## COUNT YOUR BLESSINGS

Ross Hawley

This is the time of year when we should all add up our assets and count our blessings. Some of these are spelled 'a\$\$ets' and some are spelled 'assets'. The 'a\$\$ets', of course, keep a roof over our heads but the other 'assets' of living in a free society and being able to seek happiness in our own way make life under that roof worthwhile.

The 'a\$\$ets' are apparent on every hand in our booming economy. If the world's population of three and one quarter billion people were compressed to a thousand people, a little over sixty would be North Americans. These sixty would receive HALF of the total income of the world and own FIFTEEN TIMES as much goods as the other 940 combined!

The 'assets' of a free society require just as much work to maintain as the 'a\$\$ets'. Let us work at keeping them untarnished equally as hard.

A new highway research study shows that half of all fatal accidents involve only one or with alcohol figuring prominently in the main causes: excessive speed and faulty driving. Take heed.

We hope you all reach your individual destinations safely with a minimum of life's carbon and a maximum of life's happy mileage.

A Happy New Year.
