Saturday at noon on the varsity grid.

The Seagrams Chorus leaves SUB at 7:45 a.m. for the annual concert in Calgary. As well as singing and other activities the group plans to take in the Bear-Dinosaur game at 2 p.m.

If you can help us move faster we need you

(An open letter
to '66 grads)

Northern Electric is moving faster today than any self-respecting 70-year-old should. Away back in the late 1800's, before autos or airplanes, or radio, or television were invented, a few men started a business that later grew into Northern Electric. For years we relied upon American sources for most of our technical development. But back in 1958 a rather disturbing thing occurred: Linus threw away his blanket. Northern began to do her own research and development: began to plan aggressively for technological change and an active penetration into world markets.

The last seven years have been exciting ones. A new air has permeated the atmosphere at Northern and developments are taking place that present a challenge in every sphere of our activity. To meet this challenge we need university grads—top-notch university grads!

We need engineers—electricals and mechanicals especially, but we've room for civils, metallurgicals and chemical. None of our departments has asked for a mining or forestry man yet, but don't bet on it!

We need B.Comm.'s—mostly for accounting and business administration, but our Marketing Division, International Operations and Wage Practices are always coming up with requirements for a good B.Comm.

We need B.Sc.'s—not only honors grads, but those majoring in chemistry, maths, physics and related disciplines.

We need B.A.'s—in a wide variety of areas:—For sociological and economic studies, personnel work, public relations, training programs.

And because we're pushing into so many experimental areas, we need Master's and Ph.D.'s, people who can spearhead the attack on the more complex problems that face us.

If you want to become part of Northern's exciting future, see your Placement Officer. He'll give you more detailed information and arrange an interview for you with one of our recruiters who will be on campus in three weeks.

Synchronized swimming offers girls challenge

By MARION CONYBEARE
Have you ever tried synchronized swimming?

Well if you can swim you can be a synchronized swimmer.

All you need is a reasonable

swimming ability . . . and a lot of enthusiasm.

The grace, rhythm, and control of a good synchronized swimmer isn't all natural. These arts are learned through hours of rewarding practise.

Essentially, the sport is divided into two areas—figures and strokes.

Basic strokes are sculling, side stroke, breast stroke, propelling, and inverted breast stroke.

Propelling is a type of sculling in which the arms are extended in a v-position above the head. The body is propelled feet-first through the water creating a smooth torpedo-like motion.

Inverted breast-stroke is exactly that, breast-stroke done on the back.

Sculling is the basis of all synchronized swimming. In sculling the hands execute a figure-8. This motion alone holds the body weight steady.

Did you know Barracuda, Catalina, Kip, Dolphin are the names of some of the figures?

Most figures begin with the ballet leg.

The ballet leg is done from a back floating position. One leg is drawn up and held at right angles to the body.

Sound easy! Try it! But don't forget to scull and point your toes.

Another basic figure is the dolphin. The starting position is the back float. From here the back is arched and the body drawn head-first deep under the water, forming a large circle.

For water shows, or competition the figures and strokes are combined to make exciting team numbers, solos and duets.

Any musical record has potential for a swimming number and themes vary from galley slaves to folk dancers. Just let your imagination run wild.

With costuming, the swimmers become the people they portray.

Sound interesting?

There is a synchronized swim club on campus.

No synchronized experience is necessary. Coaches Eileen Taylor and Janet Heaps are more than willing to help you.

Pool time is 6 p.m. Tuesdays and Thursdays.

OFFICIAL NOTICE

The 1965 McGill Conference on World Affairs will study "The New Dimensions of War and Peace: Experiences in the Afro-Asian Theatre." Students interested in this field are urged to apply in writing to Carol Smallwood in the students' union office. The delegate will be sponsored by the student's union. Application deadline is Nov. 2.

CUS, CIAU meet to solve troubles

CUS and CIAU will meet officially to straighten out their differences Nov. 18, says Dr. Van Vliet dean of the faculty of physical education and CIAU executive member.

The meeting was arranged after an informal gathering of the executives of both organizations in Ottawa last week.

At the meeting Paul Ladouceur, CUS sports director, and Dr. Van Vliet as well as CIAU President Ribert Pugh discussed the problems of international sport in relation to college sports on the national scene.

"It is ridiculous for us to think international when the local situation isn't straightened out yet," said Dr. Van Vliet.

He pointed to poor attendance at football games as an example of the local situation.

"I hate to see the cart getting so far in front of the horse you don't know whether the horse needs to be fed or not," he said.

As far as a pre-Christmas hockey tournament to choose the Canadian representative to go to the Winter Universiade goes Dr. Van Vliet feels there is not enough time to organize the tournament properly.

"You've got to prepare at least a year in advance if you don't want a lot of confusion," is his comment.

Dr. Van Vliet doesn't damn CUS participation in college sport, on the contrary he is: "delighted that CUS is taking an active interest."

However, Dr. Van Vliet is afraid CUS is getting into college athletics and particularly international athletics without full knowledge of the facts.

College athletics is a complicated business, take the fact that the Queen's Golden Gaels will be unable to play in the College Bowl game in Toronto even if they are selected because of a standing rule against football games after Nov. 15, as an example.

"The issue is clouded and how it is going to be resolved I don't know," he concluded.
